Reindeer People:

The Reindeer People Piers Vitebsky, 2006 Cambridge anthropologist Piers Vitebsky the first westerner to live with the Eveny of Siberia since the Russian revolution brings readers an extraordinary case of survival in one of the most inhospitable places on Earth of photos Humankind/nature Interaction Brunetto Chiarelli, 2009 *The Koryak* Waldemar Jochelson, 2016-04-26 Since the 18th century researchers and scientists have traveled the peninsula of Kamchatka in the Russian Far East Many of them were of German origin and had been commissioned by the Russian government to perform specific tasks Their exhaustive descriptions and detailed reports are still considered some of the most valuable documents on the ethnography of the indigenous peoples of that part of the world These works inform us about living conditions and particular ways of natural resource use at various times and provide us with valuable background information for current assessment As the first profound anthropological descriptions of that region the publications of the Jesup North Pacific Expedition undertaken in the first years of the 20th century marked the beginning of a new era of research in Russia They represented a shift of the already existing transnational research networks toward North America Jochelson's work *The Koryak* was an important milestone for Russian and North American anthropology that provides to this day a unique contribution to thoroughly understanding the cultures of the North Pacific rim Native Peoples of the World Steven L. Danver, 2015-03-10 This work examines the world's indigenous peoples their cultures the countries in which they reside and the issues that impact these groups *The Horse in My Blood* Victoria Soyan Peemot, 2024-03-15 A fascinating interspecies relationship can be seen among the horse breeding pastoralists in the Altai and Saian Mountains of Inner Asia Victoria Soyan Peemot herself grew up in a community with close human horse relationships and uses her knowledge of the local language and horsemanship practices Building upon Indigenous research epistemologies she engages with the study of how the human horse relationships interact with each other experience injustices and develop resilience strategies as multispecies unions

A Primary Source Guide to Norway Elizabeth Rose, 2003-12-15 From its southern tip to the northern Land of the Midnight Sun Norway has one of the most extreme and beautiful landscapes on Earth Fjords and glaciers thousands of miles of coast and clean land and air offer unique experiences in nature to Norwegians and visitors alike Norway has a healthy economy and one of Europe's highest standards of living Its people have vivid imaginations and fairy tales of trolls and wild creatures abound Vikings bunads the Reindeer People and Norway's royalty are all visited by readers in an inspiring primary source trip through this jewel of Scandinavia Myths, Symbols and Legends of Solar System Bodies Rachel Alexander, 2014-11-04 This book is an amateur astronomer's guide to the mythology and symbolism associated with the celestial bodies in the Solar System and even includes some of the legendary tales of people who had or have a connection with these objects It explores different cultures for example the Greco Roman and the Norse and different times and how stories were used to explain the worlds they saw above them You'd be amazed how much of our world today reflects the myths and stories of these cultures

Most amateur astronomers are familiar with the various Solar System objects but they will be only peripherally aware of what ancient cultures thought of these other worlds. In fact the mythology of the planets challenges many twenty first century concepts and beliefs. There are other books available on astromythology but this one focuses mostly on our own Solar System as opposed to the constellations and deep sky objects. Alexander offers a new angle on timeless subjects and is exciting, informative and dramatic as well as surprisingly relevant to everyday life. Find out for yourself how our modern world is steeped in the bygone worlds of yesteryear. *The Chukchee* Waldemar Bogoras, 1909. Reprint of memoirs of the American Museum of Natural History vol 11 which in turn was a reprint of Part I, II and III of vol 7 of the Jessop North Pacific Expedition. Describes material culture, religion and social organization of the Chukchee. *The Sacred Heritage* Donald F. Sandner, Steven H. Wong, 2013-10-18. The contributors to this volume describe the many facets shamanism and depth psychology have in common: animal symbolism, recognition of the reality of the collective unconscious and healing rituals that put therapist and patient in touch with transpersonal powers. By reintroducing the core of shamanism in contemporary form, these essays shape a powerful means of healing that combines the direct contact with the inner psyche one finds in shamanism with the self reflection and critical awareness of modern consciousness. The contributors draw from experiences both inside and outside the consulting room and with cultures that include the Lakota Sioux and those of the Peruvian Andes and the Hawaiian Islands. The focus is on those aspects of shamanism most useful and relevant to the modern practice of depth psychology. These explorations bring the young practice of analytical psychology into perspective as part of a much more ancient heritage of shamanistic healing. *Embracing the Anaconda* Anita Carrasco, 2020-05-20. Drawing on extensive ethnographic research, Anita Carrasco examines the socio environmental impacts of contemporary mining on the Atacameño as an indigenous community in northern Chile and their home in the Atacama Desert, one of the driest regions in the world. Carrasco describes the impacts of short term mining corporations like Anaconda Copper that arrived, destroyed and departed and explains the positive and negative memories of those left behind. *Embracing the Anaconda: A Chronicle of Atacameño Life and Mining in the Andes* is recommended for students and scholars of anthropology, sociology, environmental studies, race and ethnic studies and Latin American studies. **Domesticated: Evolution in a Man-Made World** Richard C. Francis, 2015-05-25. Without domestication, civilization as we know it would not exist. Since that fateful day when the first wolf decided to stay close to human hunters, humans and their various animal companions have thrived far beyond nearly all wild species on earth. Tame-ness is the key trait in the domestication of cats, dogs, horses, cows and other mammals from rats to reindeer. Surprisingly, with selection for tame-ness comes a suite of seemingly unrelated alterations including floppy ears, skeletal and coloration changes and sex differences. It's a package deal known as the domestication syndrome, elements of which are also found in humans. Our highly social nature, one of the keys to our evolutionary success, is due to our own tame-ness. In *Domesticated*, Richard C. Francis weaves history and anthropology with cutting edge ideas in genomics and evo-

devo to tell the story of how we domesticated the world and ourselves in the process **Finnish Settler Colonialism in North America** Rani-Henrik Andersson, Janne Lahti, 2022-12-29 Finnish Settler Colonialism in North America reinterprets Finnish experiences in North America by connecting them to the transnational processes of settler colonial conquest far settlement elimination of natives and capture of terrestrial spaces Rather than merely exploring whether the idea of Finns as a different kind of immigrant is a myth this book challenges it in many ways It offers an analysis of the ways in which this myth manifests itself why it has been upheld to this day and most importantly how it contributes to settler colonialism in North America and beyond The authors in this volume apply multidisciplinary perspectives in revealing the various levels of Finnish involvement in settler colonialism In their chapters authors seek to understand the experiences and representations of Finns in North American spatial projects in territorial expansion and integration and visions of power They do so by analyzing how Finns reinvented their identities and acted as settlers participated in the production of settler colonial narratives as well as benefitted and took advantage of settler colonial structures Finnish Settler Colonialism in North America aims to challenge traditional histories of Finnish migration in which Finns have typically been viewed almost in isolation from the broader American context not to mention colonialism The book examines the diversity of roles experiences and narrations of and by Finns in the histories of North America by employing the settler colonial analytical framework
