Regulation School A Critical Introduction:

The Regulation School Robert Boyer,1990 **Dalit Capital** Aseem Prakash,2020-12-17 Dalit Capital explores the relation between caste and Indian capitalism It explores the ways in which caste and social discrimination reinvent themselves under the guise of modern capitalism It demonstrates how inclusion holds Dalits at a disadvantage perpetrated by the state markets and the civil society **Distrust** Russell Hardin,2004-05-20 If trust is sometimes the rational response in interpersonal relations then it can also be rational to distrust Indeed distrust is the preferred response when it protects against harm as when parents do not entrust the safety of their child to a disreputable caretaker Liberal political theory was largely founded on distrust of government and the assumption that government cannot and should not be trusted led the framers of the U S constitution to establish a set of institutions explicitly designed to limit government power With contributions from political science anthropology economics psychology and philosophy Distrust examines the complex workings of trust and distrust in personal relationships groups and international settings Edna Ullman Margalit succinctly defines distrust as the negation of trust and examines the neutral state between the two responses in interpersonal relations As Margalit points out people typically defer judgment while remaining mildly wary of another s intentions until specific grounds for trust or distrust become evident In relations between nations misplaced trust can lead to grievous harm so nations may be inclined to act as though they distrust other nations more than they actually do Editor Russell Hardin observes that the United States and the former Soviet Union secured a kind of institutionalized distrust through the development of the nuclear deterrent system that stabilized the relationship between the two countries for four decades In another realm where distrust plays a prominent role Margaret Levi Matthew Moe and Theresa Buckley show that since the National Labor Relations Board has not been able to overcome distrust between labor unions and employers it strives to equalize the power held by each group in negotiations Recapitulating liberal concerns about state power Patrick Troy argues that citizen distrust keeps government regulation under scrutiny and is more beneficial to the public than unconditional trust Despite the diversity of contexts examined the contributors reach remarkably similar conclusions about the important role of trust and distrust in relations between individuals nations and citizens and their governments Distrust makes a significant contribution to the growing field of trust studies and provides a useful guide for further research A Volume in the Russell Sage Foundation Series on Trust *National Diversity and Global Capitalism* Suzanne Berger,Ronald Dore,2018-10-18 How does globalization change national economies and politics Are rising levels of trade capital flows new communication technologies and deregulation forcing all societies to converge toward the same structures of production and distribution Suzanne Berger and Ronald Dore have brought together a distinguished group of experts to consider how the international economy shapes and transforms domestic structures Drawing from experience in the United States Europe and Asia the contributors ask whether competition imitation diffusion of best practice trade and financial flows are reducing national

diversities The authors seek to understand whether the sources of national political autonomy are undermined by changes in the international system Can distinctive varieties of capitalism that incorporate unique and valued institutions for achieving social welfare survive in a global economy The contributions to the volume present a challenge to conventional views on the extent and scope of globalization as well as to predictions of the imminent disappearance of the nation state s leverage over the economy

Dark Horizons Tom Moylan, Raffaella Baccolini, 2003 *Dark Horizons* presents new essays on the dystopian turn of late twentieth century science fiction Leading scholars discuss major dystopian traditions including cyberpunk and feminist utopian dystopian narratives as seen in works such as Octavia Butler s novel *Xenogenesis* and the film *Fight Club* These essays draw out the ways in which contemporary science fiction literature and film has served as a prophetic vehicle for writers with ethical and political concerns

The Transition to Flexibility Daniel C. Knudsen, 2012-12-06 The advanced capitalist nations are currently undergoing an enormous economic social and political transformation At the heart of this transformation is the transition between large scale standardized production Fordism and new more flexible approaches to manufacturing flexibility and a concomitant extension of manufacturing to include products both concrete goods and ephemeral services This volume explores the consequences of this transition from the standpoints of technology labor relations firm strategy education government programs and geography The book is a collection of papers by well known scholars investigating the current global transition from mass consumption and production to flexible production for niche markets The book is unique in that it not only discusses standard economic concerns but also investigates the social and political implications of this transition Each chapter is concerned with a different aspect of the same restructuring process

Trading Blows James Shoch, 2003-01-14 For the past two decades trade policy has been high on the American political agenda thanks to the growing integration of the United States into the global economy and the wealth of debate this development has sparked Although scholars have explored many aspects of U S trade policy there has been little study of the role played by party politics With *Trading Blows* James Shoch fills that gap Shoch offers detailed case studies of almost all of the major trade issues of the Reagan Bush and Clinton eras including administrative and legislative efforts to curb auto steel and other imports and to open up markets in Japan and elsewhere as well as free trade initiatives such as the North American Free Trade Agreement NAFTA the General Agreement on Tariffs and Trade GATT treaty that concluded the Uruguay Round of international trade talks the extension of presidential fast track trade negotiating authority and the approval of permanent normal trade relations with China In so doing he explains the complex patterns of party competition over U S trade policy since 1980 and demonstrates the significant impact that party politics has had on the nation s recent trade policy decisions

Politics in the New Hard Times Miles Kahler, David A. Lake, 2013-04-15 The Great Recession and its aftershocks including the Eurozone banking and debt crisis add up to the worst global economic crisis since the Great Depression of the 1930s Although economic explanations for the Great Recession have proliferated the political causes and consequences of the crisis have received less systematic attention Politics in the New Hard Times is the first book to focus on the Great Recession as a political crisis one with both political sources and political consequences The authors examine variation in crises over time and across countries rather than treating these events as undifferentiated shocks Chapters also explore how crisis has forced the redefinition and reinforcement of interests at the level of individual attitudes and in national political coalitions Throughout the authors stress that the Great Recession is only the latest in a long history of international economic crises with significant political effects and that it is unlikely to be the last

Locating Capitalism in Time and Space David Nugent, 2002 The last several decades have witnessed major restructurings economic political and cultural in the international arena The depth and scope of these changes have prompted anthropologists to rethink many of their most basic assumptions to problematize issues that have long gone unexamined and to grapple with new and unique problems Doing so has left the discipline profoundly unsettled Existing standards of scholarship and research methodologies have come under attack key conceptual categories have been called into question and truths once considered secure have been subjected to severe scrutiny and even ridicule Seizing upon the opportunity afforded by the contemporary conjuncture of disciplinary crisis and redefinition this book raises questions about two interrelated aspects of historical process and academic production The volume contributes to ongoing debates about the degree to which the developments of recent decades represent the advent of a new historical era a rupture with the past that requires new conceptualizations and logics in order to be understood In confronting this question the contributors to this volume have assembled a range of materials that place the present period of reconstruction in the context of a broader history and geography of other related restructurings Locating Capitalism in Time and Space also raises questions about the degree to which the scholarship of recent decades represents a qualitative break with that of the past At issue here is whether one understands the history of academic production as a linear process of intellectual growth punctuated by major breakthroughs in understanding or as a political process structured by the same kinds of inequalities and struggles that characterize the social worlds that are the object of anthropological analysis
