Defending Your Faith Arturo R. Ortiz, 2023-11-29 This book presents substantial scientific archaeological and historical evidence in support of the Christian worldview The author argues Christianity is the only religion that affirms God as revealed by nature identifies the terrible predicament of mankind lost in sin provides a unique solution to the predicament and is confirmed true by miracles Classical arguments for the existence of God are presented in detail Evidence from modern astronomy reveals a cosmos that had an absolute beginning was stretched and is decaying Evidence from modern science reveals the earth is a privileged planet uniquely suited for intelligent life not by chance but by design The inadequacies of evolutionary theory are explained The author argues intelligent design and creation are superior explanations for the origin of life and the appearance of complex living organisms Ancient Assyrian chronicles and monuments provide extrabiblical evidence of Old Testament people places and events The Old Testament Law which appears harsh by our contemporary standards is amazingly merciful when examined in its ancient Near East context Archaeological evidence confirms that Israel s pagan neighbors engaged in hideous religious practices including extensive child sacrifice The evidence shows God had morally sufficient reasons to destroy the pagan Canaanite nations Historical evidence supports belief in the resurrection of Jesus Christ and in the subsequent rise of the early church The author presents evidence from both Christian and non Christian sources from the New Testament era Examination of ancient manuscripts confirms the Bible was preserved transmitted and translated accurately throughout history The author contrasts Judaism Christianity and Islam as examples of monotheistic ethical religions He argues that while all three affirm certain truths only Christianity solves mankind s predicament of being lost in sin Christian truth stands on the greatest miracle of all the resurrection of Christ and His bodily appearances confirmed by eyewitnesses

The Conquest of Space Vasil Teigens, Peter Skalfist, Daniel Mikelsten, Although its roots lie in early rocket technologies and the international tensions that followed World War II the space race began after the Soviet launch of Sputnik 1 on October 4 1957 The space race became an important part of the cultural and technological rivalry between the USSR and the United States during the Cold War Modern space exploration is reaching unbelievable areas Mars is the focal point of space exploration In the long term there are tentative plans for manned orbital and landing missions to the Moon and Mars establishing scientific outposts that will then give way to permanent and self sufficient settlements Additional exploration will potentially involve expeditions and settlements on other planets and their moons as well as the establishment of mining and fueling outposts particularly in the asteroid belt Physical exploration outside the solar system will be robotic in the foreseeable future

Intergalactic Travel and Asteroid Mining Daniel Mikelsten, Asteroid mining is the exploitation of raw materials from asteroids and other minor planets including near Earth objects Based on known terrestrial reserves and growing consumption in both developed and developing countries key elements needed for modern industry and food production could be exhausted on Earth within 50 to 60 years In response it has been suggested that platinum cobalt and other valuable elements from asteroids may be mined and sent to Earth for profit used to build solar power satellites and space habitats and water processed from ice to refuel orbiting propellant depots Looking beyond the Milky Way there are at least 2 trillion other galaxies in the observable universe Space colonization can roughly be said to be possible when the necessary methods of space colonization become cheap enough to meet the cumulative funds that have been gathered for the purpose in addition to estimated profits from commercial use of space Intergalactic travel would either have to involve voyages lasting millions of years or a possible faster than light propulsion method based on speculative physics such as the Alcubierre drive There are however no scientific reasons for stating that intergalactic travel is impossible in principle Uploaded human minds or AI may be transmitted to other galaxies in the hope some intelligence there would receive and activate them

The Art And Science Of Personal Magnetism Theron Q. Dumont, 1913 It is a strange and almost amusing fact that there should be at the same time on the part of the general public such a general acceptance of the existence of personal magnetism on the one hand and such an ignorance of the nature of this wonderful force on the other hand In short while everyone believes in the existence of personal magnetism scarcely anyone possesses knowledge of the real nature of the same much less a working knowledge of its principles of application This book gives you the key to the secret of personal magnetism but it will still remain up to you to determine just what degree of success you will attain The best tools and instructions as to how to use them are provided but you will have to do the rest yourself Success must and will be yours if you will follow the instructions carefully persistently and perseveringly

On Our Origins Daniel J. Lepley, 2013-06-03 Science and religion need not be enemies in exploration of the origin and meaning of life Each has its proper place in considering what Charles Darwin called the mystery of mysteries When properly understood scientific research and Christian theological reflection contribute to a deeper understanding of these mysteries On Our Origins explores both the scientific and scriptural narratives of creation and engages in a respectful conversation between the two Instead of rejecting faith or science it explores both in order to propose a reasonable and holistic Christian understanding of human existence Many aspects of this timely discussion will culminate in an examination of the claims of Christ Does faith in Jesus of Nazareth as Savior undermine science Or has Jesus connected humanity to the Creator in a way

that brings the spiritual and physical into harmonious relationship This is an all important mystery we seek to unravel because we will never know who we are until we come to terms with from whence we ve come In the beginning God WWW ONOURORIGINS ORG Biology Trending Eli Minkoff,Jennifer K.
