## **Lukacs And Heidegger Towards A New Philosophy:**

Lukács and Heidegger Lucien Goldmann, 1977      **Lukács and Heidegger (Routledge Revivals)** Lucien Goldmann, 2009-11-11 This text re issues an important work by Lucien Goldmann based on his university lectures from 1967-8 and first published in English in 1977 It focusses upon two of the twentieth century's most important philosophers György Lukács and Martin Heidegger demonstrating the origins of existentialist thought in the implicit connection between the two This book represents the application of methodology already developed in *The Hidden God* and also sees Goldmann elaborating the differences between himself and Lukács for the sake of defining his own Marxist perspective      **Lukacs and Heidegger** Lucien Goldmann, 1977      *Heidegger's Volk* James Phillips, 2005 Heidegger's engagement and disillusionment with National Socialism can both be properly seen to rest on the notion of the people that he takes over from traditional German nationalism and elaborates in his philosophical critique of the modern subject      **On Heidegger's Nazism and Philosophy** Tom Rockmore, 1997-01-01 American philosopher Tom Rockmore boldly refutes suggestions that German philosopher Martin Heidegger's political stance was accidental or adopted under coercion Rockmore argues that Heidegger's thought and his Nazism are inseparably intertwined Combining extensive documentation with philosophical and historical analysis this book raises profound questions about the social and political responsibility of philosophy      **Alienation After Derrida** Simon Skempton, 2011-10-20 Alienation After Derrida rearticulates the Hegelian Marxist theory of alienation in the light of Derrida's deconstruction of the metaphysics of presence Simon Skempton aims to demonstrate in what way Derridian deconstruction can itself be said to be a critique of alienation In so doing he argues that the acceptance of Derrida's deconstructive concepts does not necessarily entail the acceptance of his interpretations of Hegel and Marx In this way the book proposes radical reinterpretations not only of Hegel and Marx but of Derridian deconstruction itself The critique of the notions of alienation and de-alienation is a key component of Derridian deconstruction that has been largely neglected by scholars to date This important new study puts forward a unique and original argument that Derridian deconstruction can itself provide the basis for a rethinking of the concept of alienation a concept that has received little serious philosophical engaged attention for several decades      *Georg Lukács's Philosophy of Praxis* Konstantinos Kavoulakos, 2018-09-20 Georg Lukács early Marxist philosophy of the 1920s laid the foundations of Critical Theory However the evaluation of Lukács philosophical contribution has been largely determined by one-sided readings of eminent theorists like Adorno Habermas Honneth or even Lukács himself This book offers a new reconstruction of Lukács early Marxist work capable of restoring its dialectical complexity by highlighting its roots in his neo-Kantian pre-Marxist period In his pre-Marxist work Lukács sought to articulate a critique of formalism from the standpoint of a dubious mystical ethics of revolutionary praxis Consequently Lukács discovered a more coherent and realistic answer to his philosophical dilemmas in Marxism At the same time he retained his neo-Kantian reservations about idealist dialectics In his reading of historical materialism he combined non-idealist non-

systematic historical dialectics with an emphasis on conscious collective transformative praxis Reformulated in this way Lukács' classical argument plays a central role within a radical Critical Theory

**Georg Lukács and the Possibility of Critical Social Ontology** Michael J. Thompson, 2019-12-16 Georg Lukács was one of the most important intellectuals and philosophers of the 20th century His last great work was a systematic social ontology that was an attempt to ground an ethical and critical form of Marxism This work has only now begun to attract the interest of critical theorists and philosophers intent on reconstructing a critical theory of society as well as a more sophisticated framework for Marxian philosophy This collection of essays explores the concept of critical social ontology as it was outlined by Georg Lukács and the ways that his ideas can help us construct a more grounded and socially relevant form of social critique This work will be of special interest to social moral and political philosophers as well as those who study critical theory social theory and Marxism It is also of interest to those working within the area of social ontology Contributors include Mario Duayer Andreas Giesbert Christoph Henning Antonino Infranca Reha Kadakal Endre Kiss Michael Morris Michalis Skomvoulis Matthew J Smetona Titus Stahl Thomas Telios Michael J Thompson Murillo van der Laan Miguel Vedda Claudius Vellay

**Genesis and Validity** Martin Jay, 2021-11-12 The essays in this collection by one of the most recognized figures in the field of intellectual history touch on a wide variety of topics ranging from the heroism of modern life to the ability of photographs to lie and explore the fraught connection between the truth of history and the truthfulness of historians

