The Paradoxes of Delusion Louis A. Sass, 2018-08-06 Insanity in clinical practice as in the popular imagination is seen as a state of believing things that are not true and perceiving things that do not exist Most schizophrenics however do not act as if they mistake their delusions for reality In a work of uncommon insight and empathy Louis A Sass shatters conventional thinking about insanity by juxtaposing the narratives of delusional schizophrenics with the philosophical writings of Ludwig Wittgenstein

Self and Other Dan Zahavi, 2014-11-27 Can you be a self on your own or only together with others Is selfhood a built in feature of experience or rather socially constructed How do we at all come to understand others Does empathy amount to and allow for a distinct experiential acquaintance with others and if so what does that tell us about the nature of selfhood and social cognition Does a strong emphasis on the first personal character of consciousness prohibit a satisfactory account of intersubjectivity or is the former rather a necessary requirement for the latter Engaging with debates and findings in classical phenomenology in philosophy of mind and in various empirical disciplines Dan Zahavi's new book Self and Other offers answers to these questions Discussing such diverse topics as self consciousness phenomenal externalism mindless coping mirror self recognition autism theory of mind embodied simulation joint attention shame time consciousness embodiment narrativity self disorders expressivity and Buddhist no self accounts Zahavi argues that any theory of consciousness that wishes to take the subjective dimension of our experiential life serious must endorse a minimalist notion of self At the same time however he also contends that an adequate account of the self has to recognize its multifaceted character and that various complementary accounts must be integrated if we are to do justice to its complexity Thus while arguing that the most fundamental level of selfhood is not socially constructed and not constitutively dependent upon others Zahavi also acknowledges that there are dimensions of the self and types of self experience that are other mediated The final part of the book exemplifies this claim through a close analysis of shame

Phenomenology, Transversality, and World Philosophy Hwa Yol Jung, 2021-03-12 Phenomenology Transversality and World Philosophy

explores the concept of world philosophy Weltphilosophie to take into account the reality of today's multicultural and globalizing world. It challenges the assumption that the particular in the West is universalizable but the particular in the non-West is particular forever using the concept of transversality to construct an intercontinental philosophy. In the tradition of Johann Wolfgang von Goethe's world literature Weltliteratur and in dialogue with work in ethics and political philosophy, Hwa Yol Jung examines the roles that phenomenology and transversality play in constructing world philosophy. *The Urban Planetary and Tokyo Modernity* Christophe Thouny, 2023-12-15. *The Urban Planetary and Tokyo Modernity* Dwelling in Passing analyzes everyday experiences in Tokyo during the 1910s and 1920s showing how urban literature and urban ethnography both tried to come to terms with an emerging planetary situation defined by both ongoing movement and an intensification of local experiences. This book argues that modern urban experiences are not primarily a question of alienation, consumerism or national life but first one of dwelling and in particular a dwelling in passing. Looking at the work of the Japanese urban ethnographer Kon Wajiro in relation to early 20th century literary mappings of Tokyo in Japanese literature such as Mori Ogai's 1912 novel *Youth* to Tayama Katai's 1916 *The Tokyo Near Suburb* Christophe Thouny argues for the need to reconsider these texts in terms of a speculative genealogy of local answers to an insistent planetary situation.

Quasi-Things Tonino Griffero, 2017-03-15. An aesthetic and phenomenological account of feelings. In this book Tonino Griffero introduces and analyzes an ontological category he terms quasi things. These do not exist fully in the traditional sense as substances or events yet they powerfully act on us and on our states of mind. He offers an original approach to the study of emotions regarding them not as inner states of the subject but as atmospheres that is as powers poured out into the lived space we inhabit. Griffero first outlines the general and atmospheric characters of quasi things and then considers examples such as pain, shame, the gaze and twilight which he argues is responsible for penetrating and suggestive moods precisely because of its vagueness. With frequent examples from literature and everyday life *Quasi Things* provides an accessible aesthetic and phenomenological account of feelings based on the paradigm of atmospheres. The task of modern phenomenology is to dissolve with the help of corrections and additions the contrasts solidified in the bath of involuntary vital experience thus opening up new horizons of questioning and understanding. Tonino Griffero accomplishes this task by carefully ploughing the field of quasi things which I inaugurated. This is why the book is worthy of great attention. Hermann Schmitz University of Kiel. This volume is a significant contribution to the expanding literature on atmospheres. Most importantly the book lays the groundwork for the study of quasi things. David Seamon editor of *Environmental and Architectural Phenomenology*. Griffero has written a phenomenological exploration of the pre-reflective dimensions of experience in the form of a pathetic aesthetics. This book rich in originality and insight illuminates an important new direction in the study of pre-reflective experience. Arnold Berleant founding editor of *Contemporary Aesthetics*. *Modern Psychoanalysis* Judd Marmor, 2018-04-17. *Modern Psychoanalysis* is a definitive exploration of the expanding horizons of this

still controversial approach to and treatment of human behavior In the first paperback release of a work sponsored by the American Academy of Psychoanalysis thirty five authorities explore new approaches to psychoanalytic theory and therapy and examine the growing interaction between this field and the other social and behavioral sciences Modern Psychoanalysis demonstrates how some of the leading figures are bringing their discipline into the mainstream of biological and social through making use of systems theory information processing the constructs of adaptation and learning and other new tools and findings The book is unusually free of the jargon that has separated psychoanalysis in the past from the rest of behavioral and social science Some of the authors and their subjects are Roy Grinker Conceptual Progress in Analysis Jin gen Ruesch Psychoanalysis between Two Cultures Edward Tauber Dreaming and Modern Dream Theory Jules Masserman The Biodynamic Roots of Psychoanalysis Lewis H Wolberg Short term Psychotherapy Stuart M Finch and Albert Cain Psychoanalysis of Children Morris Parloff Analytic Group Psychotherapy Salvador Minuchin The Low Socioeconomic Population Leonard Duhl and Robert Leopold Psychoanalysis and Social Agencies Leo n Edel Psychoanalysis and the Creative Arts Arnold A Rogow Psychiatry History and Political Science and John R Seeley Psychiatry Revolution Reform and Reaction The volume is prepared with the rigor and comprehensiveness that should make the book a standard handbook for psychiatrists psychologists and behavioral scientists And it is written with a sense of curious readers who may simply be interested in the basic stances of this controversial field of theory and practice It has earned sufficient plaudits to be called a classic in the field Judd Manner s new introduction gives added weight to such claims
