The Humanists versus the Reactionary Avant Garde Charles Siegel, 2016-02-09 Modernist architects were part of a larger social movement that believed technology would bring a better future Today we can see that we need to make selective use of technology using technologies that are beneficial and controlling those that are destructive Beginning in the 1970s postmodern architects were part of a larger social movement to use technology for human purposes But today s avant gardists have rejected this humanist impulse and regressed to the modernist fascination with technology for its own sake even if their designs are cold and sterile and even if their designs are so antihuman that they make people feel sick The avant gardists are conservatives celebrating the status quo of our technological economy Neotraditional architects are the real progressives trying to humanize our economy With its new view of the history of architecture its hilarious examples of antihuman avant gardist designs and its inspiring examples of designs that learn from traditional models this book will convince you that the emperors of today s architecture have no clothes Among the books on this topic that I have read yours is by far the most sophisticated and the most up to date Andres Duany principal of DPZ Partners Siegel makes a clear and intelligent case based not on romantic nostalgia but on the pressing issues of contemporary society I recommend this book in the strongest possible terms Prof Nikos Salingaros author of A Theory of Architecture

Sprawling Places David Kolb, 2010-01-25 People often bemoan the spread of malls suburban strips subdivisions and other sprawling places in contemporary America But are these places as bad as critics claim In *Sprawling Places* David Kolb questions widely held assumptions about our built environments Kolb agrees there is a lot not to like about many contemporary places but to write them off simply as commodified nonplaces does not treat them critically Too often Kolb says aesthetic character and urban authenticity are the focus of critics when it is more important to understand a place s complexity and connectedness Kolb acknowledges that the places around us increasingly have banal exteriors yet they can be complex and can encourage their inhabitants to use them in multiple nonlinear ways Ultimately Kolb believes human activity within a place is what defines it Even our most idealized classical places he shows change over the course of history when subjected to new linkages and different flows of activity Engaging with the work of such writers and critics as Henri Lefebvre Manuel Castells Karsten Harries and Christian Norberg Schulz Kolb seeks to move discussions about sprawl away from the idea that we must choose between being rooted in the local Black Forest soil or wandering in directionless space By increasing our awareness of complexity and other issues Kolb hopes to broaden and

deepen people's thinking about the contemporary built environment and to encourage better designs in the future
