Revolution in Psychology Ian Parker, 2007-06-20 A radical methodological approach to psychology that is open to social change in an anti capitalist anti racist and feminist politics Antonio Negri Psychology is meant to help people cope with the afflictions of modern society But how useful is it Ian Parker argues that current psychological practice has become part of the problem rather than the solution Ideal for undergraduates this book deconstructs the discipline to reveal the neoliberal sensitivities that underlie its theory and practice Psychology focuses on the happiness of the individual Yet it neglects the fact that the happiness of the individual depends on their social and political surroundings Ian Parker argues that a new approach to psychology is needed He offers an alternative vision outlining how the discipline can be linked to political practice and how it can help people as part of a wider progressive agenda This groundbreaking book is at the cutting edge of current thinking

on the discipline and should be required reading on all psychology courses

The Children's Table Anna Mae Duane, 2013-06-01 This collection brings together an eclectic range of prominent scholars in architecture education history law literary criticism and cultural studies to explore how the field of childhood studies questions some of the most basic tenets of humanities scholarship and to consider how these questions can bridge disciplines Each essay pairs childhood studies with another field of inquiry to ask explicitly how foregrounding the child reorients long established scholarly foundations in that field Childhood studies insistence that we need to rethink the symbolic work of the child necessarily realigns a host of other fields that often uncritically draw upon the false dichotomy separating the vulnerable dependent child from the allegedly independent and autonomous adult By complicating our assumptions about the child we are also providing a new way of thinking through some of the most basic tenets of the humanities Anna Mae Duane notes that much of the exciting work in the humanities seeks to recover the voices of those who have been infantilized including women people of color and the GLBT community This volume features thirteen essays by leading scholars who reveal how childhood studies offers a vital methodological and theoretical roadmap for engaging issues that are among the most important and provocative in the humanities the recovery of colonized voices the definition of agency the performance of identity and the construction of gender and race to name a few Each of the essays seeks to understand how rhetorical views of childhood shape views of power politics knowledge and sociality

The Social Constructions and Experiences of Madness Monika dos Santos, Jean-Francois Pelletier, 2018-02-01 Over the course of the centuries the meanings around mental illness have shifted many times according to societal beliefs and the political atmosphere of the day. The way madness is defined has far-reaching effects on those who have a mental disorder and determines how they are treated by the professionals responsible for their care and the society of which they are a part. Although madness as mental illness seems to be the dominant Western view of madness, it is by no means the only view of what it means to be mad. The symptoms of madness or mental illness occur in all cultures of the world but have different meanings in different social and cultural contexts. Evidence suggests that meanings of mental illness have a significant impact on subjective experience, the idioms used in the expression thereof, indigenous treatments, and subsequent outcomes. Thus the societal understandings of madness are central to the problem of mental illness, and those with the lived experience can lead the process of reconstructing this meaning.

On Becoming a Psychotherapist explores these and related questions. Ten leading therapists write about their profession and their careers, examining how and why they became psychotherapists. The contributors, representing a wide cross-section of their profession, come from both Britain and America, from different theoretical backgrounds, and are at different stages in their careers.
