reference to educators researchers and others      Handbook of Special Education James M. Kauffman, Daniel P. Hallahan, 2011-05-15 Special education is now an established part of public education in the United States by law and by custom. However, it is still widely misunderstood and continues to be dogged by controversies related to such things as categorization, grouping, assessment, placement, funding, instruction, and a variety of legal issues. The purpose of this 13-part, 57-chapter handbook is to help profile and bring greater clarity to this sprawling and growing field. To ensure consistency across the volume, chapter authors review and integrate existing research, identify strengths and weaknesses, note gaps in the literature, and discuss implications for practice and future research. Key features include Comprehensive Coverage: Fifty-seven chapters cover all aspects of special education in the United States, including cultural and international comparisons; Issues/Trends: In addition to synthesizing empirical findings and providing a critical analysis of the status and direction of current research, chapter authors discuss issues related to practice and reflect on trends in thinking; Categorical Chapters: In order to provide a comprehensive and comparative treatment of the twelve categorical chapters in section IV, chapter authors were asked to follow a consistent outline: Definition, Causal Factors, Identification, Behavioral Characteristics, Assessment, Educational Programming, and Trends and Issues; Expertise: Edited by two of the most accomplished scholars in special education, chapter authors include a carefully chosen mixture of established and rising young stars in the field. This book is an appropriate reference volume for anyone—researchers, scholars, graduate students, practitioners, policy makers, and parents—interested in the state of special education today, its research base, current issues and practices, and future trends. It is also appropriate as a textbook for graduate-level courses in special education.

 This book makes an original contribution to credential sociology by analysing how high school certificates become and  
 remain valuable in a context of mass high school participation i.e credentialism Building on a detailed analysis of the  
 International Baccalaureate IB Diploma a senior secondary school certificate offered in over 150 countries Quentin Maire  
 argues that the advent of new private credentials can be understood as a phenomenon of credential stratification in a context  
 of intensified academic competition Using original data on high school credentials in Australia and internationally the author  
 makes a strong case for certificates to be studied relationally by locating them in the credentialing structures in which they

are inserted He systematically applies the comparative method to explain the role of the curriculum family resources school segregation and higher education selection in creating a credential hierarchy His robust combination of theoretical construction and detailed empirical work allows him to offer new insights into social inequality in education systems credential theory and the IB Diploma *Public Health Reports* , Graduate Students' Research about Community Colleges Deborah L.
