Love Between Equals A Philosophical:

Love between Equals John Wilson, 2016-07-27 This book is a philosophical study of love between equals intended for the general reader The Introduction explains the importance of analytic philosophy Subsequent chapters deal with 1 love as desire or need 2 love as intrinsic friendship 3 the politics of love 4 altruism and paranoia 5 justice and communication 6 sex and 7 the value in loving an equal together with some remarks on the human condition in general and the importance of reason in dealing with it A brief list of further reading is appended Dictionary of Twentieth-Century British Philosophers Stuart Brown, 2005-06-01 This is a two volume work with entries on individuals who made some contribution to philosophy in the period 1900 to 1960 or soon after The entries deal with the whole philosophical work of an individual or in the case of philosophers still living their whole work to date Typically the individuals included have been born by 1935 and by now have made their main contributions Contributions to the subject typically take the form of books or journal articles but influential teachers and people otherwise important in the world of philosophy may also be included The dictionary includes amateurs as well as professional philosophers and where appropriate thinkers whose main discipline was outside philosophy There are special problems about the term British in the twentieth century partly because of human migration partly because of decolonialization and the changing denotation of the term The intention has been to include not only those who were British subjects at least for a significant part of their lives even if they mostly lived outside what is now the U K but also people who spent a significant part of their lives in Britain itself irrespective of their nationality or country of origin In the first category are included for instance a number of people who were born and educated in Britain but who subsequently taught in universities abroad In the second category are included those who were born elsewhere but who came to Britain and contributed to its philosophical culture The Concept of Love in 17th and 18th Century Philosophy Herman de Dijn,2007 Love is joy with the accompanying idea of an external cause Spinoza's definition of love manifests a major paradigm shift achieved by seventeenth century Europe in which the emotions formerly seen as normative forces of nature were embraced by the new science of the mind This shift has often been seen as a transition from a philosophy laden with implicit values and assumptions to a more scientific and value free way of understanding human action But is this rational approach really value free Today we tend to believe that values are inescapable and that the descriptive mechanical method implies its own set of values Yet the assertion by Spinoza Malebranche Leibniz and Enlightenment thinkers that love guides us to wisdom and even that the love of a god who creates and maintains order and harmony in the world forms the core of ethical behavior still resonates powerfully with us It is evidently an idea Western culture is unwilling to relinquish This collection of insightful essays offers a range of interesting perspectives on how the triumph of reason affected not only the scientific philosophical understanding of the emotions and especially of love but our everyday understanding as well Feminist Perspectives in Philosophy Morwenna Griffiths, Margaret Whitford, 1988 excellent Especially insightful are

articles on ethics and gender autonomy and pornography feelings and a responsible and democratic epistemology Choice The essays in this book introduce to American readers the work of a group of British feminist philosophers representing both the Continental and the analytic traditions who argue that philosophy is in urgent need of a feminist perspective beyond Theoria toward Theosis Justin A. Davis, 2024-06-10 Moving Beyond Theoria Towards Theosis focuses on the telos of man as understood in Plato's theoria envisioned in the allegory of the cave and early Christian reinterpretation of theoria as theosis In his famed allegory of the cave Plato maintains that real life exists beyond our base perceptions of reality and is found in the realm of ideas Theoria is eternal rest in this realm and is understood as the telos of mankind Plato s theoria underwent change as it was reinterpreted under middle Platonic and neo Platonic thought These systems incorporated a more mature idea of the divine than Plato but still minimized the material world This book explores how early Christianity inherited Plato's cosmology and terminology Theoria was also reinterpreted within the Christian context Eventually the term was abandoned for theosis Theosis is beyond theoria as it includes contemplation of the forms as well as union with the source of the forms and the affirmation of the material realm In this volume Justin A Davis shows how the Orthodox use of icons can be key to understanding theosis. The icon is a material object that connects to a higher reality and ultimately toward union with the divine Plato's cosmology is collapsed and transfigured in union with the uncreated energy of God Icons are the depiction of spiritual ascesis and the new telos of man theosis Emotion and Cognitive Life in Medieval and Early Modern Philosophy Martin Pickavé, Lisa Shapiro, 2012-10-04 This volume explores emotion in medieval and early modern thought and opens a contemporary debate on the way emotions figure in our cognitive lives Thirteen original essays explore the key themes of emotion within the mind the intentionality of emotions emotions and action and the role of emotion in self understanding and social situations The Practical Philosophy Robert Lewis Dabney, 1897 Feminism and Philosophy Mary Vetterling-Braggin, Frederick Elliston, Jane English, 1977 Contemporary philosophers explore both sides of the moral issues involved in feminism sex roles the language of sexism preferential hiring marriage rape and abortion and the Perennial Philosophy Samuel Bendeck Sotillos, 2013-05-01 Modern psychology is at an impasse as it searches anxiously for new therapies to address the increasing occurrence of mental illness in contemporary society In this groundbreaking anthology leading authors from the perennialist school including Huston Smith Seyyed Hossein Nasr and Frithjof Schuon draw on the age old insights of the world's wisdom traditions to argue that modern psychology behaviorism psychoanalysis humanistic and transpersonal psychology overlooks the specifically spiritual factors contributing to mental health and illness 50 Christan Books - Scripture, Theology, Philosophy and Spirituality (Including Christian Novels) Johann Wolfgang von Goethe, Martin Luther, Henryk Sienkiewicz, Henry Van Dyke, David Hume, James Allen, Ralph Waldo Emerson, Andrew Murray, John Bunyan, Grace Livingston Hill, Thomas Paine, Voltaire, Lew Wallace, John Milton, Charles M.
