illustrated wide ranging history for most of the Cold War the tank retained its pre eminence on the battlefield The Arab Israeli wars witnessed some of the biggest tank battles of all time and tanks played key roles in conflicts in Korea Vietnam and Afghanistan as well as in the Iran Iraq War and the wars fought between India and Pakistan But then in the mid 1960s anti tank weapons became ever deadlier and the Mechanised Infantry Fighting Vehicle MIFV which was designed to support infantry and fight tanks emerged and the heyday of the tank was over Chapters cover each major phase in the evolution of the tank and of tank warfare during the period from the battles fought in the late 1940s and 1950s with Second World War armoured vehicles like the T 34 and the Sherman through to the designs common in the 1960s and 1970s like the T 55 Centurion Challenger and M60 Patton to the confrontation between the M1 Abrams and the T 72 during the Gulf War in 1991 Technical and design developments are important elements throughout the story but so are dramatic changes in tactics and armaments which mean the tank has an increasingly uncertain role in modern warfare

**America's Final War** Andrei Martyanov, 2024-06-01 Washington's eight years of preparing Ukraine and its armed forces for war with Russia was a mistake of historic proportions due to its misperception of American military power based on its 1991 Gulf War victory against a minor military player Washington believed its own propaganda about crippling sanctions on Russia about the viability of its Ukrainian proxy army and the economic and military weakness of Russia spelling doom for the American empire and its rules based order By 2023 the Kiev regime could no longer exist without the West's support both financial and in war materiel By 2024 Russia will have not just exhausted Ukraine but also demilitarized NATO as a whole exposing the industrial and military impotence of the US and its European vassals The United States military as a whole and the USAF in particular have no resources or means to close the ever widening gap in capability between American and Russian Air Defenses insofar as such systems as the S 500 are already being produced serially in Russia with their immense range of more than 500 kilometers against aerial targets not to mention their full integration with Russia's Air Force and Air Defense The air space of Russia is becoming increasingly prohibitive to penetration by any combination of USAF and NATO forces The US has fallen behind and it won't be able to catch up
