The Limits of Medicine Edward S. Golub,1997-05 Edward Golub distinguished researcher and former professor of immunology shows that major advances in medicine are caused by changes in the way scientists describe disease Bleeding sweating and other treatments we consider barbaric were standard treatments for centuries because they conformed to a conception of disease shared by patients and doctors Scientific breakthroughs in the understanding of disease in the nineteenth century transformed treatment and the goals of medicine Golub argues that the ongoing revolution in molecular genetics has opened the door to

the biology of complexity again transforming our view of disease This thought provoking timely book reveals a crucial but overlooked role of science in medicine and offers a new vision for the goals of both science and medicine as we enter the twenty first century Science and Christianity: Close Partners or Mortal Enemies? Dave Armstrong,2012-02-13 It s very fashionable nowadays to assert that Christianity and science are antithetical or that God has been ruled out of science or disproven particularly by Darwinian evolution or that science is based on reason and evidence whereas religion being faith based supposedly cares little or nothing for same or that one cannot consistently be a Christian and also a real scientist I shall contend that not only are science and Christianity completely compatible but that modern science would not have even gotten off the ground if it hadn t been for medieval scholastic Catholic thought I shall demonstrate that the foundations of modern science in the 16th century were overwhelmingly Christian and theistic The notion that science and religion are fundamentally incompatible is ludicrous and would obliterate science at its very roots Includes mini biographies of 293 scientists and a chart of 115 scientific fields of study founded or extraordinarily advanced by Christian or theistic scientists
