Not My Kid Sinikka Elliott, 2012-08-13 Teenagers have sex While almost all parents understand that many teenagers are sexually active there is a paradox in many parents thinking they insist their own teen children are not sexual but characterize their children's peers as sexually driven and hypersexual Rather than accuse parents of being in denial Sinikka Elliott teases out the complex dynamics behind this thinking

demonstrating that it is rooted in fears and anxieties about being a good parent the risks of teen sexual activity and teenagers future economic and social status Parents like most Americans equate teen sexuality with heartache disease pregnancy promiscuity and deviance and want their teen children to be protected from these things Going beyond the hype and controversy Elliott examines how a diverse group of American parents of teenagers understand teen sexuality showing that in contrast to the idea that parents are polarized in their beliefs parents are confused anxious and ambivalent about teen sexual activity and how best to guide their own children s sexuality Framed with an eye to the debates about teenage abstinence and sex education in school Elliott also links parents understandings to the contradictory messages and broad moral panic around child and teen sexuality Ultimately Elliott considers the social and cultural conditions that might make it easier for parents to talk with their teens about sex calling for new ways of thinking and talking about teen sexuality that promote social justice and empower parents to embrace their children as fully sexual subjects **May Contain Nuts**
