Communicating Your Research with Social Media Amy Mollett, Cheryl Brumley, Chris Gilson, Sierra Williams, 2017-04-17 This dynamic engaging guide empowers you to go beyond bar charts and jargon filled journal articles to bring your research online and present it in a way that highlights and maximises its relevance through social media Drawing upon a wealth of timely real world examples the authors present a framework for fully incorporating social media within each step of the research process From visualising available data to tailoring social media to meet your needs this book explores proactive ways to share cutting edge research A complete how to for communicating research through blogs podcasts data visualisations and video it teaches you how to use social media to create and share images audio and video in ways that positively impacts your research connect and collaborate with other researchers measure and quantify research communication efforts for funders provide research evidence in innovative digital formats reach wider more engaged audiences in academia and beyond Through practical advice and actionable strategies this book shows how to achieve and sustain your research impact through social media

Process Scale Purification of Antibodies Uwe Gottschalk, 2017-03-02 Promoting a continued and much needed renaissance in biopharmaceutical manufacturing this book covers the different strategies and assembles top tier technology experts to address the challenges of antibody purification Updates existing topics and adds new ones that include purification of antibodies produced in novel production systems novel separation technologies novel antibody formats and alternative scaffolds and strategies for ton scale manufacturing Presents new and updated discussions of different purification technologies focusing on how they can address the capacity crunch in antibody purification Emphasizes antibodies and innovative chromatography methods for processing

Mechanisms of Lymphocyte Activation and Immune Regulation VI Sudhir Gupta, J. John Cohen, 2013-06-29 Since programmed cell death was first described in insects in 1964 and apoptosis was described in 1972 rapid progress has been made in understanding the basic mechanisms and genes regulating programmed cell death and apoptosis In addition defects in various genes regulating programmed cell death have been delineated in several experimental models of human diseases This volume surveys various aspects of these rapidly developing areas of research in programmed cell death apoptosis This volume should be of interest to basic immunologists and molecular biologists The volume begins with a historical perspective of cell death The remainder of the volume is divided into four different parts Part I deals with the signaling pathways in apoptosis including cell cycle control of apoptosis role of ceramide in apoptosis role of antibody signaling and biochemical regulation of apoptosis The mechanisms for recognition of apoptotic lymphocytes by macrophages are also reviewed Part II examines the role of various genes that regulate apoptosis including the role of Fas FasL and other TNF family members in apoptosis and homeostatic regulation of immune response Recently described splice variants and their influence on apoptosis are also reviewed and the role of the members of the Bcl 2 family in apoptosis is discussed in detail Part III reviews various aspects of

apoptosis in B lymphocytes including mechanisms that regulate apoptosis survival of B lymphocytes and the regulation of Fas mediated apoptosis in B lymphocytes Introduction to Antibody Engineering Florian Rüker, Gordana

Wozniak-Knopp, 2020-11-30 This highly readable textbook serves as a concise and engaging primer to the emerging field of antibody engineering and its various applications It introduces readers to the basic science and molecular structure of antibodies and explores how to characterize and engineer them Readers will find an overview of the latest methods in antibody identification improvement and biochemical engineering Furthermore alternative antibody formats and bispecific antibodies are discussed The book s content is based on lectures for the specializations Protein Engineering and Medical Biotechnology within the Master s curriculum in Biotechnology The lectures have been held at the University of Natural Resources and Life Sciences Vienna in cooperation with the Medical University of Vienna since 2012 and are continuously adapted to reflect the latest developments in the field The book addresses Master and PhD students in biotechnology molecular biology and immunology and all those who are interested in antibody engineering

Animal Cell Technology

Meets Genomics Francesc Gòdia, Martin M. Fussenegger, 2005-03-02 The 18th ESACT meeting was celebrated in Granada Spain in May 2003 and was entitled Animal Cell Technology Meets Genomics in order to reflect that the emerging technologies in the area of genomics proteomics and other omics type disciplines will provide key technological assets to

increase knowledge and open new horizons in animal cell technology During the meeting a variety of top class emerging technologies were presented together with the latest advances in more mature industrial areas The meeting was opened by a first session devoted to the understanding of basic cellular mechanisms and four sessions focused on applied aspects of animal cell technology Cell based therapies and gene based therapies target discovery and biopharmaceuticals The Granada Meeting has also seen a special focus on forefront industrial case studies The spirit and scientific excellence of the 18th ESACT meeting is now reflected in different chapters of the book The book presents in form of short papers a high number of the contributions to the meeting and has been prepared with the aim to provide a relevant reference of the current research efforts in Animal Cell Technology *Thread of Death* Jennifer Estep, 2012-01-31 Gin Blanco aka the assassin the Spider might have finally killed her nemesis Mab Monroe but that doesn't mean that it's smooth sailing Gin goes to Mab's funeral to say her goodbyes and runs into some of Ashland's most notorious underworld power players including Jonah McAllister and Phillip Kincaid McAllister wants her dead and Kincaid has his own murky motives when it comes to the Spider and Gin once again finds herself fighting for her life Only this time she might wind up in the cemetery right next to Mab Mental Health, Social Media, and the Meta Dov Greenbaum, Nazanin Alavi, 2024-11-11 One of the most damaging externalities from the recent pandemic has been the rise in mental health issues Many psychiatric disorders have strong genetic components and although the extent of the genetic influence for many conditions has been extensively tested by genome wide association studies GWAS there remains much to be understood regarding the genetics of these health issues Twin studies for example have found a relatively high rate of inheritance for depression and anxiety disorders To better appreciate the role that genetics plays in these disorders it is useful to understand the extent to which other factors also contribute to the condition Other major contributing factors to mental disorders are the environment and psychological factors These environmental and psychological concerns have been further exacerbated by the growth of social media and the requirement especially for young adults and teenagers to always be on It is likely that the metaverse in whatever form it ultimately takes will further exacerbate these conditions On the other hand social media and the metaverse can be tools to help those suffering from mental health conditions Online therapists and bots can provide frontline care to those who can't or won't go to an in person therapy session AI can be employed to provide some forms of therapy in light of the growing demand for licensed therapists and the limited supply Animal Cell Technology Manuel J.T. Carrondo, Bryan Griffiths, José L.P. Moreira, 2012-12-06 Animal cell technology has undergone a rapid transformation over the last decade from a research tool and highly specialised technology to a central resource for innovation in pharmaceutical research and development These proceedings of the 14th Meeting of the European Society for Animal Cell Technology Vilamoura Portugal May 1996 bring up to date the historical perspective of animal cell technology for the benefit of society From Vaccines to Genetic Medicine and will charter this vital technology for the years to come Strong contributions are grouped in the traditional ESACT areas of Cell and Physiology

Engineering dealing with cell state including genetics and its environment and Animal Cell Process Engineering covering integration of bioreaction with bioseparation coupled with on line monitoring to improve protein production and consistency Extensive coverage of metabolic engineering on synthesis folding assembly transiting and secretion is dealt with in the session on Recombinant Proteins Biosynthesis and Bioprocessing Two traditional but expanding areas of animal cell technology relevance are highlighted in the broad sessions of Animal Cells as Tools for Discovery and Testing and Animal Cell Vaccines Present and Future Two sessions finally cover the more recent domains of animal cell technology work Tissue Engineering and Biomedical Devices and Cells and Vectors for Genetic Medicine where one can foresee a very bright future

Mab Media Today And Tommorrow: Bestsellers in 2023 The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous captivating novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the captivating narratives that have enthralled audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Mab Media Today And Tommorrow : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and thrilling novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
