book is a critically important contribution to the work underway to transform schooling for students who have historically
been denied access to a quality education specifically African American children The first section of the book provides some
historical perspective critical to understanding the current state of education in the U S specifically for the education of
African American children The following sections include chapters on policy learning ethnomathematics student identity and
teacher preparation as it relates to the mathematical education of Black children Through offering counternarratives about
mathematically successful Black youth advocating for a curriculum that is grounded in African American culture and ways of
thinking providing shining examples of the brilliance of Blacks students and promoting high expectations for all rather than
situating students as the problem the authors of this book provide powerful insights related to the teaching and learning of
mathematics for African American students As is made evident in this book effective teaching involves much more than just
engaging students in inquiry based pedagogy Kitchen 2003 The chapters offered in this book demonstrate how mathematics
instruction for African American students needs to take into account historical marginalization and present day policies that
do harm to Black students Kunjufu 2005 Empowering mathematics instruction for African American students needs to take
into consideration and promote students cultural spiritual and historical identities Furthermore mathematics instruction for
African American students should create opportunities for students to express themselves and the needs of their communities
