integration While geopolitics influences international economic integration so too does domestic politics Economic integration in Asia has been driven by rapid unilateral trade and investment liberalization and while trade and investment patterns have been determined largely by comparative advantage political forces have also affected patterns of economic interdependence The form that regional institutions take and their effectiveness also depends on political relations between countries The particular circumstances in Asia and the relationships between regional economies has profoundly shaped regional institutions and will continue to do so The chapters in this volume draw on papers originally presented to the 33rd Pacific Trade and Development Conference held in Taipei in 2009 to look in original ways at how politics shape economic integration and its various dimensions in Asia and the Pacific and globally Asia-Pacific Raymond Frederick Watters, T. G. McGee, Ginny Sullivan, 1997 The great processes reshaping our world today can be summed up by the term globalisation Together with the communications revolution and massive urbanisation it is reshaping the organisation of global space It is illustrated by technological change pronounced economic growth the dominance of giant corporations ever more open markets and universal consumption Dramatic developments have occurred in Asia Pacific trade investment labour movements and political cooperation marked for example by APEC a giant free trade area designed to encompass about 60% of the world's population and half the world's economy But the processes also create social tension political reaction and local resistance as a result of regional restructuring widening regional disparities the neglect of backward areas or imposed modernisation Asia Pacific New Geographies of the Pacific Rim written by leading scholars from the region examines the extent to which Pacific Rim economies especially East Asia and Southeast Asia are increasingly integrated and considers the economic political and cultural forces at work In the process many new geographies are being created or reconstructed At the same time the local global dialectic whereby local forces react to negotiate with resist or capitulate to global forces is examined Part I analyses globalisation and the emergence of sub global regions Part II the processes of change in Asia Pacific and Part III the national responses to globalisation Part IV addresses local reactions to global forces resistance negotiations or capitulation Finally the editors enumerate the challenges to the region which centre on the crucial need to manage this era of globalisation so that sustainable societies can continue This vast region needs careful management of globalisation in which the forces of free trade and economic growth are the central determinants For the time being these forces seem to be in the ascendant

The Synergy Trap, Asia-Pacific Edition Mark L. Sirower, 2010-06-15 Every CEO and Corporate Director who has been in the path of the WOW GRAB IT acquisition locomotive should read this book. Charles R. Shoemate, Chairman and CEO, Bestfoods. With global acquisition activity running into the trillions of dollars the acquisition alternative continues to be the favorite corporate growth strategy of this generation's executives. Unfortunately creating shareholder value remains the most elusive outcome of these corporate strategies. After decades of research and billions of dollars paid in advisory fees why do these major decisions continue to destroy value? Building on his groundbreaking research first cited in Business Week Mark L. Sirower explains how companies often pay too much and predictably never realize the promises of increased performance and competitiveness in their quest to acquire other companies. Armed with extensive evidence Sirower destroys the popular notion that the acquisition premium represents potential value. He provides the first formal and functional definition for synergy the specific increases in performance beyond those already expected for companies to achieve independently. Sirower's refreshing nuts and bolts analysis of the fundamentals behind acquisition performance cuts sharply through the existing folklore surrounding failed acquisitions such as lack of strategic fit or corporate culture problems and gives managers the tools to avoid predictable losses in acquisition decisions. Using several detailed examples of recent major acquisitions and through his masterful integration and extension of techniques from finance and business strategy Sirower reveals the unique business gamble that acquisitions represent. The managerial challenges already embedded in current stock prices. The competitive conditions that must be met and the organizational cornerstones that must be in place for any possibility of synergy. The precise Required Performance Improvements (RPIs) implicitly embedded in acquisition premiums and the reasons why these RPIs normally dwarf realistic performance gains. The seductiveness and danger of sophisticated valuation models so often used by advisors. The Synergy Trap is the first expose of its kind to prove that the tendency of managers to succumb to the up the ante philosophy in acquisitions often leads to disastrous ends for their shareholders. Sirower shows that companies must meticulously plan and account for huge uncertainties before deciding to enter the acquisition game. To date Sirower's work is the most comprehensive and rigorous yet practical analysis of the drivers of acquisition performance. This definitive book will become required reading for managers corporate directors consultants investors bankers and academics involved in the mergers and acquisitions arena.
