Johnson, 1997 *Hy Brasil: The Metamorphosis of an Island* Barbara Freitag, 2013 Brasil Island better known as Hy Brasil is a phantom island In the fourteenth century Mediterranean mapmakers marked it on nautical charts to the west of Ireland and its continued presence on maps over the next six hundred years inspired enterprising seafarers to sail across the Atlantic in search of it Writers too fell for its lure While English writers envisioned the island as a place of commercial and colonial interest artists and poets in Ireland fashioned it into a fairyland of Celtic lore This pioneering study first traces the cartographic history of Brasil Island and examines its impact on English maritime exploration and literature It investigates the Gaelicization process that the island underwent in nineteenth century and how it became associated with St Brendan Finally it pursues the Brasil Island trope in modern literature the arts and popular culture

The Island of Seven Cities Paul Chiasson, 2013-09-10 The Island of Seven Cities unveils the first tangible proof that the Chinese settled in the New World before Columbus In the summer of 2003 architect Paul Chiasson decided to climb a mountain he had never explored on Cape Breton Island where eight generations of his Acadian family had lived One of the oldest points of exploration and settlement in the Americas with a written history dating back to the first days of European discovery Cape Breton is littered with remnants of old settlements But that day Chiasson found a road that was unique Well made and consistently wide and at one time clearly bordered with stone walls the road had been a major undertaking But he could find no record of it In the two years of detective work that followed Chiasson systematically surveyed the history of Europeans in North America and came to a stunning conclusion the ruins he had stumbled upon an entire townsite on a mountaintop did not belong to the Portuguese the French the English or the Scots And they predated John Cabot's 1497 discovery of the island Using aerial and site photographs maps and drawings and his own expertise as an architect Chiasson re creates how he pieced together the clues to one of the world's great mysteries a large Chinese colony existed and thrived on Canadian shores well before the European Age of Discovery He addresses how the ruins had been previously overlooked or misunderstood and how the colony was abandoned and forgotten in China and in the New World And he discovers the traces the colony left in the storytelling and culture of the Mi kmaq whose written language clothing technical knowledge religious beliefs and legends he argues expose deep cultural ties to China A gripping account of an earth shaking discovery The Island of Seven Cities will change the way we think about our world

Imagining Atlantis Richard Ellis,2012-01-11 Ever since Plato created the legend of the lost island of Atlantis it has maintained a uniquely strong grip on the human imagination For two and a half millennia the story of the city and its catastrophic downfall has inspired people from Francis Bacon to Jules Verne to Jacques Cousteau to speculate on the island s origins nature and location and sometimes even to search for its physical remains It has endured as a part of the mythology of many different cultures yet there is no indisputable evidence let alone proof that Atlantis ever existed What then accounts for its seemingly inexhaustible appeal Richard Ellis plunges into this rich topic investigating the roots of the legend and following its various manifestations into the present He begins with the story s origins Did it arise from a common prehistorical myth Was it a historical remnant of a lost city of pre Columbians or ancient Egyptians Was Atlantis an

extraterrestrial colony Ellis sifts through the scientific evidence marshaled to prove these theories and describes the mystical and spiritual significance that has accrued to them over the centuries He goes on to explore the possibility that the fable of Atlantis was inspired by a conflation of the high culture of Minoan Crete with the destruction wrought on the Aegean world by the cataclysmic eruption around 1500 b c of the volcanic island of Thera or Santorini A fascinating historical and archaeological detective story Imagining Atlantis is a valuable addition to the literature on this essential aspect of our mythohistory

Atlantis in the Caribbean Andrew Collins, 2016-09-15 An in depth investigation of the mounting evidence that Atlantis was located in the Bahamas and Caribbean near Cuba in particular Explains how Atlantis was destroyed by a comet the same comet that formed the mysterious Carolina Bays Reveals evidence of complex urban ruins off the coasts of Cuba and the Bahamas Shows how pre Columbian mariners visited the Caribbean and brought back stories of Atlantis's destruction Compares Plato's account with ancient legends from the indigenous people of North and South America such as the Maya the Quich and the Yuchi of Oklahoma The legend of Atlantis is one of the most intriguing mysteries of all time Disproving many well known Atlantis theories and providing a new hypothesis the evidence for which continues to build Andrew Collins shows that what Plato recounts is the memory of a major cataclysm at the end of the last Ice Age 13 000 years ago when a comet devastated the island of Cuba and submerged part of the Bahaman landmass in the Caribbean He parallels Plato's account with corroborating ancient myths and legends from the indigenous people of North and South America such as the Maya of Mesoamerica the Quich of Peru the Yuchi of Oklahoma the islanders of the Antilles and the native peoples of Brazil The author explains how the comet that destroyed Atlantis in the Caribbean was the same comet that formed the mysterious and numerous elliptical depressions known as the Carolina Bays found across the mid Atlantic United States He reveals evidence of sunken ruins off the coasts of both Cuba and the Bahamas ancient complexes spanning more than 10 acres that clearly suggest urban development and meticulously planned road systems Revealing the