**Marxist Humanism and Communication Theory** Christian Fuchs, 2021-03-16 This book outlines and contributes to the foundations of Marxist humanist communication theory It analyses the role of communication in capitalist society Engaging with the works of critical thinkers such as Erich Fromm E P Thompson Raymond Williams Henri Lefebvre Georg Lukács Lucien Goldmann Günther Anders M N Roy Angela Davis C L R James Rosa Luxemburg Eve Mitchell and Cedric J Robinson the book provides readings of works that inform our understanding of how to critically theorise communication in society The topics covered include the relationship of capitalism racism and patriarchy communication and alienation the base superstructure problem the question of how one should best define communication the political economy of communication ideology critique the connection of communication and struggles for alternatives Written for a broad audience of students and scholars interested in contemporary critical theory this book will be useful for courses in media and communication studies cultural studies Internet research sociology philosophy political science and economics This is the first of five Communication and Society volumes each one outlining a particular aspect of the foundations of a critical theory of communication in society

**Critical Theory: The Basics** Martin Shuster, 2024-05-27 Critical Theory The Basics brings clarity to a topic that is confusingly bandied about with various meanings today in popular and academic culture First defined by Max Horkheimer in the 1930s critical theory now extends far beyond its original German context around the Frankfurt School and the emergence of Nazism We now often speak of critical theories of race gender anti colonialism and so forth This book introduces especially the core program of the first

generation of the Frankfurt School including Horkheimer Theodor W Adorno Erich Fromm and Herbert Marcuse and shows how this program remains crucial to understanding the problems ideologies and systems of the modern world including capitalism racism sexism and the enduring problems of colonialism It explores basic questions like What is critical theory What can critical theory be What should it be Why and how does critical theory remain vital to understanding the contemporary world including notions of self society politics art religion culture race gender and class With suggestions for further reading this book is an ideal starting point for anyone seeking an accessible but robust introduction to the richness and complexity of this tradition and to its continuing importance today *The Politics of Time* Peter Osborne, 2020-05-05 If Aristotle sought to understand time through change might we not reverse the procedure and seek to understand change through time Once we do this argues Peter Osborne it soon becomes clear that ideas such as avant garde modern postmodern and tradition which are usually only treated as markets for empirically discrete periods movements or styles are best understood as categories of historical totalization More specifically Osborne claims such ideas involve distinct temporalizations of history giving rise to conflicting politics of time His book begins with a consideration of the main aspects of modernity and develops through a series of critical engagements with the major twentieth century positions in the philosophy of history He concludes with a fascinating history of the avant garde intervention into the temporality of everyday life in surrealism the situationists and the work of Henri Lefebvre Rethinking The Subject James Faubion, 2018-02-06 Since the early seventies European thinkers have departed notably from their predecessors in order to pursue analytical programs more thoroughly their own Rethinking the Subject brings together in one volume some of the most influential writings of Foucault Habermas Bourdieu Pizzorno Macfarlane and other authors whose ideas have had a worldwide influence in recent social theory This anthology is testament to the central importance of three contemporary themes each familiar to earlier thinkers but never definitively formulated or resolved The first two concern the nature and modalities of power and legitimacy in society The third and most fundamental deals with the nature and modalities of the self or subject These themes owe their special contemporary relevance to an array of events from the collapse of colonialism to the birth of test tube babies James Faubion's introduction traces the historical context of these influential events and themes It also traces the lineaments of a still inchoate intellectual movement of which the anthology's contributors are the vanguard Whether modernist or post modernist this movement leads away from a world constituting subject which in one guise or another has served as the ontological ground of social reflection and research since Kant It points instead toward ontological pluralism and toward polythetic diagnostics of heterogeneous forces that constitute a multiplicity of worlds and subjects A Sense of Things Bill Brown, 2010-12-28 In May 1906 the Atlantic Monthly commented that Americans live not merely in an age of things but under the tyranny of them and that in our relentless effort to sell purchase and accumulate things we do not possess them as much as they possess us For Bill Brown the tale of that possession is something stranger than the history of

a culture of consumption It is the story of Americans using things to think about themselves Brown s captivating new study explores the roots of modern America s fascination with things and the problem that objects posed for American literature at the turn of the century This was an era when the invention production distribution and consumption of things suddenly came to define a national culture Brown shows how crucial novels of the time made things not a solution to problems but problems in their own right Writers such as Mark Twain Frank Norris Sarah Orne Jewett and Henry James ask why and how we use objects to make meaning to make or remake ourselves to organize our anxieties and affections to sublimate our fears and to shape our wildest dreams Offering a remarkably new way to think about materialism *A Sense of Things* will be essential reading for anyone interested in American literature and culture

