Working Group The siting of the conference in Potsdam in formerly East Germany provided an excellent opportunity to advantage from the political changes in Eastern Europe Good access to the meeting was possible by scientists from Eastern European countries allowing exchange of information on the very important Wide Field facilities in both East and West information on the rich archives of photographic plates that exist in both East and West and allowing discussions between scientists facing very similar problems in both East and West *Galaxy Interactions at Low and High Redshift* J.E. Barnes,D.B.
