This is ours Try to find it Contemporary literature and investigative journalism are showing that the scale of the problem of tax evasion money laundering organised crime terrorism bribery corruption and gross human rights abuses is vast Ownership specifically the quest to identify beneficial owners has been chosen by national and international regulators as the touchstone the litmus test in the fight back An owner by definition must possess something for which they are financially accountable But what is meant by ownership This book explains why ownership is pivotal to accountability and what ownership means in common law civil law and Shariah law terms It looks in detail at State regional and international transparency strategies and at an equally powerful global private counter initiative to promote beneficial ownership avoidance through the use of so called orphan structures Where there is no owner there is no accountability The distinction between privacy and legitimate confidentiality on the one hand and concealment on the other is explained with reference to commercial and trade law and practice principles of corporate governance and applicable business human rights This book introduces one further counter initiative the phenomenon of transient ownership made possible through the use of cryptocurrency and the blockchain The study concludes with a blueprint for action with recommendations addressed to states international organisations practitioners and other stakeholders

knowledge since the time of the ancient Greeks Through adventure stories and historical narratives populated with a rich and quirky cast of characters Mazur artfully reveals the less than airtight nature of logic and the muddled relationship between math and the real world Ultimately Mazur argues logical reasoning is not purely robotic At its most basic level it is a creative process guided by our intuitions and beliefs about the world

**Tax Havens and International Human Rights** Paul Beckett, 2017-10-02 This book sails in uncharted waters It takes a human rights based approach to tax havens and is a detailed analysis of structures and the laws that generate and support these It makes plain the unscrupulous or merely indifferent ways in which using tax havens businesses and individuals systematically undermine and for all practical purposes eliminate access to remedies under international human rights law It exposes as abusive of human rights a complex structural web of trusts companies partnerships foundations nominees and fiduciaries secrecy immunity and smoke screens It also lays bare the cynical manipulation by tax havens of traditional legal forms and conventions and the creation of entities so bizarre and chimeric that they defy classification Yet from the perspective of the tax havens themselves these are entirely legitimate the product of duly enacted domestic laws This book is not a work of investigative journalism in the style of the Pulitzer Prize winning authors of The Panama Papers exposing political or financial corruption money laundering or the financing of terrorism All those elements are present of course but the focus is on international human rights and how tax havens do not merely facilitate but actively connive at their breach The tax havens are compromising the international human rights legal continuum
