Regionalization For Development And Accession To The European Union:

Regionalization for Development and Accession to the European Union Gérard Marcou, 2002 **Enlargement of the European Union** Allan F. Tatham, 2009-01-26

The development of EU enlargement has raised many thorny issues unanticipated by the framers of the EC Treaty. A significant upshot of these issues is that the concept of European identity defined in terms of such factors as culture, history and economics has supplanted the long dominant theme of widening and deepening, particularly since the Union's expansion has become primarily eastward. The major contribution of this important book lies in its analysis of the conceptualization and perception of enlargement from various points of view, focusing on the concerns of stakeholders and the identity conflicts and uncertainties incurred by enlargement initiatives. In the course of its presentation, it details the actual pre-accession Europeanization process and its complex history. Among the key elements discussed are the following: the conflict between widening and deepening and the effect on EU institutional reform; institutional requirements on candidate countries; pre-accession criteria and negotiations; administrative capacity; judicial capacity and legal approximation in accession states; capacity of the EU to absorb new Member States and EC law as part of European identity. Also covered are specific historical details of particular pre-accession negotiations, e.g. Greece, Spain, Portugal, Malta and Cyprus; the still inconclusive negotiations with Turkey and the Western Balkan states; and political factors involved in the non-accession of Norway, Iceland and Switzerland. Assembling powerful evidence and applying incisive analysis, the author's conclusion shows that absent further and major EU institutional reform, it will be difficult for an enlarging Union to continue to deliver the goods. A watershed in the continuing great debate on the fulfilment of the EC Treaty's determination to foster and promote an ever closer union of the peoples of Europe, this book will prove invaluable to anybody interested in the European integration project, particularly lawyers, academics, officials and policymakers in the EU Member States.

Europeanization and Regionalization in the EU's Enlargement to Central and Eastern Europe J. Hughes, G. Sasse, 2004-10-12

This book is a study of EU conditionality and compliance during the enlargement to the Central and Eastern European candidate countries. EU conditionality for membership is widely understood as having been a driving force for Europeanization, providing incentives and sanctions for compliance or non-compliance with EU norms such as the Copenhagen Criteria and the adoption of the *acquis communautaire*. By taking regional policy and regionalization as a case study, this book provides a comparative analysis of the effects of conditionality on the Central and East European countries and explores the many paradoxes and weaknesses in the use of EU conditionality over time.

Democratization and the European Union Leonardo Morlino, Wojciech Sadurski, 2010-05-31

This book examines in depth the impact of the EU on aspects of the quality of democracy in eight selected post-communist countries. Considering both the political and legal aspects of the dynamics among institutions and focussing on inter-institutional accountability, the book analyses how constitutional designs have been effectively implemented to achieve this and to what extent this was the result of EU action.

In order to make a comparative assessment of the EU on democracies the book features detailed case studies according to their different status vis vis the EU including older new member states Poland and Hungary newer new member states Romania and Bulgaria potential candidates Albania and Serbia and neighbour and remote neighbour states Ukraine and Armenia Each chapter addresses a range of dimensions and most relevant domains of inter institutional accountability that is executive legislative relationships constitutional justice decentralisation and regionalism and the role of ombudsman or other relevant authorities Seeking to assess how important the role of the EU has been in influencing the modes and characteristic of democracies and fundamental rights established in these regions this book will be of interest to students and scholars of comparative politics EU politics Post communist studies and democratization studies

The Party Politics of Territorial Reforms in Europe Emanuele Massetti, Simon Toubeau, 2015-09-07 The book analyses how political parties compete and strategise on the issue of territorial reform using case studies that include countries from both Western Belgium Germany Italy and Spain and Central Eastern Europe Poland Slovakia and Romania Each case study in the volume considers the different drivers of decentralization such as territorial identities and the demands of regionalist parties for territorial autonomy or independence efficiency concerns related to issues of uneven economic development and economic competitiveness the pressure from supra national organizations especially the EU as well as different combinations of these drivers They also consider how the ideology and organisation of state wide parties and the institutional context in which they compete shape their responses to these drivers and their strategy towards the question of territorial reform This collection investigates the logic of the actions that guide political parties strategy to highlights trends that are apparent across the case studies This book was originally published as a special issue of West European Politics

