Tanvir, 1997 Since the successful refurbishment mission the Hubble Space Telescope has made dramatic and exciting progress in unravelling the nature of sources at high redshift The upcoming installation of the next generation of instruments will give further impetus to the field particularly in the infrared spectral region The proceedings of this landmark meeting review the results of the first three years of post repair data including the deepest astronomical images ever obtained the Hubble Deep Field This was the first presentation of these exciting results at a major international conference The interface between HST and ground based facilities and planned programmes with forthcoming HST instruments are also extensively discussed Publisher's website

Cold Gas at High Redshift M.N. Bremer, P.P. van der Werf, H.J.A. Röttgering, C.L. Carilli, 2012-12-06 Recent years have seen increasing evidence that the main epoch of galaxy formation in the universe may be directly accessible to observation Angular fluctuations in the background relic radiation have been detected by various ground based instruments as well as by the COBE satellite and suggest that the epoch of galaxy formation was not so very early Combined optical and radio studies have found galaxies at redshifts above 2.0 systems that at least superficially show the characteristics expected of large galaxies seen only shortly after their formation And absorption lines in the spectra of quasars seem to be telling us that most cold gas at early to intermediate cosmological epochs was in clouds having roughly galaxy sized masses What kinds of new observations will best help us study this high redshift universe in future What new instruments will be needed These are questions that loom large in the minds of the Dutch astronomical community as we celebrate 25 years of operation of the Westerbork Synthesis Radio Telescope Celebration of this Silver Jubilee has included a birthday party on 23 June 1995 a commemorative volume looking at both the history and the future of the facility The Westerbork Observatory Continuing Adventure in Radio Astronomy Kluwer 1996 and an international workshop held in the village of Hoogeveen on 28-30 August 1995 Literature 1985, Part 1 S.
