Railroads And Trains:

Trains and Railroads Sydney Herbert Wood, 1998 Examines the kinds and uses of trains past and present and speculates about the railroads of the future **Trains and Technology: Track and structures** Anthony J. Bianculli, 2001 **Train Time** John R. Stilgoe, 2009-02-05 Unlike many United States industries railroads are intrinsically linked to American soil and particular regions Yet few Americans pay attention to rail lines even though millions of them live in an economy and culture waiting for the train In *Train Time* Railroads and the Imminent Reshaping of the United States Landscape John R Stilgoe picks up where his acclaimed work *Metropolitan Corridor* left off carrying his ideas about the spatial consequences of railways up to the present moment Arguing that the train is returning an economic and cultural tsunami about to transform the United States Stilgoe posits a future for railways as powerful shapers of American life Divided into sections that focus on particular aspects of the impending impact of railroads on the landscape *Train Time* moves seamlessly between historical and contemporary analysis From his reading of what prompted investors to reorient their thinking about the railroad industry in the late 1970s to his exploration of creative solutions to transportation problems and land use planning and development in the present Stilgoe expands our perspective of an industry normally associated with bad news Urging us that the magic moment is now he observes Now a train is often only a whistle heard far off on a sleepless night But romantic or foreboding or empowering the whistle announces return and change to those who listen For scholars with an interest in American history in general and railroad and transit history in particular as well as general readers concerned about the future of transportation in the United States *Train Time* is an engaging look at the future of our railroads *Trains to Victory* Donald J. Heimbürger, John Kelly, 2009-07-01 *Trains to Victory* tells the dramatic story of the years 1941-1945 when U S railroads using fewer cars and locomotives than in WWI moved more tonnage and more passengers than ever before Divided into 13 chapters plus a 32 page four color section an introduction bibliography and a complete index the volume appeals to railfans historians military historians and many others The 380 page hardbound book features 542 photographs an additional 285 illustrations a four color laminated dustjacket and a complete listing of U S military camps posts and bases as of August 1 1941 The book discusses the implications of the war on the railroads embarkation of troops and materiel how the Military Railway Service joined the fight and what was happening on U S railroads during the war It also addresses new railroad cars and locomotives built for the war military camp railroads how Alaska's railroads played a part in the conflict how women helped the war effort and what was happening in foreign theaters It describes how railroads aided in the return of wounded troops and equipment and the atmosphere on the railroads immediately after the war Scale drawings of war emergency box cars are also included as are troop train car plans *Trains to Victory* covers such topics as the huge Chicago NorthWestern Proviso Yards during wartime personal glimpses of the war from a number of railroaders and intriguing aspects of the war from the Army Engineers Association of American Railroads and the War Department Wartime products of locomotive and

railroad car manufacturers such as Baldwin Alco Davenport Lima Whitcomb Budd Electro Motive H K Porter Pullman American Car Foundry and the St Louis Car Company are documented throughout the volume Hardbound 8 x11 380 pages 825 photos and illustrations 32 page all color photo section 13 chapters extensive historical military railroad documentation
