eyetracking technology to analyze 15 million instances where users look at Web sites to understand how the human eyes interact with design. Their findings will help designers, software developers, writers, editors, product managers, and advertisers understand what people see or don't see when they look and why. With their comprehensive three-year study, the authors confirmed many known Web design conventions, and the book provides additional insights on those standards. They also discovered important new user behaviors that are revealed here for the first time. Using compelling eye gaze plots and heat maps, Nielsen and Pernice guide the reader through hundreds of examples of eye movements demonstrating why some designs work and others don't. They also provide valuable advice for page layout, navigation, menus, site elements, image selection, and advertising. This book is essential reading for anyone who is serious about doing business on the Web.

Medical, Genetic & Behavioral Risk Factors of Ibizan Hounds and Pharaoh Hounds Ross D. Clark DVM, 2015-05-21. This book, *Ibizan Hound and Pharaoh Hound*, provides you with a thorough description and positive attributes of this breed, including origin, purpose, history, normal heights and weights, acceptable colors, and behavioral traits. Our books differ from most books on dog breeds because this book also provides you with a comprehensive and authoritative source of all the known predisposed hereditary health syndromes for the breed. You will find extensive references for each problem described. We also provide the breed club address for this breed and a list of laboratories and organizations that can provide professional help and information. As a small animal veterinarian, I have always been intrigued by the way dogs have been bred to fill a purpose in life and further impressed that they also tend to love performing that service. Greyhounds and other sight hounds are built for speed with aerodynamic bodies consisting of small head, deep chest, narrow waist, and large leg muscles. On the other hand, Dachshunds take their name from German words meaning badger dog, and they use their long nose, long body, and short legs to both track and dig into badger dens. After developing a practice that catered to clients with show dogs, my interest in each breed continued to grow as I studied and observed more and more about the unique predisposition and incidence of health problems in each breed. Breeders of purebred dogs for show were a challenge and inspirational for me to research and help them with their unique health problems. Historically, references to hereditary problems are scattered throughout various Veterinary medical texts and journals such as ophthalmology, neurology, gastroenterology, cardiovascular, and dermatology. This book, as well as the other books and articles I have written, is researched and compiled with the intention to provide both veterinarians and dog owners with comprehensive and authoritative predisposition information under the breed name. At the date of this publication, The American Kennel Club, Canine Health Foundation, and the The Kennel Club of England reports over 400 known hereditary health syndromes throughout the dog kingdom. At the writing of my first book in 1983, less than 50 hereditary issues are able to be predicted and/or diagnosed. Sequencing of the canine genome, DNA tests, metabolic testing including blood tests and urine testing, plus phenotypic examinations such as radiographs, ultrasound, and CERF or OFA eye registry exams by a Board Certified

Veterinary Ophthalmologists have advanced the science of breed related health and behavioral problems. This book will provide veterinarians, researchers, pet owners and breeders with a comprehensive guide to all the known problems veterinarians and dog owners should consider during pet selection and throughout each life stage of our canine friends.

Dogs in Australian Art Steven Miller, 2012 *DOGS IN AUSTRALIAN ART* looks at Australian art through the lens of dog painting, showcasing over 150 masterworks that illustrate the deep bond between Australians and their best friends. Steven Miller's whimsical text argues that all the major shifts which occurred in Australian art and which have traditionally been attributed to the environment or historical factors really occurred because of dogs. His book is also a study of how the various dog breeds have been depicted from colonial times until the present.

Swifter Than the Arrow Michael Rice, 2006-03-31 *Swifter than the Arrow* explores a little known aspect of life in Ancient Egypt, celebrating the Egyptians as the first known

civilisation to have formed the special bond with the dog that persists today as the most remarkable and enduring of human animal relationships Five thousand years ago the Egyptians selected and bred hounds for the chase and as the loved companions of both the Great Ones the ruling classes and of less exalted folk For more than twenty five centuries they kept the breed true a remarkable achievement to be counted alongside the development of stone architecture and the building of the pyramids the invention of hieroglyphs the creation of kingship and of the first nation state in the world The dogs on which the Egyptians lavished such loving care and skill were the elegant slender prick eared golden hounds familiar from a thousand tomb reliefs that they called tjesm They were given affectionate names and were the companions of kings who honoured them with rich burials to ensure that they would be together for ever in the Afterlife Numerous representations of dogs and their masters from predynastic rock art through to elaborate tomb paintings and reliefs leave us in no doubt as to the sincerity of the affection that the Egyptians felt for their dog companions The first named dog lover in history was the earliest known queen Herneith who was buried with her hound at Saqqara Dogs and other canines also played their roles in the rich pantheon of ancient Egyptian religion figuring as semi divine messengers between the worlds of the living and the dead Perhaps the most familiar such deity is the sleek black jackal headed god Anubis guardian of the Necropolis and attendant of the underworld Swifter than the Arrow also examines the evidence that hounds living today most notably modern breeds such as the so called Pharaoh Hound are directly descended from the Egyptian hound It reveals remarkable information about the ancestry of the hounds of the Mediterranean islands that unmistakably share the appearance and character of the dogs that once raced across the Egyptian deserts This unique book throws fresh light on our understanding of ancient Egypt while providing a completely fresh insight into the development of mankind s remarkable bond with the domesticated dog
