Christianity and the Culture Machine Vincent F. Rocchio, 2016-08-05 Christianity and the Culture Machine is a precedent shattering approach to combining theories of media and culture with theology In this intensive examination of Christianity s role in the cultural marketplace the author argues that Christianity s inability to effectively contest the ideology of secular humanism is not a theological shortcoming but rather a communications problem the institutional church is too wedded to an outmoded aesthetic of Christianity to communicate effectively Privileging authority and obedience over the egalitarian and transformative goal of Christianity the church fails to recognize how it undermines the vitality of the Christian narrative and message In the absence of a more compelling vision offered by the official church a new aesthetic can be found forming within the margins of popular culture texts Despite its past failures in representing the Bible in mainstream film and television the culture industry now offers more compelling versions of core Christian theology without even realizing it within the margins of the main storylines This book analyzes the aesthetic principles employed by these appropriations and articulations of Christian discourse as a means of theorizing what a new aesthetic of Christianity might look like *The*

Pelletiere, 1995 Islamic fundamentalism is growing at such a rapid rate that many believe it threatens to take over the Middle East To

prevent this enormous resources have been summoned not only from within the region but in the West as well Yet for all the efforts to contain if not turn back the fundamentalists the movement appears likely to pose a security challenge well into the next century Dr Stephen Pelletiere points out that containment of fundamentalism depends first and foremost on accurate information about the nature of the movement He examines the origins of the various fundamentalist groups that are challenging the area s governments and explains why they were able to grow in the face of official repression by some of the most sophisticated and well equipped security services in the world The author concludes by building a theory about fundamentalism which implies a need to redirect policy for coping with it Dr Pelletiere maintains that the solution is not to try to crush the movement that has been attempted numerous times and consistently has failed Rather the way to proceed is to locate and act on the basic split within the movement between its socially constructive and other more violent elements

Science and Religion J.W. Fennema,Paul Iain,2012-12-06 The world is increasingly becoming one It is at the same time one endangered ecosystem and one thriving market place with material and spiritual goods on competitive display And the good and evil things of life cannot easily be sorted out The world is becoming one also in the sense that it is better understood today than it was in earlier times that the material good and the spiritual good though seemingly belonging to different realms of fact defined by their respective modes of existence together constitute effectively one and the same reality the modern world of science technology computerized administration and power that calls upon humankind to struggle for a just participatory and sustainable society and to strive for a society of the future that will be the world over both long lived and worth living The Second European Conference on Science and Religion held on 10 13th March 1988 on the campus of the Universiteit Twente Enschede The Netherlands was meant to be a modest market place a forum where standpoints and opinions could be presented and criticized It was meant to offer an opportunity to meet and to make acquaintances in the expectation that the exchange of thoughts would lead to new conceptual horizons that would challenge what so far had been considered as hard fact or what until now had been looked upon as a distinctive feature of a well established view either of the kingdom of the sciences or of the realm of religion

Fundamentalism Torkel Brekke,2011-12-26 This book investigates the origins of fundamentalism outlining its characteristics and the history of key fundamentalist movements around the world considering examples from Christianity Islam Buddhism and Hinduism The book argues that fundamentalism develops when modern lay religious leaders challenge the authority of secular states and traditional religious establishments These new leaders and their followers seek to infuse religious values and practices into all spheres especially law politics education and science The patterns of religious authority and leadership that characterize fundamentalism have their roots in a Christian context but were globalized through intense intercultural contacts after the mid nineteenth century Fundamentalism is a thoroughly modern and global phenomenon because it presupposes the globalization of ideas and practices concerning religious leadership and organization as well as universal changes in the

relationship of religion to modern societies and states Fundamentalism in America Philip Melling, 2013-12-02 This important book challenges the idea that religious fundamentalism can adequately be understood as a paranoid xenophobic faith. It demonstrates instead how it draws upon a long tradition of evangelical and millennialist scripture in its engagement with issues at the spiritual and ethical core of postmodernity in the United States. The author examines the varieties of fundamentalism as they appear in prophecy, sermon, film, and fiction. In its wide-ranging consideration of the rhetoric of the New World Order, the literature of prophecy, Cold War films, television evangelism, cross-border texts, and post-nationalist writing, *Fundamentalism in America* provides a vital and compelling account of the present state of religious and national identity in the United States.
