Crossings Stephen C. Jett, 2017-06-06 Paints a compelling picture of impressive pre Columbian cultures and Old World civilizations that contrary to many prevailing notions were not isolated from one another In *Ancient Ocean Crossings* Reconsidering the Case for Contacts with the Pre Columbian Americas Stephen Jett encourages readers to reevaluate the common belief that there was no significant interchange between the chiefdoms and civilizations of Eurasia and Africa and peoples who occupied the alleged terra incognita beyond the great oceans More than a hundred centuries separate the time that Ice Age hunters are conventionally thought to have crossed a land bridge from Asia into North America and the arrival of Columbus in the Bahamas in 1492 Traditional belief has long held that earth's two hemispheres were essentially cut off from one another as a result of the post Pleistocene meltwater fed rising oceans that covered that bridge The oceans along with arctic climates and daunting terrestrial distances formed impermeable barriers to interhemispheric communication This viewpoint implies that the cultures of the Old World and those of the Americas developed independently Drawing on abundant and concrete evidence to support his theory for significant pre Columbian contacts Jett suggests that many ancient peoples had both the seafaring capabilities and the motives to cross the oceans and in fact did so repeatedly and with great impact His deep and broad work synthesizes information and ideas from archaeology geography linguistics climatology oceanography ethnobotany genetics medicine and the history of navigation and seafaring making an innovative and persuasive multidisciplinary case for a new understanding of human societies and their diffuse but interconnected development

On the Spanish Main Or, Some English Forays on the Isthmus of Darien, with a Description of the Buccaneers and a Short Account of Old Time Ships and Sailors John Masefield, 1925 [From Raft to Raft](#) Bengt Danielsson, 2013-06-01 Not since the fantastic story of the Kon Tiki expedition has there appeared such an exciting saga of a primitive raft expedition across the Pacific for scientific investigation *From Raft to Raft* tells the incredible suspenseful drama of the dangerous voyage led by Eric de Bisschop from Tahiti to Chile and back to Polynesia a foray twice as long as that undertaken by Kon Tiki and one that encountered infinitely greater difficulties and dangers Like Heyerdahl de Bisschop undertook his voyage to prove an ethnological theory but a theory completely contrary to that of his Norwegian forerunner Heyerdahl believed that voyagers from South America had visited Polynesia in prehistoric times de Bisschop was equally certain that Tahitian sea rovers had traveled as far as Chile and Peru After suffering unbelievable hardships during the first half of the voyage two members of the Tahiti Nui crew abandoned the project but de Bisschop and Alain Brun who narrated the story to Bengt Danielsson continued on their journey spending thirteen months aboard the most primitive rafts But despite the inadequacy of their crafts all of which had a frightening tendency to break up coupled with the dangers of attacking sharks mutiny by one of the crew raging storms and near starvation the Tahiti Nui voyage was completed in record time but not before a series of dramatic events occurred that were to culminate in tragic death *Radar and the Raft* Jeff Lantos, 2024-09-24 This science history nonfiction adventure mash up will be on every middle grade reader's radar Who knew

that an improbable rescue during WWII would be facilitated by scientific discoveries in the 18th century Expert researcher and educator Jeff Lantos makes the history science connection between batteries and radar and one oceanic adventure in this engaging middle grade escapade told in two intertwining storylines Readers are first invited to follow scientific discoveries in the 1700s that eventually lead to the creation of radar and are then immersed in a world where World War II rages German U boats sink ships and the ship just hit has an American mom and her two young kids aboard Now Ethel Robert and Mary Bell are on a raft with fourteen other people floating in the ocean and hoping for rescue Lantos expertly weaves radar s story of discovery with the Bell family s harrowing journey bringing readers on an exciting fast paced adventure through history A rare and exhilarating mix of hard science and seagoing terror Kirkus Reviews starred review *The Man in the Yellow Raft* C.S. Forester,2012-02-08 A nostalgic and compelling collection of stories about an American destroyer and the men who served on her during WW II A brilliant display of the author s special love of the sea and his impressive knowledge of seamanship and advanced naval warfare Professional Paper ,1942 **Island** Dr. James Lazell,2005-11-01 Guana in the British Virgin Islands is home to a remarkably diverse assortment of animal and plant life mangroves flamingos iguanas frogs birds snakes spiders tortoises grasshoppers and bats to name but a few What is so surprising about Guana s astonishing panoply is that according to prevailing ecological theories the island s diversity should be much lower than it actually is This provocative book describes Guana s flora and fauna against the backdrop of islands worldwide and their ecology evolution and conservation Much more than a book about one island it raises important challenges to prevailing dogma of island biogeography and theoretical ecology James Skip Lazell demonstrates that meaningful conservation and avoiding tragic loss of biodiversity demand we know far more about biological interactions physiographic and geological structure meteorology and other factors He presents compelling evidence that high levels of natural biodiversity underpin ecosystem resilience and stability Lazell s engaging narrative containing many entertaining asides and personal reflections widens into an evocative commentary about the nature of life on earth **The Life and Most Surprising Adventures of Robinson Crusoe, of York, Mariner, who Lived Eight-and-twenty Years in an Uninhabited Island, on the Coast of America, Near the Mouth of the Great River Oronooko. were introduced and their ecological and socio economic impact if any on the native biota and local economies Many species have had a more or less neutral impact being neither beneficial nor harmful However several have had a positive ecological or socio economic impact while some such as the cane toad have had an extremely destructive effect The criteria for inclusion of a species are that it should have been imported from its natural range to a new country by human agency either accidentally or deliberately and that it should currently be established in the wild in self maintaining and self perpetuating populations unsupported by and independent of mankind
