Peirce's Philosophical Perspectives Vincent G. Potter, 2018-09-18 This collection focuses primarily on Peirce's realism, pragmatism, and theism with attention to his tychism and synechism

The Iconic Logic of Peirce's Graphs Sun-Joo Shin, 2002 A case study of multimodal systems and a new interpretation of Charles S. Peirce's theory of reasoning and signs based on an analysis of his system of Existential Graphs At the dawn of modern logic Charles S. Peirce invented two types of logical systems: one symbolic and the other graphical In this book Sun Joo Shin explores the philosophical roots of the birth of Peirce's Existential Graphs in his theory of representation and logical notation Shin demonstrates that Peirce is the first philosopher to lay a solid philosophical foundation for multimodal representation systems Shin analyzes Peirce's well-known but much-criticized nonsymbolic representation system She presents a new approach to his graphical system based on her discovery of its unique nature and on a reconstruction of Peirce's theory of representation By seeking to understand graphical systems on their own terms she uncovers the reasons why graphical systems and Existential Graphs in particular have been underappreciated among logicians Drawing on perspectives from the philosophy of mind, cognitive science, logic, and computer science Shin provides evidence for a genuinely interdisciplinary project on multimodal reasoning

The Contemporary Relevance of John Dewey's Theories on Teaching and Learning Julianna Ávila, AG Rud, Leonard Waks, Emer Ring, 2021-10-26 Through expert analysis this text proves that John Dewey's views on efficiency in education are as relevant as ever By exploring Deweyan theories of teaching and learning the volume illustrates how they can aid educators in navigating the theoretical and practical implications of accountability, standardization, and assessment The Contemporary Relevance of John Dewey's Theories on Teaching and Learning deconstructs issues regarding accountability mechanisms, uniform assessment systems, and standardization processes through a Deweyan lens Connecting the zeitgeist of the era from which Dewey's ideas emerged and current global political, social, and economic contexts the book emphasizes the importance of resilient systems in reconciling the tension between standardized assessments and individual student development Contributors provide insights from a range of settings across Pre-K, primary, secondary, and higher education and address topics including teacher agency, voice, leadership, and democracy The volume will be of interest to scholars, researchers, and academics with an interest in philosophy of education, education policy, and the impact of neoliberal agendas, as well as teaching and learning more broadly

The Question of Hermeneutics T.J. Stapleton, 2012-12-06 by Pierre Kerszberg

Joseph J. Kockelmans: A Biographical Note Joseph Kockelmans was born on December 1, 1923, at Meerssen in the Netherlands In 1951 he received his doctoral degree in philosophy from the Institute for Medieval Philosophy, Angelico, Rome Earlier on he had earned a Baccalaureate and a Licence from the same institution Upon his return to the Netherlands he engaged in a series of postdoctoral studies His first subject was mathematics which he studied under H. Busard who taught at the Institute of Technology at Venlo 1952-55 A major turning point then occurred when from 1955 to 1962 his postdoctoral research

centered simultaneously around physics under A D Fokker at the University of Leyden and phenomenology under H L Van Breda at the Husserl Archives of the University of Louvain Still in the Netherlands his first position as professor of philosophy was at the Agricultural University of Wageningen from 1963 to 1964 Even though he had been a Visiting Professor at Duquesne University in 1962 the year 1964 marked the actual beginning of his career in the United States He began by holding a professorship at the New School for Social Research in New York 1964 65 Before establishing himself permanently at the Pennsylvania State University from 1968 onward where he became a Distinguished Professor of Philosophy in 1990 he also held a professorship at the University of Rittsburgh from 1965 to 1968 Peirce's Theory of Signs T. L.

Short,2007-02-12 In this book T L Short corrects widespread misconceptions of Peirce s theory of signs and demonstrates its relevance to contemporary analytic philosophy of language mind and science Peirce s theory of mind naturalistic but nonreductive bears on debates of Fodor and Millikan among others His theory of inquiry avoids foundationalism and subjectivism while his account of reference anticipated views of Kripke and Putnam Peirce s realism falls between internal and metaphysical realism and is more satisfactory than either His pragmatism is not verificationism rather it identifies meaning with potential growth of knowledge Short distinguishes Peirce s mature theory of signs from his better known but paradoxical early theory He develops the mature theory systematically on the basis of Peirce s phenomenological categories and concept of final causation The latter is distinguished from recent and similar views such as Brandon s and is shown to be grounded in forms of explanation adopted in modern science

Ernst Cassirer and the Autonomy of Language Gregory S. Moss,2014-11-12 Ernst Cassirer and the Autonomy of Language examines the central arguments in Cassirer s first volume of the Philosophy of Symbolic Forms Gregory Moss demonstrates both how Cassirer defends language as an autonomous cultural form and how he borrows the concept of the concrete universal from G W F Hegel in order to develop a concept of cultural autonomy While Cassirer rejected elements of Hegel s methodology in order to preserve the autonomy of language he also found it necessary to incorporate elements of Hegel s method to save the Kantian paradigm from the pitfalls of skepticism Moss advocates for the continuing relevance of

Cassirer's work on language by situating it within the context of contemporary linguistics and contemporary philosophy. This book provides a new program for investigating Cassirer's work on the other forms of cultural symbolism in his *Philosophy of Symbolic Forms* by showing how the autonomy of culture is one of the leading questions motivating Cassirer's philosophy of culture. With a thorough comparison of Cassirer's theory of symbolism to other dominant theories from the twentieth century including Heidegger and Wittgenstein, this book provides valuable insight for studies in philosophy of language, semiotics, epistemology, psycholinguistics, continental philosophy, Neo-Kantian philosophy, and German idealism.
