The Grammar of Graphics Leland Wilkinson, 2006-01-28 Preface to First Edition Before writing the graphics for SYSTAT in the 1980 s I began by teaching a seminar in statistical graphics and collecting as many different quantitative graphics as I could find I was determined to produce a package that could draw every statistical graphic I had ever seen The structure of the program was a collection of procedures named after the basic graph types they produced The graphics code was roughly one and a half megabytes in size In the early 1990 s I redesigned the SYSTAT graphics package using object based technology I intended to produce a more comprehensive and generic package I accomplished this by embedding graphical elements in a tree structure Rendering graphics was done by walking the tree and editing worked by adding and deleting nodes The code size fell to under a megabyte In the late 1990 s I collaborated with Dan Rope at the Bureau of Labor Statistics and Dan Carr at George Mason University to produce a graphics production library called GPL this time in Java Our goal was to develop graphics components This book was nourished by that project So far the GPL code size is under half a megabyte