identity of Plato's opposite continent as ancient America Collins argues that Plato's story was first carried back to the Mediterranean world by trans Atlantic mariners such as the Phoenicians and Carthaginians as early as the first millennium BC He offers additional ancient trans Atlantis trade evidence from Egyptian mummies Roman shipwrecks in the Western Atlantic and the African features of giant stone heads in Mexico Piecing together the final days of Atlantis and the wildfires earthquakes tsunamis days of darkness and advancement of ice sheets that followed the ancient comet's impact Collins establishes not only that Atlantis did indeed exist but also that remnants of it survive today most obviously in Cuba Atlantis's original central island

Ancient Ocean Crossings Stephen C. Jett, 2017-06-06 Paints a compelling picture of impressive pre Columbian cultures and Old World civilizations that contrary to many prevailing notions were not isolated from one another In *Ancient Ocean Crossings* Reconsidering the Case for Contacts with the Pre Columbian Americas Stephen Jett encourages readers to reevaluate the common belief that there was no significant interchange between the chiefdoms and civilizations of Eurasia and Africa and peoples who occupied the alleged terra incognita beyond the great oceans More than a hundred centuries separate the time that Ice Age hunters are conventionally thought to have crossed a land bridge from Asia into North America and the arrival of Columbus in the Bahamas in 1492 Traditional belief has long held that earth's two hemispheres were essentially cut off from one another as a result of the post Pleistocene meltwater fed rising oceans that covered that bridge The oceans along with arctic climates and daunting terrestrial distances formed impermeable barriers to interhemispheric communication This viewpoint implies that the cultures of the Old World and those of the Americas developed independently Drawing on abundant and concrete evidence to support his theory for significant pre Columbian contacts Jett suggests that many ancient peoples had both the seafaring capabilities and the motives to cross the oceans and in fact did so repeatedly and with great impact His deep and broad work synthesizes information and ideas from archaeology geography linguistics climatology oceanography ethnobotany genetics medicine and the history of navigation and seafaring making an innovative and persuasive multidisciplinary case for a new understanding of human societies and their diffuse but interconnected development

The Island of Lost Maps Miles Harvey, 2010-10-06 The *Island of Lost Maps* tells the story of a curious crime spree the theft of scores of valuable centuries old maps from some of the most prominent research libraries in the United States and Canada The perpetrator was Gilbert Joseph Bland Jr an enigmatic antiques dealer from South Florida whose cross country slash and dash operation had gone virtually undetected until he was caught in 1995 and was unmasked as the most prolific American map thief in history As Miles Harvey unravels the mystery of Bland's life he maps out the world of cartography and cartographic crime weaving together a fascinating story of exploration craftsmanship villainy and the lure of the unknown

The Power of Projections Arthur Jay Klinghoffer, 2006-04-30 Why is Europe at the top half of maps and Africa at the bottom Although we are accustomed to that convention it is in fact a politically motivated almost entirely subjective way of depicting a ball spinning in space As *The Power of Projections* teaches us maps do not portray reality only interpretations of it To begin with they are two dimensional projections of a three dimensional spherical Earth Add to that the fact that every map is made for a purpose and its design tends to reflect that purpose Finally a map is often a psychological projection of the historical political and cultural values of the cartographer or of the nation person or organization for which the map was created In this fascinating book Klinghoffer examines the world perceptions of various civilizations and the ways in which maps have been formulated to serve the agendas of cartographers and their patrons He analyzes the recent decline of sovereignty the spread of globalization the reassertion of ethnic identity and how these trends affect contemporary mapmaking
