

# RADIATION CONTAMINATION VERSUS EXPOSURE

## EXTERNAL CONTAMINATION

External contamination occurs when radioactive material comes into contact with a person's skin, hair, or clothing.

## INTERNAL CONTAMINATION

Internal contamination can occur when radioactive material is swallowed or breathed in.

Internal contamination can also occur when radioactive material enters the body through an open wound.

Different radioactive materials can accumulate in different body organs.

## RADIATION EXPOSURE

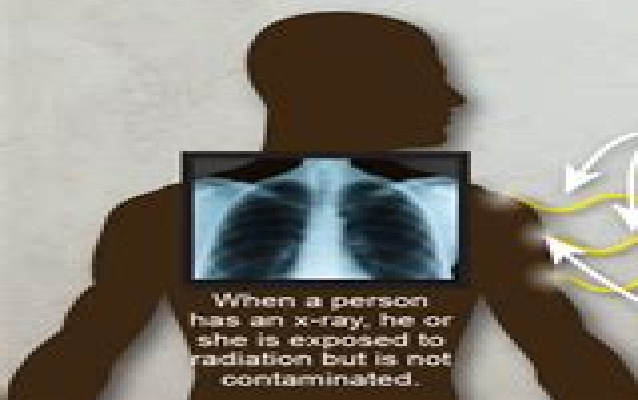

Another word for radiation exposure is irradiation.

Radioactive materials give off a form of energy that travels in waves or particles.

When a person is exposed to certain types of radiation, the energy may penetrate the body.

A person exposed to radiation is not necessarily contaminated with radioactive material.

For a person to be contaminated, radioactive material must be on or inside of his or her body.

Wilson, 2012-12-06 Mankind has created pollution and has suffered its consequences since time immemorial This has intensified greatly since the industrial revolution One of the main problems in society and a major function of government is how to cope with this pollution 80 years ago the maxim used to be the solution to pollution is dilution to dilute any polluted water supply in a large river or to build a tall chimney stack to dilute air pollutants into the air so that concentrations of pollutants are always low Since 1950 western countries have gone further and made major attempts to reduce the emissions of the most important pollutants The discussion of what is an important pollutant has changed To SO<sub>2</sub> and heavy metals such as cadmium or arsenic we now add fine particles and even when we discuss global climate change CO<sub>2</sub> The experience and practice of the western countries was only partly followed in the USSR although the switch from use of coal to natural gas in major cities around 1970 was very important Since the collapse of the USSR it has become fashionable both in the west and inside Russia to blame all society's ills on pollution The statistics do not bear out that conclusion but pollution remains an important issue which can be reduced without significant detriment to other societal values      Radiological Contamination in the United States United States.
