Regulating International Business Through Codes Of Conduct:

Regulating International Business Through Codes of Conduct Raymond J. Waldmann, 1980 *Regulating International Business* Sol Picciotto, Ruth Mayne, 2016-07-27 This timely book points the way towards a new positive regulatory framework for international investment following the failure of the Multilateral Agreement on Investment MAI. It examines the flaws in free market strategies underpinning the recent phase of globalization in particular drawing out the lessons from the MAI which was suspended in October 1998. The authors explore an alternative based on a positive regulatory framework for international business aimed at maximizing the positive contribution to development of foreign investment and minimizing its negative social and environmental impacts. The contributors include academics, researchers for non-governmental organizations and business and trade union representatives writing from a combination of economic, legal and political perspectives. The book combines academic analysis with grass roots and practical experience and suggests concrete policy proposals.

Regulating International Business Through Codes of Conduct Raymond J. Waldmann, Regulating International Business Through Codes of Conduct Raymond J. Waldmann, 1980-01-01 International Economic Organizations in the International Legal Process Sergei A. Voitovich, 2023-08-28 Voitovich presents a clear and lucid discussion of the manner and form in which international economic organizations (IEOs) participate in two main stages of the international legal process: law making and law implementation. The book is based on normative instruments and fragments of practice of about fifty IEOs. In order to ensure a proper and timely realization of their normative acts, IEOs exercise a number of law implementing functions which are subject to a thorough comparative examination. The author concludes that existing IEOs, not being ideal institutional models, possess a sufficient arsenal of law implementing instruments to make a considerable impact on the international legal regulations in the economic field. The book will be of interest to academics and economic political scientists.

The Law of Groups of Companies Christine Van Den Wyngaert, M. Kruithof, 1991-12 The law and regulations governing groups of enterprises have undergone an amazing development during the last ten to twenty years. The growing attention paid in legal writing to the specific issues raised by the group phenomenon is a direct consequence of the widespread and increasing utilization of separate legal entities to organize business activities, whether in the profit or non-profit sector. It is increasingly felt that the traditional approach of today's company law does not provide adequate answers for the questions raised by today's enterprise organization. Few national regulations have paid specific attention to the growth of groups of companies. This does not mean that group law does not exist but rather that it has developed from its roots in judicial case law, administrative practice and in many particular provisions of different statutes. Legal doctrine has paid a great deal of attention to group relationships, often utilizing material originating from other legal systems. At the EEC level, a directive on groups of companies has been envisaged but no agreement has been reached on its content. The purpose of the research which resulted in the present publication was to document and orient research by

everyone interested in the study of the law of groups of enterprises The Law of Groups of Companies systematically classifies the wealth of literature which was thus revealed and makes clear that although formal statutes on groups of companies rarely exist the law has been developing and concepts structures and reasoning have kept the minds of many legal writers active This book is a publication of the Studiecentrum Ondernemingsgroepen Centre d Etude des Groupes d Entreprises

Regulating Multinationals in Developing Countries Edwin Mujih, 2012 Edwin Mujih explores the difficulties associated with regulating multinational companies operating in developing countries and highlights the need to establish an international legally binding framework to ensure that they operate in a socially responsible manner Regulating Multinationals in Developing Countries features a study of the Chad and Cameroon oil and pipeline project that highlights the regulatory problems in countries that have neither the capacity or will to effectively regulate those operating within their borders This is the first title in Gower's Corporate Social Responsibility Series to approach CSR from a legal perspective it provides insight into problems with weak regulatory regimes and poses questions about the fundamental nature of multinational corporations and about different notions of CSR itself

Corporate Governance Saleem Sheikh, 2002-03-20 This book critically considers the relationship between directors shareholders and auditors in the corporate governance system Traditionally company law has been primarily based on this tripartite relationship This book comprises a series of contributions from authors who argue that there are wider interests which British company law has largely ignored These include the interests of creditors employees consumers suppliers and the general public The concept of corporate governance is examined with comparative references to the USA and Canada Particular reference is made to the Cadbury Committee and its implications for future company law reform The ethical and sociological dimensions of corporate governance is also fully discussed