Regionalism Contested Henrik Halkier, 2016-12-05 As we move further into the 21st century the prominence of regions can no longer be taken for granted A certain skepticism has developed with regard to the feasibility of marginal regions achieving self sustained growth and states have maintained their role as regulators of economic and social activities Thus the notion of the region and its significance is currently much debated and contested Illustrated with a wide range of European case studies this volume brings together the main strands of these contestations as economic political and social actors attempt to institutionalise their vision of their region as the dominant form of territorial governance It questions both the external delimitation and the internal constitution of regions and critically analyses the societal processes circumscribing ways in which regions are created maintained and undermined The volume provides a wide range of analytical perspectives to enable an understanding of the current mosaic of regionalism in Europe

Politics in the European Union Ian Bache, Stephen George, Simon Bulmer, 2011-02-17 This is an account of the main developments in the process of European integration It provides coverage of theory history member states institutions and policies drawing on academic debates including issues of legitimacy and globalisation

The European Union and Europe's New Regionalism Boyka M. Stefanova, 2017-10-24 This book presents a new approach to

studying the European Union's regional and global relevance. It recasts into a dynamic perspective the three most significant systemic processes that define the EU as a regionalist project: its enlargement, neighborhood, and mega-regional policies. The book argues that these processes collectively demonstrate a dynamic shift of the core tenets of European regionalism from an inward-looking process of region building to an open selective system of global interactions. *EU Accession and Spanish Regional Development* Carolyn Marie Dudek, 2005. Policymakers saw European Community membership as a way for Spain to secure democracy and promote economic development throughout the country. Nevertheless, regional economic disparities still persist in Spain almost twenty years after it entered the Community despite significant European allocation of funds to remedy underdevelopment. How did the policies of the European Union impact Spain? What lessons can new EU members learn from Spain's experience within the European Union? Using rich empirical evidence and an innovative comparative analysis, this book examines the regional experiences of Galicia and the Valencian Community in Spain. The political dynamics and persistence of clientelism, which affect policymaking and policy implementation within each region, are particularly considered. These cases provide new insight to explain why regional economic differences persist in Spain despite efforts to alleviate them. Historically grounded and detailed, this study analyzes the process of accession and the ignored long-term ramifications of accession negotiations and treaties; it focuses on the often overlooked contradiction between European regulations and regional development policies and questions whether EU membership has been as beneficial as policymakers thought it would be. The European Union, the World Bank and the Policymaking of Aid Eugenia Baroncelli, 2019-01-03

Based on the experience of the author, an IPE scholar and former trade policy consultant at the World Bank (WB), the book offers an in-depth exploration of the EU-WB relations conceptualized as hybrid delegation. Coupling cross-time analyses of their interaction in the regions of the Middle East and North Africa, Europe and Central Asia, and Sub-Saharan Africa with an original investigation on the coordination among the EU member states at the Executive Board of the International Bank for Reconstruction and Development over the voice and participation reform of 2008-2010, the book advances an innovative theoretical framework to assess the EU-WB joint institutional and field policy performances. Augmented PA models of delegation, role theory, and performance analyses are engaged and selectively recombined to investigate the nature, evolution, and impact of the interactions of the two organizations both in their everyday and constituent politics. Hybrid delegation in motion is reconstructed against the background of post-Washington Consensus and post-Lisbon EU to unveil the changing division of labour between the two largest development multilaterals of the new global context. The book will be of interest to scholars, students, and practitioners in European Politics, Development, International Relations, International Political Economy, and Global Economic Governance. **The Regional Dimension of the European Union** Charlie Jeffery, 2015-03-24

