Regions Globalization And The Knowledge Based Economy:

Regions, Globalization, and the Knowledge-Based Economy John H. Dunning, 2000-09-21 What are the links between the impact of increasing globalization and the advent of the knowledge economy on the spatial distribution of economic activity How can we explain the paradox of growing trans nationalization of the production of goods and services and the tendency for certain kinds of activity particularly knowledge intensive activities to be concentrated or clustered in one place In this changing environment how do firms make decisions about location and the development and deployment of their distinctive capabilities These are some of the important questions addressed in this volume by a team of leading international scholars looking at these dynamics in broad scope The book presents different disciplinary approaches to the knowledge economy viewed from an international perspective and includes detailed case analysis of its impact in different parts of the world It moves between the supra national macro region and the micro cluster as well as looking at associated infrastructural and policy responses This is a rich and informative book that attempts to explain some of the key dynamics and characteristics of the new global economy It will be essential reading for academics in business economics geography and political science wanting to get to grips with current thinking and developments

Regions, Globalization, and the Knowledge-Based Economy John H. Dunning, 2000-09-21 What are the links between the impact of increasing globalization and the advent of the knowledge economy on the spatial distribution of economic activity How can we explain the paradox of growing trans nationalization of the production of goods and services and the tendency for certain kinds of activity particularly knowledge intensive activities to be concentrated or clustered in one place In this changing environment how do firms make decisions about location and the development and deployment of their distinctive capabilities These are some of the important questions addressed in this volume by a team of leading international scholars looking at these dynamics in broad scope The book presents different disciplinary approaches to the knowledge economy viewed from an international perspective and includes detailed case analysis of its impact in different parts of the world It moves between the supra national macro region and the micro cluster as well as looking at associated infrastructural and policy responses This is a rich and informative book that attempts to explain some of the key dynamics and characteristics of the new global economy It will be essential reading for academics in business economics geography and political science wanting to get to grips with current thinking and developments

Regional Development in Central and Eastern Europe Grzegorz Gorzelak, John Bachtler, Maciej Smętkowski, 2018-10-24 This book provides an up to date assessment of the main processes and dilemmas of regional development and regional policy in the newer European Union Member States in Central and Eastern Europe and neighbouring countries It highlights the difficulties of balancing the demands within the new Member States for rapid regional growth and development with firstly the demands of the European Union overall that restructuring and development should conform to the aims and principles of EU common policies and secondly with budgetary constraints The book covers a

wide range of issues including global and national challenges to regional convergence and cohesion regional dynamics city networks and border issues the effectiveness of policy responses at national and European levels including an assessment of policy experiences from outside the new Member States and likely future developments Handbook on the Geographies of Regions and Territories Anssi Paasi, John Harrison, Martin Jones, 2018-07-27 This new international Handbook provides the reader with the most up to date and original viewpoints on critical debates relating to the rapidly transforming geographies of regions and territories as well as related key concepts such as place scale networks and regionalism Bringing together renowned specialists who have extensively theorized these spatial concepts and contributed to rich empirical research in disciplines such as geography sociology political science and IR studies this interdisciplinary collection offers fresh cutting edge and contextual insights on the significance of regions and territories in today's dynamic world *The Internationalization of Small Firms* Shameen Prashantham, 2007-08-30 Drawing on empirical case study research carried out in the Bangalore software industry this book explores the role of network relationships in the internationalization of small knowledge intensive firms Using a conceptual framework it looks at a range of key themes These include networks knowledge technology Highlighting the propensity of small knowledge intensive firms to develop and leverage network relationships and thereby the resourcefulness with which entrepreneurial firms can and do internationalize this book is essential reading for academics and students with an interest in the intersection between international business and entrepreneurship Regional Knowledge Economies Philip Cooke, 2007-01-01 This original and timely book presents the most comprehensive empirically based analysis of clustering dynamics in the high technology sector across liberal and coordinated market economies **GEOGRAPHY - Volume II** Maria Sala, 2009-07-17 Geography is a component of Encyclopedia of Earth and Atmospheric Sciences in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias Geographical perceptions can be traced from very ancient cultures although geography as a science started its development during the eighteen century it was firmly established after the Darwinian revolution and many of its fundamentals appeared during the nineteenth century The history of geography is closely connected with the history of human society Geography embraces both the physical and human worlds and aims to bridge natural and human sciences For a geographer although the environment and its conservation is a crucial item it is also fundamentally concerned with the living standards of humankind Although its wide embrace may be seen as a weakness diversification is also strength and an attraction Approaches are multidisciplinary exploring the complex linkages between the cultural and the natural These favor cross cultural communication and mutual understanding at a global scale There is a geographical basis to most of the outstanding political problems and geographical reasons to explain them The subject matter of the geography theme is presented basically on how the subject matter is taught presently at the universities and following the many paths its practitioners are following in doing research It introduces modern subject matters and goes

