J. Fleet, S. A. R. Boldy, 1999-09 A review of the extensive advances made in the understanding the petroleum geology of the Atlantic margin of northwest Europe of the North Sea and of adjacent areas since the last conference in 1992 In particular the volume focuses on the development of and application of 3D seismic time lapse 4D and other innovative seismic tools the ongoing refinement of sequence and other stratigraphic approaches including the integration of detailed biostratigraphic data the development of modelling at both the reservoir and basin scale which can respond to new data acquisition and be used to assess uncertainties at the reservoir scale and scenarios at the basin scale *Conference on Petroleum Geology of the Continental Shelf of North-west Europe*, 1975 *Petroleum Geology of the Continental Shelf of North-West Europe* Leslie V. Petroleum Exploration and Exploitation in Norway

Norsk petroleumssforening. Conference, 1995 This conference was arranged by the Norwegian Petroleum Society in order to commemorate the first 25 years of exploration on the Norwegian Continental Shelf Sixty papers and posters were presented of which 25 have been selected for this volume Since the start of exploration activities during the mid 1960 s the North Sea has not only proved to be one of the main petroleum provinces in the world but has also established itself as an excellent laboratory for geoscientific research and application This development has been stimulated greatly by the openness towards exchange of technical data encouragement by the Norwegian authorities The objective of this book is to assess the results of 25 years of exploration in Norway It focuses on lessons learned from past experiences as well as considering future challenges facing geoscientists in the industry relating to both exploration and exploitation activities Included are papers which assess the status and future trends of exploration in the main geological provinces on the Norwegian Continental Shelf from the Central Graben in the south to Svalbard and the Russian Arctic in the north

Tertiary Deep-Marine Reservoirs of the North Sea Region T. McKie, P.T.S. Rose, A.J. Hartley, D.W. Jones, T.L. Armstrong, 2015-11-02 Discovery of the Arbroath Montrose and Forties fields initiated intensive exploration of the Tertiary deep marine play in the North Sea region Subsequent discoveries demonstrated the success of this play and the geological diversity of the depositional systems The play is now mature and in many areas the remaining exploration potential is likely to be dominated by small subtle traps with a major component of stratigraphic trapping Economically marginal discoveries need an in depth understanding of subsurface uncertainty to mitigate risk with limited appraisal wells Mature fields require detailed geological understanding in the search for the remaining oil This volume focuses on the regional depositional setting of these deep marine systems providing a stratigraphic and palaeogeographical context for exploration and development case histories that outline the challenges of producing from these reservoirs The fields are arranged around the production life cycle describing the changing needs of geological models as the flow of static and dynamic data refines geological understanding and defines the nature of new opportunities as fields mature

Ancient Sedimentary Environments Richard C. Selley, 2013-05-13 This edition retains the case history approach to emphasize the subsurface diagnosis of environments using seismic and geophysical well logs and their application to petroleum exploration and production This book should be of interest to undergraduates in sedimentology and petroleum geology
