Place, Productivity, and Prosperity Arti Grover, Somik Lall, William Maloney, 2022-03-01 Place matters for productivity and prosperity Myriad factors support a successful place including not only the hard infrastructure such as roads but also the softer elements such as worker skills entrepreneurial

ability and well functioning institutions History suggests that prosperous places tend to persist while left behind regions or those hurt by climatic technological or commercial shocks struggle to catch up This division gives rise to demands to do something about the subsequent spatial inequality Such pressures often result in costly spatially targeted policies with disappointing outcomes because of a lack of analysis of the underlying barriers to growth and structural transformation and a fair appraisal of the possibility of overcoming them The latest volume of the World Bank Productivity Project series Place Productivity and Prosperity Revisiting Spatially Targeted Policies for Regional Development makes three broad contributions First it provides new analytical and empirical insights into the three drivers of economic geography agglomeration economies migration and distance and the way in which these drivers interact Second it argues that these forces are playing out differently in developing countries than they have in advanced economies urbanization is not accompanied by structural transformation leaving cities crowded and accruing all the negative aspects of urbanization without being concentrated productively Long term amelioration of poverty in lagging regions requires advancing the overall national agenda of structural change and productivity growth Third it provides a heuristic framework with which to inform policy makers assessments of place based policy proposals helping them identify the regions where policy is likely to have an impact and those that would remain nonviable The framework enables governments to clarify the implications of various policy options to think critically about design priorities including necessary complementary policies and to navigate the implementation challenges This is an extremely welcome book Three experts lay out the principles behind spatially targeted policy and the experience of countries using such policies A must read for anyone interested in spatial inequality and policy to address it Anthony J Venables Professor of Economics University of Manchester and Research Director The Productivity Institute Delivering better livelihoods for all requires tapping into the economic potential of every place including those losing out or lagging behind This however cannot be done effectively without a sound theoretical and empirical framework Place Productivity and Prosperity is the right book to look for such a framework Andr s Rodr guez Pose Princesa de Asturias Chair and Professor of Economic Geography London School of Economics Sustainable Regional Development Vinita Yadav, 2020-03-18 Region encompasses of inter dependent urban and rural areas The rural areas supply perishable items to urban areas and from urban areas migrants send remittances back to their homes in rural areas In India where 68.85 percent of the population resided in rural area in 2011 the balanced regional development is required to achieve uniform and equitable distribution of resources Of late most of the Government s planning related efforts and associated development are more in cities being largest contributor to Gross Domestic Product GDP than rural areas Higher investment in cities as compared to rural areas contradicts the basic premise of a balanced regional development Though region received recognition through 73 and 74 Constitutional Amendment Act yet regional planning is still amiss As the population is increasing at a faster rate one has to design the space in a sustainable manner The development by means of infrastructure

or governance shall have the futuristic approach The book intends to create knowledge about the significance of regional planning Using case study approach thirteen chapters by contributing authors provides an in depth understanding of both theoretical and practical aspects related to the concepts of regionalization agglomeration economies contract farming industrialization corridor development and heritage based development In the book highly acclaimed professionals presents microscopic view of planning of varied type of regions and suggest ways to avoid the excess and misuse of resources which will dwindle the quintessence of future development The book provides a one stop answer to the quest of university students government officials researchers officials from non Government and private organisations to comprehend the concept of region contextualize its importance as a viable unit of planning to resolve prevalent issues keeping in mind futuristic outlook of regional development The editor establishes the importance of region as a viable unit of planning emphasizes upon the need for contextualising the issues existing in the region and accentuates that Government s effort at national and state levels should be towards holistic planning of a region

**Identity, Policy, and Prosperity** Jeongwon Bourdais Park,2017-08-11 This book offers a rare glimpse into China s Korean minority which dominates the area bordering North Korea even as Korea is riven into capitalist and communist societies China s Koreans register this dilemma as one internal to the society they live in in China s postindustrial Northeast As this research makes clear once driven by state investment in industry the Northeast is now struggling to define its identity as a post industrial region the ethnic Koreans there even more so This monograph provides a distinctive look at a group shaped by political turmoil economic transformation and cultural struggle the study may offer an idea of what the future of the Korean peninsula itself might be disentangling the puzzling contradictions and synergies between nationality locality and development in China