much further than a simple description of places and travels The theme has been divided into four main topics Foundations Physical Geography Human Geography and Technical matters The scope of the foundation topic is to present an overview of the basis of the geographical field its scope history methods and its importance in education The chapters included are Main Stages of the Development Theory and Methods and Geographical Education The Physical Geography topic includes the historical background of the geographical study of the Earth natural environment and the main fields cultivated by geographers It consists of eight chapters on basic research fields which are Geomorphology Climatology Hydrology Biogeography Soil Geography Coastal Systems Ocean Geography Mountain Geocology and two chapters on environmental issues Natural Hazards and Land Degradation and Desertification In the Human Geography topic six chapters discuss the more current fields that is Population Cultural and Social Agricultural and Rural Industries and Transport Economic Activities and Urban Geography Three chapters present subjects developed more recently Medical Political and Tourism geographies Finally the Regional approach is presented as the most traditional and integrative field These volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs

Knowledge Cities Francisco Carrillo, 2006-08-14 Knowledge Cities are cities that possess an economy driven by high value added exports created through research technology and brainpower In other words these are cities in which both the private and the public sectors value knowledge nurture knowledge spend money on supporting knowledge dissemination and discovery ie learning and innovation and harness knowledge to create products and services that add value and create wealth Currently there are 65 urban development programs worldwide formally designated as knowledge cities Knowledge based cities fall under a new area of academic research entitled Knowledge Based Development which brings together research in urban development and urban studies and planning with knowledge management and intellectual capital In this book Francisco Javier Carillo of the Monterrey Institute of Technology ITESM brings together a group of distinguished scholars to outline the theory development and realities of knowledge cities Based on knowledge based development the book shows how knowledge can be and is placed at the center of city planning and economic development to enable knowledge flows and innovation to provide a sustainable environment for high value added products and services

The New Economy and Macroeconomic Stability Dario Togati, 2013-03-07 The past decade has seen many leading economies especially the US undergo profound structural transformations Departing from the standard theories employed to explain this phenomenon here author Togati provides the first broad analysis of the New Economy In this book the first to look at the new economy from a post Keynesian post modern perspective he focuses on its macroeconomic implications presenting a more balanced view than that provided by orthodox neoclassical analysis and studying the interaction of key variables such as information technology globalization the increasing significance of intangibles and financial markets This ground breaking book utilizes a neo modern perspective

drawing on complexity theory to advance the study of the stability and dynamic behaviour of economic systems Togati utilizes the Calvino labels to identify new empirical evidence and examines the implications for global stability based on New Classical Macroeconomics and Keynesian theory The analysis developed in this book has important practical and policy implications for the New Economy making this book essential reading for students academics and practitioners in this field

Productivity Perspectives Philip McCann,Tim Vorley,2020-03-28 Productivity Perspectives offers a timely and stimulating social science view on the productivity debate drawing on the work of the ESRC funded Productivity Insights Network The book examines the drivers and inhibitors of UK productivity growth in the light of international evidence and the resulting dramatic slowdown and flatlining of productivity growth in the UK The reasons for this so called productivity puzzle are not well understood and this book advances explanations and insights on these issues from different disciplinary and methodological perspectives It will be of value to all those interested in and engaging with the challenge of slowing productivity growth

Knowledge Economies Philip Cooke,2002-09-10 This book traces the theoretical explanation for clusters back to the work of classical economists and their more modern disciples who saw economic development as a process involving serious imbalances in the exploitation of resources Initially natural resource endowments explained the formation of nineteenth and early twentieth century industrial districts Today geographical concentrations of scientific and creative knowledge are the key resource But these require a support system ranging from major injections of basic research funding to varieties of financial investment and management to the provision of specialist incubators for economic value to be realised These are also specialised forms of knowledge that contribute to a serious imbalance in the distribution of economic opportunity