Decision making within the EU has moved to a third regional level of government emerging in the EU policy process alongside the first Union and second member state levels. Multi-level governance can increasingly be identified. These papers

describe and analyse this third level **European Union Governance in Central Asia** Agha Bayramov, Marek Neuman, 2024-12-09 The edited volume attempts to critically approach EU Central Asian relations asking whether when adopting a more sectoral governance approach the EU's transformative power vis vis the region is greater than initially argued and if so under what conditions it flourishes most It assesses whether through adopting a sectoral approach to the area of development infrastructure water management security climate change energy trade health education or any other element defining EU Central Asian relations the European Union is able to co shape this geopolitically strategic region If so what drives the EU's ability to do so if not what mitigates its potential influence This book contributes to the scholarship on the EU's external governance both empirically and theoretically **Crafting Democracy** Jennifer A. Yoder, 2013-02-07 The importance of subnational regions to politics governance and economic development in Western Europe has long been recognized However far less is known about recent steps to introduce a regional level of politics in East Central Europe Reforms there are part of the larger process of crafting democracy that is regional reforms are linked to the economic and political transition away from communism and toward Europe specifically the European Union Crafting Democracy offers an important comparative analysis of the process and outcomes of region building in the four Visegrad countries Jennifer A Yoder investigates why some but not other post communist countries chose to introduce a regional level of elected government In the 1990s for example Poland boldly took the lead in regionalization while the Czech Republic and Slovakia lagged behind Hungary meanwhile declined to create regions The author argues that these regional reform processes have potentially far reaching implications for state society relations political participation and policymaking at the domestic level The emergence of new actors at the subnational level moreover creates opportunities for cross border and European Union level initiatives **The Rise of Regional Authority** Liesbet Hooghe, Gary Marks, Arjan Schakel, 2010-04-05 Most countries around the globe have one or two levels of regional or intermediate government yet we have little systematic idea of how much authority they wield or how this has changed over time This book measures and explains the formal authority of intermediate or regional government in 42 advanced democracies including the 27 EU member states It tracks regional authority on an annual basis from 1950 to 2006 The measure reveals wide variation both cross sectionally and over time The authors examine four influences functional pressures democratization European integration and identity to explain regionalization over the past half century This unique and comprehensive volume will be a vital resource for students and scholars of comparative politics public administration and public management federalism democratization nationalism and multilevel governance *The Geography of Serbia* Emilija Manić, Vladimir Nikitović, Predrag Djurović, 2021-11-24 This is a comprehensive regional geography synthesis of the most important physical and human spatial processes that shaped Serbia and led to many interesting regional issues not only to Serbia but to the Balkans and Europe The book provides an overall view on the Serbian physical environment its population and economy It also highlights important regional issues such as

regional disparities and depopulation sustainable development and ecological issues and rural economy in the context of rural area development which have been shaped by different political and historical processes This highly illustrated book provides interesting and informative insights into Serbia and its context within the Balkans and Europe It appeals to scientists and students as well as travelers and general readers interested in this region

New Regionalism and the European Union Alex Warleigh-Lack, Nick Robinson, Ben Rosamond, 2011-06-01 The debates on regionalism have been polarized between European Union EU scholars and non EU scholars with the assumption being that regionalism within the EU and other regions of the world are quite distinct with little to be learnt from dialogue with each other This book challenges such assumptions and calls for a genuine debate between scholars of regionalism This book demonstrates that more can and needs to be learned about regional integration all over the world through comparison and reflection on specific regional trends Beginning with a theoretically driven introduction leading experts in the field are brought together to offer a series of case studies on regional integration within Latin America Africa Asia North America and Europe In Part III the authors investigate the links between the EU and selected other regional organisations and processes exploring the dynamics through which these interregional relations are developing and the implications they have for the study of contemporary regionalism regionalisation both inside and beyond the continent of Europe The conclusions set out a challenging research agenda for comparative studies in the field Addressing one of the under explored aspects of EU studies the EU s coexistence with other pan continental regional organisations in the European continent this book will be of interest to students and scholars of regionalism IPE European Studies and international politics

