Regional Restructuring Under Apartheid Urban And Regional Policies In Contemporary South Africa:

Contemporary South Africa and the Political Economy of Regional Development Methembe Mdlalose, Isaac Khambule, Nene Ernest Khalema, 2025-02-21 South Africa's struggle in balancing its domestic needs while playing a dynamic developmental role in the African region and global context exposes a complex web of relations shaped by its geostrategic location on the continent and the world and the staggering legacies of colonialism and apartheid. As such, understanding the complexities of the global economy and of South Africa's place in it is of great importance. This book builds upon an existing body of literature which has demonstrated that while the post-apartheid South African state has recast its nation-building goals with advances having been made notably in the area of a stellar post-apartheid constitution, policy directives and democratic political integration, economic integration and policy implementation presents a projection of captured interests where big business concerns are entrenched in the post-apartheid state's apparent neo-liberal turn. The main focus of the book is to contextualise issues relating to three main trends in global discourses on development which are significant for South Africa and indeed for the study of the political economy of regional development in the country from the prism of South Africa as a global capitalist state. These trends include the impact of globalisation, regionalisation and the marginalisation of South Africa and indeed the African continent in the global economy, thus unpacking the possible role that South Africa might play in regional development. This volume will be a valuable resource to academics, researchers and students in the fields of regional studies, economics and political theory as well as policymakers, planners and local economic development practitioners.

Regional and Local Economic Development in South Africa Etienne Louis Nel, 2019-07-23 First published in 1999, this volume responds to the recent application of Local Economic Development around the world and examines its impact in South Africa in the wake of the nation's recent political transition. Etienne Louis Nel observes how the initiative is taking on a dual form of community-led and authority-led initiatives. Nel explores the issue through areas including South Africa's space economy, a case study of Stuttenheim and local economic development in East London.

South African Urban Change Three Decades After Apartheid Anthony Lemon, Ronnie Donaldson, Gustav Visser, 2021-06-10 This book provides an analysis of South African urban change over the past three decades. It draws on a seminal text, *Homes Apart*, and revisits conclusions drawn in that collection that marked the final phases of urban apartheid. It highlights changes in demography, social as well as economic structure and their differential spatial expression across a range of urban sites in South Africa. The evidence presented in this book points to a very complex set of narratives in urban South Africa and one that cannot be reduced to a singular statement, so the conclusions of the various investigations are in many ways open. As urban apartheid represented one clear outcome, its post-apartheid urban legacies varies greatly from city to city. As such, this book is a great resource to students and academics focused on urban change in South African cities since the demise of apartheid and scholars of urban policy making in South

Razavi,R. Pearson,C. Danloy,2004-04-30 Gender and development theory and analysis is replete with implicit assumptions that women s entry into the world of paid work will positively affect their status both in the household and in the public sphere Until recently the debate on global factories and export production has remained focused on women s individual experience of export employment and the extent to which this represents a positive opportunity or gross exploitation In spite of the extended discussion of rights and citizenship in the global economy little attention has hitherto been paid to the implications for women s entitlements arising out of their pivotal role in export sectors Whilst many assume that women s visible and crucial presence in key economic sectors will be reflected in the ways in which social policies are formulated there has been up to now little empirical and analytical engagement with this question This volume bringing together detailed commissioned studies from six developing countries aims to fill this gap **The Oxford Handbook of the South African Economy** Arkebe Oqubay,Fiona Tregenna,Imraan Valodia,2021-11-18 While sharing some characteristics with other middle income countries South Africa is a country with a unique economic history and distinctive economic features It is a regional economic powerhouse that plays a significant role not only in southern Africa and in the continent but also as a member of BRICS However there has been a lack of structural transformation and weak economic growth and South Africa faces the profound triple challenges of poverty inequality and unemployment Any meaningful debate about economic policies to

address these challenges needs to be informed by a deep understanding of historical developments robust empirical evidence and rigorous analysis of South Africa s complex economic landscape This volume seeks to provide a wide ranging set of original detailed and state of the art analytical perspectives that contribute to scientific knowledge as well as to well informed and productive discourse on the South African economy While concentrating on the more recent economic issues facing South Africa the handbook also provides historical and political context It offers an in depth examination of strategic issues in the country s key economic sectors and brings together diverse analytical perspectives **Equilibrium versus**