Multinational Enterprises and Innovation Martin Heidenreich,Christoph Barmeyer,Knut Koschatzky,Jannika Mattes,Katharina Krüth,Elisabeth Baier,2011-09-27 The crucial actors of a global knowledge based economy are multinational enterprises MNEs MNEs depend on the embeddedness in an institutional framework their competitive advantage depends on the cross border utilisation of regional and national capabilities The innovativeness of a company is therefore based also on regional innovation systems Multinational Enterprises and Innovation contributes to a better understanding of the interconnectedness between organisational and regional learning On the basis of case studies in Germany and France this volume investigates how MNEs cope with technical economic and institutional uncertainties by drawing upon the complementary strengths of organisational and regional networks in national and European contexts The book links two theoretical debates which are currently still largely disconnected the debate on learning processes in MNEs and the debate on the regional bases of innovativeness and competitiveness answering the question of how the internationalisation of R D is reconciled with regional competences

Global and Regional Dynamics in Knowledge Flows and Innovation Chris Van Egeraat,Dieter Kogler,Phil Cooke,2015-10-14 Innovation which in essence is the generation of knowledge and its subsequent application in the marketplace in the form of novel products and processes has become the

key concept in inquiries concerning the contemporary knowledge based economy Geography plays a decisive role in the underlying processes that enable and support knowledge formation and diffusion activities Place specific characteristics are considered especially important in this context however more recently investigation into innovative capacity of places has also turned its attention to external knowledge inputs through innovation networks and increasingly recognize the evolutionary character of the processes that lead to knowledge creation and subsequent application in the marketplace The chapters that comprise this book are embedded at the intersection of the dynamic processes of knowledge production and creative destruction The first three contributions all discuss the role of global innovation networks in the context of territorial and or sectoral dynamics while the following two chapters investigate the evolution of regional or metropolitan knowledge economies The final three contributions adopt a knowledge base approach in order to provide insight into the organisation of innovation networks and spatiality of knowledge flows This book was published in a special issue of European Planning Studies

The Dynamics of the Innovation Divide between China and Europe Arkadiusz Michal Kowalski,2022-03-13 This book examines the problem of the innovation divide in the world economy and convergence in innovation performance between leaders and followers analysed through the prism of Chinese experiences and explored from an European Union EU perspective The rationale for research conducted in this book is an observation of a significant change in the geography of world innovation reflected in the emergence of innovation hubs in developing countries and in the shift of manufacturing activity including high and medium high technology industries to emerging economies mainly China The book analyses the factors of Chinese innovation success in recent decades such as China s science technology and innovation policy increased R D expenditures human capital development and the development of clusters and highly specialized industries It also focuses on the challenges for developed European economies which are being at risk of losing their knowledge related sources of competitive advantage It also offers recommendations for future policy actions The book s analysis goes beyond a cross country comparison taking into account a regional perspective The reason for this regional dimension is the increasingly recognized importance of proximity in stimulating innovation processes and an observed strong geographical polarization of innovation activity at specific regions seen in the emergence of clusters particularly visible in China The monograph will provide an up to date reference for academics and students across a variety of disciplines It will be of particular interest to researchers in the area of innovation and practitioners doing business in China as well as policymakers at international national and regional levels involved in designing and implementing innovation policy

Global Information Society Mark I. Wilson,Aharon Kellerman,Kenneth E. Corey,2013-04-11 We have been living and working in the information society for decades yet still we struggle to understand and keep up in the face of its constant flux and vast scope In this unique interdisciplinary text three scholars at the forefront of this dynamic field provide a clear conceptual framework and interpretation of the global information society They explain the three pillars of the information society technology

knowledge and mobility and the global information society as a whole both as an interconnected web and a regionally distinct phenomenon Offering a nuanced understanding of this complex subject this book will enable students to navigate and thrive in the dynamic and evolving world of information and communication technology

Industrial Agglomeration and New Technologies Masatsugu Tsuji, Emanuele Giovannetti, Mitsuhiro Kagami, 2007 the book is an interesting collection of anecdotal evidence the book makes for interesting reading both from the point of view of case studies and in terms of empirical methodological applications Silvia Grandi Economic Geography Research Group This is a valuable book The individual chapters contain original case study evidence and analytical insights it is one that should be consulted by any scholar working in the area of industrial agglomerations and new technology Simona Iammarino Economic Geography This book a collaborative effort by researchers from Japan Italy and the USA seeks to explore the reasons for industrial clustering in certain regions of Asia Europe and North America The studies presented illustrate real examples of industrial clusters adding anecdotal evidence to the emerging theory of economic geography by exemplifying the centripetal and centrifugal forces that regulate the clustering process The authors examine clusters in a diverse set of countries including China Italy Japan Mexico South Korea the USA and Vietnam Significantly the book provides an interesting split between studies of IT and software related industries and more traditional sectors such as steel and vehicle manufacturing Industrial Agglomeration and New Technologies pays attention to a varied array of factors that influence clustering such as knowledge spillovers tacit knowledge communication and transport costs and the effects of various government policies The case studies provide useful examples for government and industry leaders as well as a starting point for researchers seeking an ultimate answer to the question Why do firms form clusters