Decolonizing Time N. Shippen,2014-09-17 *Decolonizing Time Work Leisure and Freedom* demonstrates the importance of time as a central category for political theory providing not only a history of the fight for time through political feminist and critical theory but also assessing this tradition in the context of the United States

**Immanent Critique** Titus Stahl,2021-11-11 When we criticize social institutions and practices what kinds of reasons can we offer for such criticism Political philosophers often assume that we must rely on universal moral principles that are not necessarily connected to the particular social practices of our communities Traditionally continental critical theory has rejected this claim through its endorsement of the method of immanent critique Immanent critique is a critique of social practices that draws on norms already present within these practices to demand social change rather than merely conservatively reproducing them Titus Stahl defends the claim that such a critique is not only possible but also has politically powerful potential Taking up recent developments in analytic enquiry into collective intentionality theory and in the philosophy of language he argues that all social practices rest on structures of mutual recognition between persons that allow social theorists to reconstruct hidden norms present within these practices Starting from a comprehensive critique of contemporary critical theory Immanent Critique also spells out the consequences of this line of thought for the practice of social critique for the social sciences and for political philosophy The translation of this work was funded by Geisteswissenschaften International Translation Funding for Humanities and Social Sciences from Germany a joint initiative of the Fritz Thyssen Foundation the German Federal Foreign Office the collecting society VG WORT and the B rsenverein des Deutschen Buchhandels German Publisher Booksellers Association

*Populism and Time* Andy Knott, This book addresses the untapped theoretical encounter between populism and time It argues that this enquiry can augment analyses of the history contemporary political practice and theory of populism by identifying and critically engaging with its appearances disappearances and its failure to emerge within the broad scope of global politics The book incorporates populism s relationship with democracy modernity subjectivity communication technology and crisis to draw temporal comparisons between populism and rival political practices and logics

*A Companion to Continental Philosophy* Simon Critchley,William R. Schroeder,1998-06-08 Covering the complete development of post Kantian Continental philosophy this volume serves as

an essential reference work for philosophers and those engaged in the many disciplines that are integrally related to Continental and European Philosophy      Reification and the Aesthetics of Music Jonathan Lewis, 2015-11-19 This innovative study re evaluates the philosophical significance of aesthetics in the context of contemporary debates on the nature of philosophy Lewis's main argument is that contemporary conceptions of meaning and truth have been reified and that aesthetics is able to articulate why this is the case with important consequences for understanding the horizons and nature of philosophical inquiry Reification and the Aesthetics of Music challenges the most emphatic and problematic conceptions of meaning and truth in both analytic philosophy and postmodern thought by acknowledging the ontological and logical primacy of our concrete practice based experiences with aesthetic phenomena By engaging with a variety of aesthetic practices including Beethoven's symphonies and string quartets Wagner's music dramas Richard Strauss's Elektra the twentieth century avant garde Jamaican soundsystem culture and punk and contemporary noise this book demonstrates the aesthetic relevance of reification as well as the concept's applicability to contemporary debates within philosophy      **Alienation** Rahel Jaeggi, 2014-07-15 The Hegelian Marxist idea of alienation fell out of favor during the post metaphysical rejection of humanism and essentialist views of human nature In this book Jaeggi draws on phenomenological analyses grounded in modern conceptions of agency along with recent work in the analytical tradition to reconceive of alienation as the absence of a meaningful relationship to oneself and others which manifests itself in feelings of helplessness and the despondent acceptance of ossified social roles and expectations A revived approach to alienation helps critical social theory engage with phenomena such as meaninglessness isolation and indifference which have broad implications for issues of justice By severing alienation's link to a problematic conception of human essence while retaining its social philosophical content Jaeggi provides resources for a renewed critique of social pathologies a much neglected concern in contemporary liberal political philosophy Her work revisits the arguments of Rousseau Hegel Kierkegaard and Heidegger placing them in dialogue with Thomas Nagel Bernard Williams and Charles Taylor
