Reinventing Communication:

Reinventing Communication Mr Mark Phillips, 2014-04-28 In his ground breaking book Reinventing Communication Mark Phillips shows how even the most mature organization can fail to deliver successful projects and worse how this can lead to an organization's demise. With clear examples Mark reveals the underlying principles at work and introduces a revolutionary new technique for harnessing the power of communication to ensure long term success. For organizations of all sizes this book changes the way we think about management and leadership. Mark makes his case by looking at teams and individuals that set out to deliver ambitious achievements in complex and challenging environments. We meet the leadership team that built the F 18 Super Hornet fighter jet one of the US Navy's most successful programs. We discover the untraditional approach to risk used in building a new terminal at London's Heathrow airport. We draw lessons on corporate survival from the cat and mouse fight against IED's in Afghanistan and are introduced to a website where online video gamers solved a critical piece of the AIDS puzzle using their gaming prowess. Reinventing Communication is about creating the conditions for performance and attaining long term success. Whether a start up, a global enterprise or a government agency this book shows us how to deliver ambitious achievements by getting communication right. It is a book that no manager, leader or innovator should be without.

Reinventing Strategy Willie Pietersen, 2002-10-15 At last a proven system for developing the strategic innovations every company needs to compete and win. As everyone knows today's unprecedented rate of business change demands new levels of strategic insight and adaptability. Reinventing Strategy is the first practical systematic guide to creating an adaptive enterprise showing how companies around the world are using the Strategic Learning approach to consistently out think, out maneuver and out perform their competition. As Willie Pietersen explains companies that aspire to long term success must develop and implement strategy as part of a continuous four step cycle: Learn, Focus, Align, Execute and he offers dozens of provocative anecdotes and case studies illustrating how to implement it at every level of an organization. Written with unusual clarity, frankness and wit Reinventing Strategy will change the way managers everywhere approach their greatest and most important challenge: the need to make strategy into a tool for ongoing corporate renewal.

Reinventing Business Models Henk Volberda, Frans van den Bosch, Kevin Heij, 2017-11-17 Although research on business model innovation is flourishing internationally many important questions on the how, what and when of this process remain largely unanswered particularly in regard to the role of top management. This book answers some of those pressing questions by taking a deliberately managerial perspective. Based on new and original findings derived from a survey among firms from various industries and several case studies including DSM, NXP Semiconductors, Randstad and TomTom the authors provide new insights into how and when managers can change a firm's business model. They turn their attention particularly to one key question: is it better to replicate existing models or develop new ones? Business model renewal is regarded as being

especially vital in highly competitive environments Nonetheless whatever the environment high levels of both replication and renewal will be key for a firm to succeed The book looks at four levers that can be used by managers to innovate their business model management itself organizational structure technology and co creation with external parties It discusses the individual effects of these levers on business model replication and renewal It also analyses specific combinations that strengthen business model innovation including those which are technology oriented internally oriented externally oriented and those which combine all of the levers in an integrated way *Vehicle Communication*, 2013-10-01 Project Communications Connie Plowman, Jill Diffendal, 2020-07-24 This book presents a new way to look at communication within projects It combines real world examples and practical tips with theory research and professional standards you can apply to any size and type of project Communication is vital for project success Experts know it Industry wide research verifies it Yet projects continue to fail because of poor communication As a result stakeholders and organizations don't realize the benefits of their projects and project teams This book presents a new way to look at communication within projects It combines real world examples and practical tips with theory research and professional standards you can apply to any size and type of project Gain actionable insights into identifying your audience choosing the right tools managing change and handling conflict Expand your professional toolkit with templates activities and resources Develop your project communications expertise with reflective questions and recommendations Whether you are a project manager team member project sponsor or stakeholder this book is for you For educators the book is ideal for students studying project management and related fields Make your project communications a critical factor in your project success *REINVENTING OURSELVES: COLLABORATIVE RESEARCH INITIATIVES BETWEEN SINGAPORE AND US BUSINESS SCHOOLS* MICHAEL CONNOR, PRISCILLA S.