The Empirical and Institutional Dimensions of Smart Specialisation Philip McCann, Frank van Oort, John Goddard, 2016-11-25 Smart specialisation is the new policy approach to the development of regional innovation systems across Europe and it involves fostering innovative and entrepreneurial initiatives which are well tailored to the local context The different technologies skills profiles business activities institutions and sectors which reflect a region's economic strengths and potential are to be fostered and encouraged to diversify in ways which also exploit the region's linkages with broader global value chains Yet the ideas contained in the smart specialisation agenda have until now been primarily conceptual in nature The Empirical and Institutional Dimensions of Smart Specialisation draws together some of the leading regional economists and scientists in Europe to analyse how smart specialisation is working in practice This book investigates different dimensions of the agenda as it is developing across parts of Europe from both quantitative and qualitative perspectives The quantitative analysis examines the nature of the diversification processes undertaken by regions and the interplay between the chosen local regional development priorities and the wider global value chain impacts of these choices Meanwhile the qualitative analysis examines the institutional opportunities and challenges facing policy makers and the key elements most likely to provide the underpinnings of a

workable set of policy settings The book is aimed both at academic researchers interested in the interface between economic geography and regional innovation systems as well as at policy makers making public policy decisions related to regional development at the local city regional or national levels Architects of Growth? Francis E Hutchinson, 2013-12-05 Once acting as local representatives of the national government and content to let their larger counterparts do the heavy lifting state and provincial governments are increasingly expected to be stewards of their economies and deliver sustained growth rates for their citizens Spurred on by increasing competition not least from neighbouring territories sub national governments are increasingly formulating their own plans for economic development taking out loans investing in specialist facilities and establishing marketing offices abroad Despite this increasingly challenging environment there is little research on what sub national governments can or should do to catalyze the development of their economies Focussing on the electronics sector this book draws together ten cases of promising states or provinces largely but not exclusively from Asia These dynamic regions have managed to outcompete the primary economic and political centres of power in their countries and are negotiating their own entry into one of the most challenging and demanding sectors In exploring the issues of agency autonomy and state business relations at the sub national level this book aims to shed light on a vital but overlooked topic

The Challenge of Knowledge Sharing Tatjana Bauer, 2011 In the Vietnamese science community knowledge production and sharing are still limited Based on intensive field work this book investigates how organizations operating in the field of water research understand and practice knowledge management The national science policy culture tradition international collaboration and local market forces all contribute to the current conditions of knowledge exchange in Vietnam It is shown that the concentration of organizations in knowledge clusters could possibly increase the innovative capacity of research and development which represents a key driving force in the country's ambitious plans of becoming a middle income country Series ZEF Development Studies Vol 17 *Local and Regional Development* Andy Pike, Andrés Rodríguez-Pose, John Tomaney, Andrés Rodríguez-Pose, 2006-11-22 Local and regional development is an increasingly global issue For localities and regions the challenge of enhancing prosperity improving wellbeing and increasing living standards has become acute for localities and regions formerly considered discrete parts of the developed and developing worlds Amid concern over the definitions and sustainability of development a spectre has emerged of deepened unevenness and sharpened inequalities in the development prospects for particular social groups and territories Local and Regional Development engages and addresses the key questions what are the principles and values that shape definitions and strategies of local and regional development What are the conceptual and theoretical frameworks capable of understanding and interpreting local and regional development What are the main policy interventions and instruments How do localities and regions attempt to effect development in practice What kinds of local and regional development should we be pursuing This book addresses the fundamental issues of what kind of local and regional development and for whom frameworks of understanding and

instruments and policies It outlines what a holistic progressive and sustainable local and regional development might constitute before reflecting on its limits and political renewal With the growing international importance of local and regional development this book is an essential student purchase illustrated throughout with maps figures and case studies from Asia Europe and Central and North America

Recognizing the pretentiousness ways to get this ebook **Regions Globalization And The Knowledge Based Economy** is additionally useful.
