Love And Hate In The Analytic Setting:

Love and Hate in the Analytic Setting Glen O. Gabbard, 2000-04-01 Passionate feelings of love and hate are stirred in psychotherapy Paradoxically these passions may either undermine the therapist catastrophically or serve as the crucible in which profound understanding is forged Transferences and countertransferences of love and hate occur on a spectrum that includes unobjectionable negative and positive feelings relatively benign forms of love and hate and more malignant intractable versions of love and hate that present formidable challenges to the therapist Each of these variations is explored in different chapters of this book Gender configurations gender fluidity adolescent transferences the link between love and lust and passive forms of hating are among the topics discussed Most of all the author noted psychoanalyst Glen Gabbard depicts what it is like to be in the eye of the hurricane when passions are aroused He provides a practical yet theoretically sophisticated guide to the management of love and hate as they are experienced by both patient and therapist

Hate and Love in Psychoanalytical Institutions Jurgen Reeder, 2020-10-13 In *Hate and Love in Psychoanalytic Institutions* Jurgen Reeder investigates the professional superego of the psychoanalyst This superego designates a prescriptive and prohibiting role that the individual must play within the parameters of a certain occupational sphere The prescriptive aspect works like a professional ideal and in this respect the superego can be said to sustain a professional ethos or spirit commanding what the professional should know and what his or her relations to clients and colleagues should resemble It helps to bind the members of the analytical community together The prohibiting aspect installs a vigilant inner eye It offers necessary protection against detrimental aberrations but it also evokes fantasies of critical or condemning colleagues who might have insight into what transpires within the walls of the analyst's own private practice leading to a reluctance to communicate openly about the analytical experience In this sense the professional superego contributes to the paranoization of collegial communication a circumstance that has a hampering effect on spontaneity and creativity in both clinical and theoretical work Jurgen Reeder's groundbreaking research uncovering the dynamics of the professional superego in psychology psychotherapy and psychoanalysis can be applied to other professions as well including social work medicine education law and the ministry

Psychoanalytic Collisions Joyce Anne Slochower, 2013-05-13 In this beautiful work of reflection and self reflection Joyce Slochower wrestles with a seldom acknowledged dimension of being a psychoanalyst the dialectic between illusions and less ideal realities that complicate the analyst's sense of who she is and of how best to meet her clinical obligations *Psychoanalytic Collisions* details the various ways in which the analyst's wishes both professional and personal collide with the less than perfect actualities of everyday clinical work The collisions in question are often rooted in the analyst's own illusions illusions of therapeutic possibility in the face of ordinary human existence or illusions of therapeutic selflessness in the face of one's own immutably self centered humanity Such collisions may complicate nonclinical professional activities such as writing in which the analyst's desire to develop a personal idiom collides with self doubt and the imagined rebuff of teachers and colleagues Other collisions coalesce dyadically in the consulting room They may reflect sharp dissonance between what the patient needs the analyst to feel and what the latter actually feels as in discrepant experiences of erotic desire They may grow out of colliding idealizations of analyst and patient each of the other And they may arise in the wake of traumatizing life events that destroy the shared illusions on which treatment has rested In finely wrought examinations of these eventualities Slochower is guided by the belief that collisions are intrinsic both to forging an analytic identity and to practicing in a manner consonant with that identity *Psychoanalytic collisions* she enjoins often cannot be resolved but they can usually be productively engaged And the very act of engagement be it establishing new grounds for collaboration in the wake of real world catastrophe or wrestling with clinical impasse grounded in the radically divergent expectations of analyst and patient or owning up to what Slochower terms secret

The Misuse of Persons Stanley J. Coen, 2013-11-26 In this major contribution to contemporary psychoanalysis Stanley Coen illuminates a heretofore undescribed character structure especially resistant to analytic process Pathologically dependent patients for Coen are identified not by surface character traits but by their response to the intrapsychic demands of analysis Such patients remain in treatment sometimes contentedly sometimes amid rebukes and complaints but they do not profit from it Their inability to use insight especially in the transference is matched by a proclivity for sadomasochistic enmeshment In analysis this tendency translates into a continuing dependent attachment to the analyst In exploring the genetic roots of pathological dependency Coen ranges beyond extant trauma theories in describing a pattern of parent child interaction in which repetitive behavioral enactments substitute for the acceptance and resolution of conflicts both intrapsychic and interpersonal In analysis pathologically dependent patients use the analyst as they have come to use significant others throughout their lives as part of a defensive structure characterized by repetitive enactments and a refusal to face what is wrong with them This misuse of others is infused with destructiveness hostility and rage and the analyst necessarily becomes the object of these powerful emotions With such patients then the road to therapeutic progress invariably passes through the analysis of mutual transferential and countertransferential hate the patient's tempting invitations to collusion and avoidance notwithstanding

Moving Beyond the Comfort Zone in Psychotherapy Nancy A. Bridges, 2005 Making emotional contact and inviting patients to use therapeutic relationships for their relational and developmental aims is a risky and intimate proposition But as the author of this book argues therapists must be willing to engage deeply with patients to work from within the relationship extending the therapeutic relationship to reach the private experience of self and other and offer new relational experience Moving beyond traditional thinking the author presents a relational approach that integrates psychoanalytic thinking with the latest findings from infant research to give therapists the theoretical framework to orient the treatment and maintain psychic equilibrium and safety during times of arousing and destabilizing affect and relational scenarios A therapeutic stance which is fluid and open to intrapsychic and interpersonal influence allows for the experience and elaboration of complex unconscious affects and shifting points of identification Compelling clinical narratives bring the reader into the consulting room and show how the therapist may forge deep emotional connection within a bounded therapeutic relationship that relies upon mutual influence and self revelation and opens up relational space to ultimately rearrange a patient's experience of self and other

Modell, 1990 Nearly a century has passed since Freud s theories unleashed a revolution in our understanding of the human psyche Yet as Arnold Modell firmly points out we still do not possess a theory that explains how psychoanalysis works Other Times Other Realities provides brilliant insight into this perplexing problem and lays the foundation for a comprehensive theory of psychoanalytic treatment Modell s careful consideration of Freudian theory the interpretations of contemporary ego psychology and the contribution of object theory discloses the changing significance of the fundamental elements of the therapeutic process In Other Times Other Realities readers will discover an illuminating synthesis of concepts underlying the various interpretations of the psychoanalytic process

Love, Hate and Knowledge Robert Waska, 2018-04-17 This book introduces the clinical concept of analytic contact This is a term that describes the therapeutic method of investigation that makes up psychoanalytic treatment The field has been in debate for decades regarding what constitutes psychoanalysis This usually centers on theoretical ideals regarding analyzability goals or procedure and external criteria such as frequency or use of couch Instead the concept of analytic contact looks at what takes place with a patient in the clinical situation Each chapter in this book follows a wide spectrum of cases and clinical situations where hard to reach patients are provided the best opportunity for health and healing through the establishment of analytic contact This case material closely tracks each patient s phantasies and transference mechanisms which work to either increase oppose embrace or neutralize analytic contact In addition the fundamental internal conflicts all patients struggle with between love hate and knowledge are represented by extensive case reports
