Radius Image Understanding For Imagery Intelligence:

RADIUS Oscar Firschein, Thomas M. Strat, 1997-05 Technical reports prepared for the DARPA Image Understanding Program
Image Understanding Workshop, 1998
Geomatic Methods for the Analysis of Data in the Earth Sciences Athanasios Dermanis, Armin Grün, Fernando Sansò, 2008-01-26 Geomatics is an amalgam of methods algorithms and practices in handling data referred to the Earth by informatic tools This book is an attempt to identify and rationally organize the statistical mathematical methods which are common in many fields where geomatics is applied like geodesy geophysics and in particular the field of inverse problems and image analysis as it enters into photogrammetry and remote sensing These lecture notes aim at creating a bridge between people working in different disciplines and making them aware of a common methodological basis
Image Recognition and Classification Bahram Javidi, 2002-06-14 Details the latest image processing algorithms and imaging systems for image recognition with diverse applications to the military the transportation aerospace information security and biomedical industries radar systems and image tracking systems

Toward Category-Level Object Recognition Jean Ponce, Martial Hebert, Cordelia Schmid, Andrew Zisserman, 2007-01-25 This volume is a post event proceedings volume and contains selected papers based on presentations given and vivid discussions held during two workshops held in Taormina in 2003 and 2004 The 30 thoroughly revised papers presented are organized in the following topical sections recognition of specific objects recognition of object categories recognition of object categories with geometric relations and joint recognition and segmentation
Machine Vision and Advanced Image Processing in Remote Sensing Ioannis Kanellopoulos, Graeme G. Wilkinson, Theo Moons, 2012-12-06 Since 1994 the European Commission has undertaken various actions to expand the use of Earth observation EO from space in the Union and to stimulate value added services based on the use of Earth observation satellite data By supporting research and technological development activities in this area DG XII responded to the need to increase the cost effectiveness of space derived environmental information At the same time it has contributed to a better exploitation of this unique technology which is a key source of data for environmental monitoring from local to global scale MAVIRIC is part of the investment made in the context of the Environment and Climate Programme 1994 1998 to strengthen applied techniques based on a better understanding of the link between the remote sensing signal and the underlying bio geo physical processes Translation of this scientific know how into practical algorithms or methods is a priority in order to convert more quickly effectively and accurately space signals into geographical information Now the availability of high spatial resolution satellite data is rapidly evolving and the fusion of data from different sensors including radar sensors is progressing well the question arises whether existing machine vision approaches could be advantageously used by the remote sensing community Automatic feature object extraction from remotely sensed images looks very attractive in terms of processing time standardisation and implementation of operational processing chains but it remains highly complex when applied to natural
