Re-framing Regional Development Philip Cooke,2013-01-17 Turbulence characterises the current global scene This book uses complementary theoretical approaches to understand and help prescribe policies to re frame the regional development problem in turbulent times These approaches are evolutionary complexity evolutionary economic geography emergence theory and resilience theory From below they address the four major crises creating a perfect storm for societies and economics involving the climate change crisis the energy crisis the banking and financial crisis and the global economic crisis This book analyses and proposes ways in which regional economies in particular are having to be reframed to address these crises First many must evolve in new ways possibly moving back from the service economy towards a new greener form of manufacturing of goods as well as services Accordingly regional economies are innovating in new ways Amongst these are the quest for relatedness within their own regional orbits and promoting modularity as a mode of analysis and a policy stance to stimulate innovation across industry and geographical borders Finally regional economies and societies are discovering that from a resilience perspective they must find answers to the higher levels of governance with which they increasingly struggle In this respect regional economies are in transition and regional processes are emergent The transition seeks to address the four crises involving re balancing re directing and re framing future policy and practice This book describes many of the novel framings involved in understanding the new ways in which this major task is being addressed in theory policy and everyday practice Regional Development and Settlement Policy David Dewar,Alison Todes,Vanessa Watson,2017-09-05 Originally published in 1986 This book focusses on a critical analysis of regional development strategy in South Africa and shifts over time in that strategy Regional development theory and thinking about settlement policy have developed largely independently of each other This book clarifies some of the resulting confusion and points towards a greater integration of the two areas of understanding The book provides an overview of shifts which occurred in national and regional development theory and the broader social economic and political factors which influenced these shifts It identifies the major policy implications of the various development approaches with particular emphasis placed on the role of

settlement policy The differences between policy approaches and the debates surrounding them are identified and discussed
