Pharmacological Management Of Neurological And Psychiatric Disorders:

Pharmacological Management of Neurological and Psychiatric Disorders S. J. Enna, Joseph T. Coyle, 1998 A guide that assists diagnosis and therapeutic of neurological and psychiatric disorders It includes an introductory chapter that covers basic neuroscience and pharmacology as they pertain to the treatment of central nervous system disorders **Neurological and Psychiatric Disorders** Frank I. Tarazi, John A. Schetz, 2007-11-17 A comprehensive systematic and advanced review of the scientific preclinical and clinical aspects of several major mental illnesses The illnesses covered range from neurological disorders including Alzheimer s disease Huntington s disease and Parkinson s disease to psychiatric disorders including schizophrenia autism spectrum disorders Tourette s syndrome and tic disorders obsessive compulsive disorder unipolar depression bipolar disorder and attention deficit hyperactivity disorder For each disorder the authors uniformly discuss its incidence and prevalence etiology molecular targets and mechanisms of action brain structures and pathways animal models signs and symptoms genetics treatments and related medical terminology Clinical Neuroanatomy John Mendoza, Anne Foundas, 2007-12-26 A major focus of clinical neuropsychology and cognitive behavioral neurology is the assessment and management of cognitive and behavioral changes that result from brain injury or disease In most instances the task of the neuropsychologist can be divided into one of two general categories Perhaps the most common is where patients are known to be suffering from identified neurological insults such as completed strokes neoplasms major head traumas or other disease processes and the clinician is asked to assess the impact of the resulting brain damage on behavior The second involves differential diagnosis in cases of questionable insults to the central nervous system Examples of the latter might be milder forms of head trauma anoxia and dementia or suspected vascular compromise In either instance understanding the underlying pathology and its consequences depends in large part on an analysis of cognitive and behavioral changes as well as obtaining a good personal and medical history The clinical investigation will typically include assessing problems or changes in personality social and environmental adaptations affect cognition perception as well as sensorimotor skills Regardless of whether one approaches these questions having prior independent confirmation of the pathology versus only a suspicion of pathology a fairly comprehensive knowledge of functional neuroanatomy is considered critical to this process Unfortunately as neuropsychologists we too frequently adopt a corticocentric view of neurological deficits We recognize changes in personality memory or problem solving capacity as suggestive of possible cerebral compromise *Neural bases of neurological and psychiatric disorders and their neuromodulation treatments* Kai Wang, Jiaojian Wang, Yanghua Tian, Bochao Cheng, Hongming Li, 2023-03-23 **Rosenberg's Molecular and Genetic Basis of Neurological and Psychiatric Disease** Roger N. Neurological Clinical Pharmacology M. Eadie,J.H. Tyrer,2012-12-06 In recent years there has been much interest in clinical pharmacology and its application to the treatment of disease including disease of the nervous system At the same time there have been major advances in basic neuropharmacology The aim of this book is to integrate clinical pharmacology with basic neuropharmacology and clinical neurology The book discusses in the light of clinical pharmacology and particularly pharmacokinetics the treatment of those disorders of the nervous system that are conventionally managed by the clinical neurologist Matters pertaining to psychopharmacology have been deliberately excluded except in so far as they impinge on ordinary clinical neurological practice The extent to which various disorders have been considered has depended partly on their importance to the clinical neurologist practising in non tropical areas and partly on the amount of data available relating to the relevant drug treatment Thus the book is directed at clinical neurologists and those intending to practise clinical neurology However it also contains material of interest to the general physician paediatrician psychiatrist and clinical pharmacologist Although the emphasis in this book is on drug treatment to preserve balance it has seemed desirable to discuss briefly certain non pharmacological aspects of therapeutics The orderly methodical approach used in the book offers two possible advantages first once the reader is familiar with the approach see Guide to the Use of This Book p
