Lost Bombs:

The Day We Lost the H-Bomb Barbara Moran, 2009-04-28 In *The Day We Lost the H Bomb* science writer Barbara Moran marshals a wealth of new information and recently declassified material to give the definitive account of the Cold War's biggest nuclear weapons disaster. On January 17, 1966, a U.S. Air Force B-52 bomber exploded over the sleepy Spanish farming village of Palomares during a routine airborne refueling. The explosion killed seven airmen and scattered the bomber's payload of four unarmed thermonuclear bombs across miles of coastline. Three of the rogue H-bombs were recovered quickly. Tracking down the fourth required the largest search and salvage operation in U.S. military history. Moran traces the roots of the Palomares incident, giving a brief yet in-depth history of the Strategic Air Command and its eccentric larger-than-life commander General Curtis LeMay, whose massive deterrence strategy kept armed U.S. bombers aloft at all times. Back on the ground, Moran recounts the myriad social and environmental effects of an accident that spread radioactive debris over hundreds of acres of Spanish farmland, alarmed America's strategic allies, and damaged Spanish-American diplomatic relations. As the American military floundered in its attempt to keep the story secret, the events in Spain sometimes took on farcical overtones. Constant global media hype was fueled by the hit James Bond movie *Thunderball* with its plot about an atomic weapon lost at sea. In addition, there were the unwanted attentions of a rusty-hulled Soviet surveillance ship and even awkward public relations stunts complete with American diplomats in swim trunks. *The Day We Lost the H Bomb* is a singular work of military history that effortlessly and dramatically captures Cold War hysteria, high-stakes negotiations, and the race to clean up a disaster of unprecedented scope. At once epic and intimate, this book recounts in stunning detail the fragile peace Americans had made with nuclear weapons and how the specter of imminent doom forced the United States to consider not only what had happened over Palomares but what could have happened. This forgotten chapter of Cold War history will grip readers with the tension of that time and reawaken the fears and hopes of that dangerous era. [Lost Nuke](#) Dirk Seipter, 2016 A story seemingly drawn out of a Hollywood action script. Gripping stuff. Canada's History. Just before midnight on February 13, 1950, three engines of a US Air Force B-36 intercontinental bomber caught fire over Canada's northwest coast. The crew jumped, and the plane ditched somewhere in the Pacific Ocean. Almost four years later, the wreck of the bomber was found accidentally in a remote location in the coastal mountains of British Columbia, three hours flying time in the opposite direction of where it was supposed to have crashed. After years of silence, the United States finally admitted to losing its very first nuclear bomb; the incident was its first Broken Arrow, the code name for accidents involving nuclear weapons. But was the bomb dropped and exploded over the Inside Passage, or was it blown up at the aircraft's resting place in the mountains? This Cold War era tale follows the last flight of bomber 075 and attempts to unravel the real story behind more than fifty years of secrecy, misdirection, and misinformation. **Meeting SECURE** Daniel M. Yulo, 2023-04-18 *Meeting SECURE* Someone is killing dolphins; the crew of a salvage ship is found murdered after a mysterious object is salvaged from
