Adult Friendship Rosemary Blieszner, Rebecca G. Adams, 1992-06-10 Do you have a best friend If so you probably share the same race and social status Why is this so Does social structure determine your choice of friends Or do other factors cause you to choose friends Co authors Blieszner and Adams explore these issues and offer a theoretical framework which incorporates both sociological and psychological perspectives on friendship They use this model to synthesize the research theoretically identify gaps in the literature scrutinize the methods used and produce a map for future research Adult Friendship also covers historical conceptions of friendship the internal structure of friendship and the phases of friendship Clearly written yet scholarly Adult Friendship is perfect for students researchers and professionals in psychology sociology communication gerontology family studies and social work The analysis is ably argued identifying the contributions to and gaps in the field and challenging others to give attention to the theoretical and methodological issues in the emerging research on adult friendship Contemporary Sociology Adult Friendship is a noteworthy publication in the emerging area of the study of personal relationships A useful synthesis of theory and research on close relationships over the life cycle suitable for students and others wanting an introduction to the topic yet also gives professionals more knowledgeable with this literature a fresh distinctive perspective on it Blieszner and Adams chapters are concise and internally well organized a worthwhile read for researchers students practitioners and laypersons concerned with the study of friendship across the life span Journal of Marriage The Family This volume is an important addition to the useful Sage Series on Close Relationships It treats a topic that has been too frequently ignored in the area of close relationship research The coverage of the literature in this volume is especially good due to the tight organizational scheme that facilitates summaries of many different findings In sum there is no doubt that both researchers and students will find this volume to be extremely useful This is a well organized and comprehensive book that provides a concise summary of research on adult friendship both from sociological and psychological perspectives Significant gaps in the literature are identified and methodological criticisms are raised Finally the authors provide clear guideposts for future research on a topic that has often received too little attention in the area of close relationships ISSPR Bulletin *The Two Carlyles* Osbert Burdett, 1930 *The Gift of Sisters* Beth Wiseman, 2018-07-10 Hannah and Elizabeth are fraternal twins approaching their sixteenth birthday a time when they will be allowed to spread their wings and enjoy their rumschprunge The sisters couldn't be more different Hannah is outgoing and beautiful while Elizabeth is shy and withdrawn And when newcomer Abraham Stoltzfus arrives in Lancaster County both women fall head over heels for him each fighting for his affections in their own ways and driving the sisters to turn on each other Who will Abraham choose And will Hannah and Elizabeth reunite after a devastating heartbreak **The Indian's Friend**, 1916 **The American Friend**, 1900 **Personal Relationships and Personal Networks** Malcolm R. Parks, 2017-09-25 The effort to understand personal relationships has traditionally focused on the individual characteristics of

participants Personal Relationships and Personal Networks takes this analysis a step further focusing on research linking participants feelings and actions within a given personal relationship to the larger social context surrounding it Author Malcolm R Parks expands on the idea that the initiation development maintenance and dissolution of relationships are inextricably connected to each participant s social network a perspective that allows for a better appreciation of our connection to the world and a greater understanding our significant power as social actors This book offers a new way to consider basic notions about how relationships form such as how particular people meet and how relationships are started Among many findings the volume demonstrates that individuals in relationships feel closer and generally more connected when they also have a greater amount of contact with the members of each other s personal networks and when they believe that network members support their relationship Additional topics discussed include how this social context model is applicable to different types of relationships how participants interact with network members how social networks are involved in the deterioration of personal relationships and what drives change in relationships Students researchers and professionals in a wide variety of disciplines such as communication psychology sociology anthropology family studies clinical psychology public health nursing education and social work will find this book useful as will anyone seeking to better understand their own personal relationships