Constitutionalism and the Enlargement of Europe Wojciech Sadurski, 2012-07-26 After the fall of Communism in Central and Eastern Europe CEE the newly democratized countries of this region joined two main pan European political and legal structures the Council of Europe and the European Union This book shows how the Eastward enlargement of these two structures fostered the constitutionalization both of the Council of Europe and of the EU Prompted by the enlargement of the Council of Europe and the admission of a number of countries which brought unique and often more substantial problems onto the Court s agenda the main judicial body of the Council of Europe the European Court of Human Rights became a quasi constitutional court of Europe This book demonstrates that this was primarily as a result of the widening of its agenda and the resulting need to make activist decisions about the compatibility of national laws with the European Convention In terms of the EU the book shows that the enlargement first prospective and then actual has been an important agenda setter for the constitutionalization of the EU in particular for openly placing the issue of fundamental rights on the EU agenda as a legitimate and indispensable matter of concern for the EU But the constitutional synergies were a two way street the accession to both pan European structures has also affected the development of democratic constitutionalism in CEE states It has raised difficult issues regarding the relationships between national sovereignty democracy and human rights that CEE

policy makers have grappled with these issues and responses by CEE member states have had implications for the old EU member states as well. These dynamics are explored through various case studies providing a new perspective on the development of legal norms and institutions within European supranational bodies. *Spreading Democracy and the Rule of Law?* Wojciech Sadurski, Adam Czarnota, Martin Krygier, 2006-07-30. The accession of eight post communist countries of Central and Eastern Europe and also of Malta and Cyprus to the European Union in 2004 has been heralded as perhaps the most important development in the history of European integration so far. While the impact of the enlargement on the constitutional structures and practices of the EU has already generated a rich scholarly literature, the influence of the accession on constitutionalism, democracy, human rights and the rule of law among the new member states has been largely ignored. This book fills this gap and addresses the question of the consequences of the external force of European enlargement upon the understanding and practice of democracy and the rule of law and among both the main legal political actors and the general public in the new member states. A number of leading legal scholars, sociologists and political scientists both from Central and Eastern Europe and from outside address these issues in a systematic and critical way. Taken together, these essays help answer a fundamental question: does the European Union have the potential of promoting and consolidate democracy and human rights.

Endogenous Regional Development Robert John Stimson, Roger Stough, Peter Nijkamp, 2011. Increasingly endogenous factors and processes are being emphasized as drivers in regional economic development and growth. This 15 chapter book is unique in that it commences by presenting five disciplinary takes on endogenous development from the perspectives of economics, geography, sociology, planning and organizational management. Several chapters demonstrate how researchers have developed operational models to investigate the roles played by endogenous factors in regional economic development, including the role of entrepreneurial rents. Further chapters provide empirical investigations of endogenous factors in regional development at various levels of spatial scale from the supraregion to the nation, city and small town and in a variety of situational settings including the European Union, Asia and Australia. The book is an invaluable up to date resource for researchers and students in regional science and regional economic development and planning.

Regionalism and Regional Self-Government in South-East Europe Vedran Đulabić, 2024-11-15. The book analyses state of play regarding regional level of government in the countries of South East Europe, particularly countries succeeding former Yugoslavia: Slovenia, Croatia, Bosnia and Herzegovina, Serbia, Montenegro, Kosovo and North Macedonia, using the research methods from the fields of Law, Public Administration and Political Science. The book offers a fresh analytical perspective of the regional self government issues in these countries, out of which every country has particular issues to deal with: Be it controversial territorial restructuring debate, Croatia's complex institutional system, B.H. dealing with territorially concentrated ethnic minorities, Serbia, Kosovo, North Macedonia or the issue of small size and non existence of regional forces, Slovenia, Montenegro. Besides the introductory, methodological and concluding synthesis

trends and issues for further research chapters the book contains country chapters written by experts from a particular country in the region who follow the same chapter structure which allows further comparisons Besides that the book contains three chapters on several cross cutting issues such as position of ethnic minorities and their territorial regional concentration and institutional representation in the overall system of local and regional self government analysis of regional political parties and movements that influence the debate in these countries and the analysis of position and interplay of deconcentrated state administration and regional self government in analysed countries
