Radio Emission of the Sun and Planets V. V. Zheleznyakov, 2013-09-03 International Series of Monographs in Natural Philosophy Volume 25 Radio Emission of the Sun and Planets presents the origin of the radio emission of the planets This book examines the outstanding triumphs achieved by radio astronomy of the solar system Comprised of 10 chapters this volume begins with an overview of the physical conditions in the upper layers of the Sun the Moon and the planets This text then examines the three characteristics of radio emission namely the frequency spectrum the polarization and the angular spectrum Other chapters consider the measurements of the intensity of the solar radio emission which indicate the existence of a lower limit This book discusses as well the complex phenomena of the sporadic solar radio emission The final chapter deals with the theory of the radio emission of Venus This monograph is a valuable resource for radio astronomers and astrophysicists who are interested in the state of investigations in galactic radio astronomy **Radio and Radar**

Astronomy Projects for Beginners Steven Arnold, 2020-10-22 Radio and radar astronomy are powerful tools when studying the wonders of the universe yet they tend to mystify amateur astronomers This book provides a comprehensive introduction to newcomers containing everything you need to start observing at radio wavelengths Written by a mechanical engineer who has actually built and operated the tools described the book contains a plethora of tested advice and practical resources This revised edition of the original 2014 book Getting Started in Radio Astronomy provides a complete overview of the latest technology and research including the newest models and equipment on the market as well as an entirely new section on radio astronomy with software defined radios SDRs Four brand new beginner projects are included including bouncing a radar signal off the Moon detecting the aurora and tuning into the downlink radio used by astronauts aboard the ISS Requiring no previous knowledge no scary mathematics and no expensive equipment the book will serve as a fun and digestible reference for any level of astronomers hoping to expand their skills into the radio spectrum **Radio News**, 1927
