

CHRIST CHURCH, BOSTON.

"I know thy service, well where thou dost stand, where others stand thy
and thou hastest that thy name, and hast not denied thy faith."

Not for thy pomp and pride of place,
Not for thy relics rare
Of kings, and ministers of grace
Whose names thy vessels bear;
Not for thy boast of high degree,
Nor charms of gorgeous style,
Hast thou been ever dear to me,
O thou time-honored pile!

But for thy constant truth, which still
Preserves, from age to age,
Unmoved, through good report and ill,
The Father's heritage;
Which firmly as the hills remains,
As years have o'er thee swept,
And singly, 'mid apostate fanes,
The ancient faith has kept.

For sixteen years thy lofty vault
With those ascriptions ring,
Which lift the soul, while they exalt
The Christ, of Glory King.
And well might walls, so taught, cry out,
If human lips were dumb,
And aisles spontaneous swell the shout
Until the Bridegroom come.*

Environmental and Energy Law Karen Makuch, Ricardo Pereira, 2012-07-23 Despite bringing prosperity industrialisation generally leads to increasing levels of pollution which has a detrimental impact on the environment In response legislation which seeks to control or prevent such impact has become common Similarly climate change and energy security have become major drivers for the regulatory regimes that have emerged in the energy field Given the global or regional scope of many environmental problems international cooperation is often necessary to ensure such legislation is effective The EU and the UK have contributed to the development of the environmental and energy law regimes currently in force spanning across international transnational and national levels At the same time practical responses to environmental

and energy problems have largely been the focus of engineers scientists and other technical experts Environmental Energy Law attempts to bridge the knowledge gap between legal developments designed to achieve environmental and or energy related objectives and the practical scientific and technical considerations applicable to the same environmental problems In particular it attempts to convey a broad range of topical issues in environmental and energy law from climate and energy regulation technology innovation and transfer to pollution control environmental governance and enforcement In addition the book outlines key sector specific legal regimes including water waste and air quality management focusing on issues or topics that are particularly relevant to both environmental and energy lawyers and engineering science and technology oriented professionals and students In this vein the book guides the reader on some basic practical applications of the law within scientific engineering and other practical settings The book will be useful to all those working or studying in the environmental or energy arena including law students legal professionals engineering and science students and professionals By adopting a multi disciplinary approach to environmental and energy law the book embraces all readerships and helps to address the often thorny problem of communication between scientists engineers lawyers and policy makers
