*Regional Mechanisms and International Security in Latin America* Olga Pellicer de Brody, 1998 A great diversity of points of view on international security one of the most current subjects in the area of international relations coexist in Latin America and the Caribbean This region is immersed in an interesting debate in which reticence and enthusiasm coexist and confront themselves in order to enlarge the functions of regional mechanisms of security or to evaluate experiences acquired either through UN action or recent tendencies of the Security Council The center of debate is also found in the impossible to ignore role of the United States Does the end of the Cold War modify the U S interests in Latin America in the field of security Should existing mechanisms of collective security in the region be strengthened Or should new alternatives be found How far is a shared agenda for security not only with the United States but also between the countries in Latin America itself and among them and the Caribbean possible or desirable How acceptable are the new tendencies of the multilateral organizations in the field of security of the countries in the region These are some of the questions that this book deals with from different points of view It presents a new perspective on the contemporary debate over international security in Latin America and the Caribbean Routledge Handbook of Latin American Security David R. security to current debates about the global power structure the authors unfold a distinctive interpretation of post Cold War international security avoiding both the extreme oversimplifications of the unipolar view and the extreme deterritorialisations of many globalist visions of a new world disorder Their framework brings out the radical diversity of security dynamics in different parts of the world

**Environmental Security in Latin America** Gavin O'Toole, 2017-05-18 This book examines security in Latin America through an environmental lens at a time when this region faces a broad and growing spectrum of threats The book considers the backdrop against which security debates about Latin America have been conducted the extent to which scholarship has been dominated by traditional US strategic concerns and how in the changing context at the end of the Cold War some policymakers within Latin America itself at both national and regional levels began to reposition security It argues that traditional security scholarship focusing on military defence and strategic affairs in this region is hard to explain and out of date and offers reasons why a new focus on environmental threats within a broader human security perspective has much to offer this field Such a focus is justified by the scale of the challenges that environmental degradation is posing in Latin America and the very real impact of climate change there The book considers how the various theoretical possibilities of the term environmental security all have some potential application to this region where the natural environment is rapidly being securitized by military forces on behalf of their states Finally it proposes that a fruitful approach to Latin America might be one where human and environmental security have parity This book will be of interest to students of environmental security Latin American security human geography and IR in general

**Regional Organisations and Security** Stephen Aris, Andreas Wenger, 2013-10-30 This book aims to examine the conceptions and practices of security adopted by Regional Organisations ROs across the globe Since the end of the Cold War there has been an increased focus on regions as a relevant realm for security with actors within regional contexts identifying a significant degree of interdependency between one another As a consequence international security has taken on a distinct regionally institutionalised character as seen by the increase in calls for greater utilisation of Chapter VIII Regional Arrangements of the UN in order to create a devolved UN led system of global security management However the idea of a system of global security management is a remote prospect because divergence seems to be as important as commonality in terms of regional security In light of the above Regional Organisations and Security analyses the primary ROs that are active in Africa Asia Eurasia the Middle East and South America The findings of individual case studies are compiled to highlight disparities and similarities in how security is seen prioritised understood practised managed and implemented across regions On this basis the authors reach conclusions about whether we live in an increasingly globalised or regionally distinct world and go on to assess the prospects for a globalised system of security management and consider how this might be developed and organised This book will be of interest to students of comparative regionalism international organisations international security and IR

*Addicted to Failure* Brian Loveman, 2006 For supplementary documentation and useful websites click here This perceptive book critically explores why the United States continues to pursue failed policies in Latin America What elements of the U S and Latin American political systems have allowed the Cold War the war on drugs and the war on terror to be conflated Why do U S policies ostensibly designed to promote the rule of law human rights and democracy instead contribute to widespread corruption erosion of government authority human rights violations and increasing destabilization Why have the war on drugs and the war on terror neither reduced narcotics trafficking nor increased citizen security in Latin America Why do Latin American governments the European Union and U S policymakers often work at cross purposes when they all claim to be committed to democratization and development in the region Leading scholars answer these questions by detailing the nature of U S economic and security strategies in Latin America and the Andean region since 1990 They analyze the impacts and responses to these strategies by policymakers political leaders and social movements throughout the region explaining how programs often generate or exacerbate the very problems they were intended to solve Reviewing official policy and its defenders and critics alike this indispensable book focuses on the reasons for the failure of U S policies and their disastrous significance for Latin America and the United States alike Contributions by Adri n Bonilla Pilar Gait n Monica Herz Kenneth Lehman Brian Loveman Enrique Obando Orlando J P rez Eduardo Pizarro Philipp Sch nrock Mart nez and Juan Gabriel Tokatlian

[The Rise of Post-Hegemonic Regionalism](#) Pía Riggirozzi, Diana
