This book explores the many aspects and outcomes of NASA s research in life sciences a little understood endeavor that has often been overlooked in histories of the space agency **Radiation Hazards to Crews of Interplanetary Missions** Task Group on the Biological Effects of Space Radiation,Commission on Physical Sciences, Mathematics, and Applications,Space Studies Board,Division on Engineering and Physical Sciences,National Research Council,1997-03-13 NASA s long range plans include possible human exploratory missions to the moon and Mars within the next quarter century Such missions beyond low Earth orbit will expose crews to transient radiation from solar particle events as well as continuous high energy galactic cosmic rays ranging from energetic protons with low mean linear energy transfer LET to nuclei with high atomic numbers high energies and high LET Because the radiation levels in space are high and the missions long adequate shielding is needed to minimize the deleterious health effects of exposure to radiation The knowledge base needed to design shielding involves two sets of factors each with quantitative uncertainty the radiation spectra and doses present behind different types of shielding and the effects of the doses on relevant biological systems It is only prudent to design shielding that will protect the crew of spacecraft exposed to predicted high but uncertain levels of radiation and biological effects Because of the uncertainties regarding the degree and type of radiation protection needed a requirement for shielding to protect against large deleterious but uncertain biological effects may be imposed which in turn could result in an unacceptable cost to a mission It therefore is of interest to reduce these uncertainties in biological effects and shielding requirements for reasons of mission feasibility safety and cost *Technology for Large Space Systems: A Bibliography with Indexes (supplement 22)* ,1990 *Space Systems Failures* David M. Harland,Ralph Lorenz,2007-09-14 The very first book on space systems failures written from an engineering perspective Focuses on the causes of the failures and discusses how the engineering knowledge base has been enhanced by the lessons learned Discusses non fatal anomalies which do not affect the ultimate success of a mission but which are failures nevertheless Describes engineering aspects of the spacecraft making this a valuable
