*Regulating Europe* Giandomenico Majone, 2002-11 First published in 2004 Routledge is an imprint of Taylor Francis an informa company      **Governing Europe** Jack Hayward, Anand Menon, 2003-03-20 Governing Europe is intended to be the leading advanced survey of politics in Western Europe It examines in detail all aspects of political life in Western Europe from public protest to core executives social policy to Europe s place in the world It brings together a world class team of leading scholars from the United Kingdom continental Europe and North America The contributions provide not only a sophisticated introduction to the various issues covered but also a detailed discussion of the major theoretical and empirical debates and developments in the field The book therefore provides both a comprehensive overview and a series of original contributions to scholarly debate The focus is on European core executives public administration parties and organised interests democracy and popular participation public policy and the changing European state It will be essential reading to scholars and students alike The volume is intended as a tribute to the late Vincent Wright of Nuffield College Oxford University      **Regulating Risks in the European Union** Maria Weimer, Anniek de Ruijter, 2017-10-05 A growing body of EU law and regulation is preoccupied with the protection of EU citizens from health and environmental risks Which chemicals are safe and should be allowed on the market How should the EU respond to public health emergencies such as Ebola and other infectious diseases Regulatory responses to these questions confront deep uncertainty limited knowledge and societal contestation In a time where the use of scientific expertise in EU policy making is particularly contested this book offers a timely contribution to both the academic and policy debate on the role of specialised expertise in EU public decision making on risk and technology as well as on its intertwinement with executive power It draws on insights from law governance political sciences and science and technology studies bringing together leading scholars in this field Contributions are drawn together by a shared theoretical perspective namely by their use of co production as an analytical lens to study the intricate interplay between techno scientific expertise and EU executive power By so doing this collection produces highly original insights into the development of the EU administrative state as well as into the role of regulatory science in its construction This book will be useful to scholars practitioners and policy makers working on risk regulation and the role of expertise in public decision making      **Regulating Europe** Pio Baake, 1996 First published in 2004 Routledge is an imprint of Taylor Francis an informa company      **European Regulatory Agencies in EU Decision-Making** Christoph Ossege, 2016-01-06 European Regulatory Agencies ERAs have become increasingly important features in EU decision making They aim to provide expert advice independent of political or economic considerations This book explains whether and under what conditions ERAs comply with this scientific mandate Expanding on rational institutionalism Ossege provides novel insights into the behaviour of ERAs their autonomy from undue external influence and their impact on EU policy making The empirical comparison of three major ERAs the European Medicines Agency the European Food Safety Authority and the

European Chemicals Agency not only shows that agencies capitalise on their expertise and rule making competences to protect their autonomy Rather in making strategic use of their expertise the ERAs also guard their autonomy in areas of high political salience though their policy influence in these areas is partially circumscribed Based on these insights European Regulatory Agencies in EU Decision Making locates its subject in the wider system of European Governance and considers the perennial question of how to reconcile the need for expert advice with democratic decision making *Regulation Through Agencies in the EU* Damien Geradin, University, The Netherlands, Rodolphe Muñoz, Nicolas Petit, 2005-01-01 The past decade has witnessed a proliferation of regulatory agencies at both the national and the EU level This coherent and clearly structured book is the first of its kind to analyse in equal measure and interdependently both national regulatory authorities and European agencies It brings together a select group of highly esteemed contributors authorities in their fields to provide a systematic and over arching view of regulation in the EU Unlike many of the previous attempts to shed light on this increasingly opaque and complex co existence of regulatory systems this book takes a genuinely multi disciplinary approach with integrated perspectives from law politics and economics EU Regulatory Decision Making and the Role of the United States Oliver Ziegler, 2012-09-05 Oliver Ziegler raises the question of what role economic interests of the United States play in the regulatory decision making process of the European Union Critics often assume that U S dominance in the world economy fueled by a powerful business elite has significantly affected EU regulations at the expense of environmental and consumer protection standards The author falsifies this proposition He shows first that the EU often adopts regulations against the explicit opposition of the U S thereby ignoring the principles of transatlantic regulatory cooperation Second he demonstrates that business interests in the EU are usually not homogenous and often come second to environmental and consumer concerns In addition the author shows the increasing role of the European Parliament in EU regulatory decision making Regulatory Convergence in EU Securities Regulation Iris H.-Y. Chiu, 2008-01-01 Offers a new approach to the legal issues raised by the drive for convergence in securities regulation The author offers an informed and insightful examination of the implications for regulatory and policy design if regulatory convergence were to be rigorously implemented *The New Old World* Perry Anderson, 2011-11-07 The New Old World looks at the history of the European Union the core continental countries within it and the issue of its further expansion into Asia It opens with a consideration of the origins and outcomes of European integration since the Second World War and how today s EU has been theorized across a range of contemporary disciplines It then moves to more detailed accounts of political and cultural developments in the three principal states of the original Common Market France Germany and Italy A third section explores the interrelated histories of Cyprus and Turkey that pose a leading geopolitical challenge to the Community The book ends by tracing ideas of European unity from the Enlightenment to the present and their bearing on the future of the Union The New Old World offers a critical portrait of a continent now increasingly hailed as a moral and political example to the world at large Regulating

Europe Giandomenico Majone,1989      **Regulating Public Utilities in Europe** Burkard Eberlein,1998 Recoge 1 Concepts and theories of regulation 2 The aftermath of liberalization The challenge of re regulation 3 The new regulation game The pluralisation hypothesis 4 British utility regulation Whose utility 5 Lessons from British experience and the German and French case 6 Explaining the regulatory process and outcomes 7 In Lieu of conclusions Proposals for comparative research on utility regulation      *Governing Finance in Europe* Adrienne Héritier,Magnus G. Schoeller,2020-08-28 How do regulatory structures evolve in EU financial governance Incorporating insights from a variety of disciplines *Governing Finance in Europe* provides a comprehensive framework to investigate the dynamics leading to centralisation decentralisation and fragmentation in EU financial regulation      Beyond the EU Regulatory State Andrea Prontera,2019-08-16 The EU s growing dependence on natural gas and Russian resources energy security has become a hot discussion topic in academia and in policy circles in Brussels Washington and many European capitals However most of the books on the subject use a very descriptive and or normative approach and very few attempt to theorise EU energy security outside of mainstream conceptualisations of the EU as an international actor This book closes an important gap in the literature and offers a fresh perspective on EU energy studies and it will be an important contribution to the debate on the development of European integration and the EU s role in international relations in the wake of the crisis in EU politics and in light of the EU s increasingly complex external environment Due to its interdisciplinary features the book combines EU studies international affairs political economy and energy studies and the topics covered this book will be of special interest to scholars of the international political economy of energy and to those interested in European politics and EU international relations
