Cowan, 2012-08-10 Through his personality ingenuity and ability he initiated a resistance movement which ultimately secured the nation's freedom and independence Yet Wallace was reviled opposed and eventually betrayed by the nobility in his own day to re surface in the epic poetry of the fifteenth century as a champion and liberator Eventually his legend overtook the historical reality a process which has continued for centuries as manifested in modern media and film A team of leading historians and critics from both Scotland and England investigate what is known of the medieval warrior's career from contemporary sources most of which unusually for a national hero were created by his enemies His reputation from the time of his horrendous execution to the present is examined to ascertain what the figure of Wallace meant to different generations of Scots Too dangerous perhaps for his own era he became the supreme Scottish hero of all time the archetypal Scot who would teach kings and nobles where their duty lay and who would live free or freely die for the liberty of his nation **Medieval Warfare** Everett U. Crosby, 2000-08-14 Homo sapiens homo pugnans and so it has been since the beginning of recorded history In the Middle Ages especially armed conflict and the military life were so much a part of the political and cultural development that a general account of this period is in large measure a description of how men went to war **Birkenhead Park** Robert

Lee,2024-04-15 When it was officially opened on Easter Monday 5 April 1847 Birkenhead Park became the first municipally funded park in Britain It was a pioneer in the development of urban public parks designed for use by everyone irrespective of social class ethnicity or age In terms of town planning it demonstrated the importance of including green infrastructure in urban development as a vital contribution to public health and well being Paxton s design for the park was heralded as a masterpiece of human creative genius it served as a vehicle for the global transmission of the English landscape school and led to the creation of numerous public parks everywhere most famously Central Park New York incorporating many of Paxton s design features This book addresses a long standing gap in the Park s historiography Regarded as one of the greatest wonders of the age the Park is an important contribution to nineteenth century landscape history with a local focus but of international significance The book also seeks to interpret the Park s development until 1914 within a political and cultural context drawing on economic and social history as a means of explaining why it was not until the late nineteenth century that it finally became a focal point for recreation and public health Ride of the Second Horseman Robert L.

O'Connell,1997-10-23 Accurst be he that first invented war wrote Christopher Marlowe a declaration that most of us would take as a literary not literal construction But in this sweeping overview of the rise of civilization Robert O Connell finds that war is indeed an invention an institution that arose due to very specific historical circumstances an institution that now verges on extinction In Ride of the Second Horseman O Connell probes the distant human past to show how and why war arose He begins with a definition that distinguishes between war and mere feuding war involves group rather than individual issues political or economic goals and direction by some governmental structure carried out with the intention of lasting results With this definition he finds that ants are the only other creatures that conduct it battling other colonies for territory and slaves But ants unlike humans are driven by their genes in humans changes in our culture and subsistence patterns not our genetic hardware brought the rise of organized warfare O Connell draws on anthropology and archeology to locate the rise of war sometime after the human transition from nomadic hunting and gathering to agriculture when society split between farmers and pastoralists Around 5500 BC these pastoralists initiated the birth of war with raids on Middle Eastern agricultural settlements The farmers responded by ringing their villages with walls setting off a process of further social development intensified combat and ultimately the rise of complex urban societies dependent upon warfare to help stabilize what amounted to highly volatile population structures beset by frequent bouts of famine and epidemic disease In times of overpopulation the armies either conquered new lands or self destructed leaving fewer mouths to feed In times of underpopulation slaves were taken to provide labor O Connell explores the histories of the civilizations of ancient Sumeria Egypt Assyria China and the New World showing how war came to each and how it adapted to varying circumstances On the other hand societies based on trade employed war much more selectively and pragmatically Thus Minoan Crete long protected from marauding pastoralists developed a wealthy mercantile society marked by unmilitaristic attitudes equality

between men and women and a relative absence of class distinctions In Assyria by contrast war came to be an end in itself in a culture dominated by male warriors Despite the violence in the world today O Connell finds reason for hope The industrial revolution broke the old patterns of subsistence war no longer serves the demographic purpose it once did Fascinating and provocative Ride of the Second Horseman offers a far reaching tour of human history that suggests the age old cycle of war may now be near its end
