Looking Into Primary Headship A Research Based Interpretation:

Looking Into Primary Headship Geoff Southworth, 2002-11-01 This is both a study of leadership and a research methods text. It offers an analytical description of a primary headteacher at work over the course of one school year. Using a mix of participant observation and interviews, the book provides a portrait of this head's approach to his work, his background, beliefs, the school as a context, what he did, how he dealt with change and development, power, and the personal dimension of headship. The portrait is matched to the contemporary literature and an hypothesis is formulated about primary headship and is then used to critique existing ideas about school leadership. The book also suggests ways of developing heads and school teachers.

Looking Into Primary Headship Geoff Southworth, 2002-11 Offers an analytical description of a primary headteacher at work over the course of one school year using a mix of participant observation and interviews. School Leadership and Administration Allan Walker, Clive Dimmock, 2012-11-12 This text calls for a broader approach to comparative educational administration, one which uses culture as the principle means of analysis. The articles collected by Allan Walker and Clive Dimmock detail the educational practices and outcomes of other systems while taking into account the mediating influence of culture. In this way, these essays stress the specific aspects of the cultures studied and map out common ground for the study of administrators' values, beliefs, and actions. Each entry provides names and addresses of the researchers, a detailed abstract, the source, and amount of the grant, where applicable, the length of the project, and details of published material about the research. Senior Management Teams in Primary Schools Lynda Huckman, Michael Wallace, 2005-08-17

Recent years have seen dramatic developments in the way schools are structured and much greater emphasis placed on managing your school effectively. Every education professional knows how demanding these new methods can be, but they can also reinforce a sense of purpose and control. *Senior Management Teams in Primary Schools* looks at how positive teamwork can be achieved within your school and illustrates the benefits it brings. Most teachers involved in managing their school will recognise the situations detailed in the case studies contained in the book: the forceful head, the overworked middle managers, the meetings that try to wade through the mountains of administration that face the modern teacher. You will find practical advice, clear guidelines, case studies from schools that are involved in the process of good practice. This book will organise you in your approach and ensure that you reap the benefits of teamwork while avoiding the pitfalls. **Primary School**

Leadership for Change and School Reform Kathryn Riley, Karen Seashore Louis, 2013-01-11 School reform is a top priority for governments today This timely and challenging book edited by leading international researchers Kathryn Riley and Karen Seashore Louis offers a rich comparative perspective on leadership for change and school reform Contributors form North America Europe and Australia

demonstrate how school leadership is influenced by global pressures differing national and state contexts and local concerns. They illustrate the limitations of reform initiatives which focus on school leaders to the exclusion of the many other organisations which affect schools such as national and local governments, professional associations and school communities. This book raises some important questions such as: How can school leaders create intelligent thinking schools? How can leadership and learning be linked together? What are the characteristics of effective local education authorities and school districts? What is the role of teacher organisations in educational reform and change? What happens if businesses, teachers, parents and local communities have different views of what makes a good school? The text illustrates the ways in which leadership is rooted in learning and identifies new directions for school leadership. It challenges conventional notions of leadership, offering an expanded view which sees leadership just as an individual role-based function but as a network of relationships among people, structures and cultures. This lively and provocative book should be read by all those interested in education reform.
