Library, 1969 Environmental Management in China Jing Wu, I-Shin Chang, 2020-05-22 This book details various stages in the introduction establishment and evolution of China's environmental management system By combining a literature review comparative analysis and case study it investigates the environmental management system in several key periods in order to systematically assess the necessary measures and appropriate adjustments the Chinese Government implemented to reconcile the growing conflicts between economic development and resources conservation in the context of rapid economic growth and economic transformation Given its scope the book offers a valuable resource for experts scholars and government officials in related fields □□□□□□ □□□□□□ (Japan), 1978 *Monthly Catalog of United States Government Publications*, 1976 Monthly Catalogue, United States Public Documents, 1992 **Maritime Regime Building** Mark J. Valencia, 2021-10-18 The past few decades have witnessed the emergence of a vast array of regional arrangements and institutions dealing with all aspects of ocean management The level of cooperation ranges from minimal dispute avoidance to relatively comprehensive ocean governance at the regional level As concrete examples reasonably successful and comprehensive regional regimes have been created for the Baltic the North and the Mediterranean Seas and the South Pacific And attempts at regional regime building are ongoing in Southeast Asia the South China Sea and the Indian Ocean Although there are broad similarities between the semi enclosed seas of Western Europe and Northeast Asia no regional maritime regime has yet been initiated in Northeast Asia The papers in this volume are authored by leading authorities on not only the maritime affairs of their particular region of focus but on maritime policy in general They describe and explain existing or incipient regional maritime regimes in an unusually broad comparative context and extract lessons learned that may be applicable elsewhere including Northeast Asia The case studies are neatly sandwiched between an introduction to concepts and principles on regional co operation and concluding chapters on lessons learned and their applicability to Northeast Asia Moreover the papers raise and address several questions of

relevance to policy For example what factors are conducive to maritime regime initiation expansion and positive evolution and which constrain regime formation and evolution Why has maritime regime building been successful in Europe and largely unsuccessful in Asia And which if any lessons learned in the European context are applicable in Asia Given the growing interest in regime formation and effectiveness in general and maritime regimes in particular this book will be of considerable interest to both analysts and policymakers *Urban Land Management, Regularization Policies, and Local Development in Africa and the Arab States* ,1995
