Kremer,2019-06-12 The Solar Corridor Crop System Implementation and Impacts presents a case study format on the planning and implementation of alternative cropping systems designed to maximize incident sunlight and bio support of all crops in a rotation system The book describes the basic component of the system an increased access point of incident sunlight between each row or pairs of rows that enables a more uniform vertical distribution of incident sunlight to chloroplasts within the entire corn leaf canopy While the production environment and environment specific genetics determine the performance potential of this principle by maximizing the principles that light is basic to crop yield a solar corridor ultimately contributes to increased grain yield Written by experts who were integral in the development of solar corridor systems and providing real world examples of the methods challenges and future prospects this book will be valuable for those seeking to increase yield per acre through both primary and cover crops Introduces readers to the concept of alternative row cropping and its implementation Presents real world experience including challenges and solutions Encourages research in maximizing photosynthesis impact on crop yield **Remote Sensing Applications in Meteorology and Climatology** Robin A. Vaughan,2012-12-06 This was the fourth postgraduate summer school on remote sensing to be held in Dundee These summer schools were originated by and continue to remain in the programme of EARSel

European Association of Remote Sensing Laboratories Working Group 3 on Education and Training in Remote Sensing The first of these summer schools was held in 1980 on Remote Sensing in Meteorology Oceanography and Hydrology This was followed in 1982 by a more specialised summer school on Remote Sensing Applications in Marine Science and Technology which built on the foundation laid in 1980 and then concentrated on the marine applications of remote sensing techniques The present summer school was another follow up of the original 1980 summer school but this time concentrating on the atmospheric rather than the marine applications of remote sensing techniques The 1984 summer school had not specifically involved atmospheric and marine applications but had been involved with the use of remote sensing in the field of civil engineering This year s summer school was extremely successful First of all this was due to our sponsors for without their very significant material contributions there would have been no summer school These sponsors included the Scientific Affairs Division of NATO together with the European Association of Remote Sensing Laboratories the Council of Europe the European Space Agency the German Aerospace Establishment DFVLR and the Natural Environment Research Council
