Pets, People, and Pragmatism Erin McKenna, 2013-03 This book examines human relationships with pets without assuming that such relations are either unnatural and to be avoided or benign We need to find ways to relate respectfully For respectful relationships to be a real possibility though humans must make the effort to understand the beings with whom they live work and play      **Pets and People** Dorothy Edwards Shuttlesworth, 1975 Discusses the history and characteristics of a variety of animals including dogs horses birds pigs gerbils rabbits snakes crickets and goldfish and the advantages and disadvantages of keeping them as pets      **Assistance Dogs for People With Disabilities** Emily Patterson-Kane, Lynette Arnason Hart, Mariko Yamamoto, 2020-08-21      *The Ekistics of Animal and Human Conflict* Rishi Dev, 2016-09-01 Urban wildlife management is a town planning subject It is logical and important to relate the animal and human conflict seen all over the world as a phenomenon which is applicable to all types of human settlements despite the diversities and complexities of cultures societal structures laws value systems religions and so on A universal principle or theory governs and applies to all cities which define these conditions and phenomena creating the conflict or coexistence This book investigates the niches of one of the key urban animals from a syntactic semantic and pragmatic perspective and explores how these niches are naturally synonymous to similar patterns structures and compositions within human settlements It explores and defines the demographic patterns thresholds and phenomenon which leads to formation of the different levels and extremes of interaction between the species This forms a paradigm which classifies this conflict within the various disciplines and frameworks of urban ecology The focus is primarily on urban dogs it being a keystone species but is later related with other urban animals as well The premise for this approach is that history has shown how certain species have persuasively coexisted with humans for so many millennia yet a conflict happens between animals and humans and within humans over animals It is thus logical to believe that the forces which create this conflict cannot solely be natural to the species in question and have to come from outside from the settlement patterns of both species and the net resultant force and dynamics The book looks at these dichotomies in four distinct but interrelated ways It delves deep inside four niches which form the dynamics of any settlement spatial cultural ecological and economic and explores all scales at which the succession and evolution of animals take place in highly urbanized settlements      Understanding Animal Abuse and How to Intervene with Children and Young People Gilly Ferreira, Joanne Williams, 2023-03-31 Understanding Animal Abuse and How to Intervene with Children and Young People offers a positive compassion based and trauma informed approach to understanding and intervening in animal abuse It provides an accessible cross disciplinary synthesis of current international evidence on animal abuse and a toolkit for professionals working with people and or animals to help them understand prevent and intervene in cases of animal abuse With contributions from experts in the field this essential text offers ten user friendly chapters with questions for reflection and key summary points It offers a definition of animal abuse synthesises the
