Look Inside Your Brain:

The Scientific American Day in the Life of Your Brain Judith Horstman, Scientific American, 2009-08-31 Have you ever wondered what's happening in your brain as you go through a typical day and night? This fascinating book presents an hour by hour round the clock journal of your brain's activities. Drawing on the treasure trove of information from Scientific American and Scientific American Mind magazines as well as original material written specifically for this book, Judith Horstman weaves together a compelling description of your brain at work and at play. The Scientific American Day in the Life of Your Brain reveals what's going on in there while you sleep and dream, how your brain makes memories and forms addictions, and why we sometimes make bad decisions. The book also offers intriguing information about your emotional brain and what's happening when you're feeling love, lust, fear, and anxiety, and how sex, drugs, and rock and roll tickle the same spots. Based on the latest scientific information, the book explores your brain's remarkable ability to change, how your brain can make new neurons even into old age, and why multitasking may be bad for you. Your brain is uniquely yours, but research is showing many of its day-to-day cycles are universal. This book gives you a look inside your brain and some insights into why you may feel and act as you do. The Scientific American Day in the Life of Your Brain is written in the entertaining, informative, and easy-to-understand style that fans of Scientific American and Scientific American Mind magazine have come to expect.

Look Inside: Your Brain Ben Williams, 2011-12-01 Presents information about the brain including its structure, how it works, what it does, and how to keep it healthy. [AARP The Scientific American Healthy Aging Brain](#) Judith Horstman, 2012-05-22 AARP Digital Editions offer you practical tips, proven solutions, and expert guidance. Scientific American and Scientific American Mind have good news about getting older. AARP The Scientific American Healthy Aging Brain taps into the most current research to present a realistic and encouraging view of the well-aged brain, a sobering look at what can go wrong, and at what might help you and your brain stay healthy longer. Neurologists and psychologists have discovered the aging brain is much more elastic and supple than previously thought, and that happiness actually increases with age. While our short-term memory may not be what it was, dementia is not inevitable. Far from disintegrating, the elder brain can continue to develop and adapt in many ways and stay sharp as it ages. Offers new insights on how an aging brain can repair itself and the five best strategies for keeping your brain healthy. Shows how older brains can acquire new skills, perspective, and productivity. Dispels negative myths about aging. Explores what to expect as our brains grow older. With hope and truth, this book helps us preserve what we've got, minimize what we've lost, and optimize the vigor and health of our maturing brains. *Daily Discoveries for NOVEMBER (ENHANCED eBook)* Elizabeth Cole Midgley, 2005-03-01 In this creative book, which is another in the popular Daily Discoveries series, you'll find reasons to celebrate every day of November in your classroom. The Last Seaman Wayne Ward, 2003. In 1955, seamen still had the skills passed on from sail. A breed of their own, flamboyant schemers, drunks, some of them mad. A life at sea seen through the eyes of a deck boy who quite possibly could be the last seaman.

Intellectual Entertainments P. M. S. Hacker, 2019-10-28. Intellectual Entertainments consists of eight philosophical dialogues, each with five participants, some living, some imaginary, and some dead. The dialogues take place either in Elysium or in an imaginary Oxford Common Room. Each historical figure speaks in his own idiom, with a distinctive turn of phrase. The imaginary figures speak in the accent and idiom of their respective countries: English, Scottish, American, Australian. The themes are the nature of the mind and the relation between mind and body, the nature of consciousness and its demystification, the nature of thought and its relation to speech, and the objectivity or subjectivity of perceptual qualities such as colour, sound, smell, taste, and warmth. Each participant presents a different point of view and defends his position against the arguments of the others. No philosophical knowledge is presupposed.
